

## Department of Electrical Engineering

# P-16 Curriculum (Out Come Based)

### **INSTITUTE VISION**

Transform knowledge into work

### **INSTITUTE MISSION**

We are committed to:

- quality education for lifelong learning.
- need based educational programmes through different modes.
- outcome based curriculum implementation.
- development and up gradation of standard laboratory practices.
- promoting entrepreneurial programmes.
- We believe in ethical values, safety and environment friendly practices and teaching learning innovations.

### **DEPARTMENT VISION**

## Develop competent electrical professionals and practicing engineers. <u>DEPARTMENT MISSION</u>

We are committed for quality education through

- continuous up-gradation of the faculties and laboratories.
- development and up gradation of standard, safe laboratory practices.
- creating entrepreneurial awareness.
- developing the consciousness of energy management and renewable energy.
- serving the society

### Program Outcomes (POs) -10

- 1. **Basic knowledge:** An ability to apply knowledge of basic mathematics, science and engineering to solve the engineering problems.
- 2. **Discipline knowledge**: An ability to apply discipline specific knowledge to solve core and/or applied engineering problems.
- 3. **Experiments and practice:** An ability to plan and perform experiments and practices and to use the results to solve engineering problems.
- 4. **Engineering Tools**: Apply appropriate technologies and tools with an understanding of the limitations.
- 5. **The engineer and society**: Demonstrate knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering practice.
- 6. Environment and sustainability: Understand the impact of the engineering solutions in societal and environmental contexts, and demonstrate the knowledge and need for sustainable development.
- 7. **Ethics**: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.
- 8. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse/multidisciplinary teams.
- 9. Communication: An ability to communicate effectively.
- 10.Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and lifelong learning in the context of technological changes.

### **PROGRAM EDUCATIONAL OBJECTIVES (PEO)**

- **PEO1**. The students will practice their Technical skills to meet the need of industry and society.
- **PEO2**. The students will practice their profession with ethics, integrity, safety and social Responsibility with attention to health, environment, team work and effective communication.
- **PEO3**. They will be able to upgrade their knowledge by life-long learning in the context of technological changes to enhance technical and entrepreneurial abilities.

### **PROGRAM SPECIFIC OUTCOMES (PSO)**

- **PSO1:** The ability to operate, supervise, test and maintain the various machineries, electrical installations and power system equipments.
- **PSO2:** The ability to carry out energy audit, prepare electrical estimates and costing and to read, interpret and implement electrical drawing.
- **PSO3:** The ability to practice profession with attention to energy conservation, ethical principles, safety, environmental aspects and socially beneficial activities.

## **Curriculum Philosophy**

(P16 Outcome based Curriculum)

#### Preface

The quality of technical education is dependent on a well-developed curriculum. The curriculum should not focus only on technical contents but it should impart necessary skills that help students to learn how to cope with new challenges. It should prepare them for lifelong learning once they enter the workforce. It is very necessary that the diploma students should be well updated with the latest technological skills and advancements, to meet industrial demands and contribute to nation building. With this thought we have designed outcome based curriculum keeping in view the latest industry trends and market requirements. Outcome based curriculum will be offered to students 2016 onwards. Outcome based curriculum is student centric rather than teacher centric. It is comprising of basic science and engineering having focus on fundamentals, significant discipline level courses and electives. Inplant training is also included in the curriculum to make the student understand industry requirements, have hands on experience and take up project work relative to industry in their final year. These features will allow the students to develop problem solving approach to face the challenges in real life.

In outcome based education, Programme Outcomes, Programme specific outcomes, Course outcomes are defined first and then course contents are designed to achieve these outcomes. During curriculum implementation the teacher will analyze the contents and then develop the learning experiences which will ensure accomplishment of outcome. The industry experts, being main stake holders are actively involved, while designing the curriculum. Outcomes are validated by industry experts, so it will produce industry ready pass outs and increase the employability of students.

Salient features of this curriculum are

- Outcome based curriculum with well defined outcomes for each course
- Incorporation of Inplant training
- Built in flexibility to the students in terms of elective courses
- Course on Entrepreneurship to encourage entrepreneurial skills
- More weightage for practical's in terms of contact hours to increase skill component
- Introduction of Yoga in first semester to inculcate the habit of physical and mental fitness right at the start

- Introduction of Social work in first semester to inculcate social awareness and values
- Introduction of Spoken Tutorial course in order to inculcate self learning capability in students.
- A list of experiments with clear outcomes.

The New Curriculum has been designed to better meet the needs of the industry considering evolving technological trends and implications for the engineering workforce. This curriculum is also expected to enhance employability skills and develop well trained Diploma Engineers who have the knowledge and the skills to get engineering solutions for real-world problems.

I gratefully acknowledge the time and efforts of all those who contributed to design the curriculum, especially the contributions of chairperson and members of Board of Studies and Programmewise Board of Studies. I acknowledge all the stake holders, aluminies and subject experts.

(Mrs. Swati Deshpande) Principal Government Polytechnic Mumbai

#### **Outcome Based Education Philosophy**

As the National Board of Accreditation (NBA) is focusing on the adoption of Outcome Based Education (OBE) approach, Government Polytechnic, Mumbai has adopted the OBE approach for design of curriculum P16 to all programmes. NBA adopted Outcome based Model because, OBE is "Student Centric" rather than "Teacher Centric". OBE focuses on the graduate attributes or outcomes after completing an academic programme. Outcome based approach means knowing what you want to achieve and then taking the steps to do so. Starting with a clear picture of what is important for students to be able to do and then organizing the curriculum delivery and assessment to make sure learning happens.

#### Some Benefits of OBE are

- 1. Satisfying the need of stake holders
- 2. More specific and coherent curriculum
- 3. Student centric

#### **Components of the OBE** are

- 1. Outcome based curriculum: What students should be able to do after learning the curriculum?
- 2. Outcome based Teaching Learning: Prepare and train the students to achieve the outcomes.
- 3. Outcome based assessment: Measure what the student has achieved? Indentify which outcome has not attained by the students.
- 4. Remedial measures: Take the remedial measures so that student can achieve that outcome.

Figure 1 shows outcome based education philosophy. Vision and mission statements will be finalized first, and then each programme will finalize Programme educational objectives (PEOs). Programme outcomes (POs) are given by NBA. Each programme will finalize their Programme Specific Outcomes (PSOs). Then course outcomes (COs) are finalized and then content detailing of each course will be carried out.

Figure 2 shows our curriculum design process/philosophy. Figure is self explanatory. Important steps are given below. Process starts with formulation of vision mission statements of the institute.

#### 1. Formulation of Vision Mission Statements

Vision Mission statements of the institute are finalized using following steps.

- Bottoms up approach
- Involvement all stakeholders
- Discussion, Brain storming sessions among all stake holders
- Gap analysis or SWOT analysis
- Challenges before the institute
- What are the immediate and long term goals

After following these steps vision and mission statements of the institute is finalized as

#### **Institute Vision**

Transform Knowledge into Work

#### **Institute Mission**

We are committed for

- Quality education for life long learning
- Need based educational programmes through different modes.
- Outcome based curriculum implementation
- Development and up gradation of standard laboratory practices
- Promoting entrepreneurial programmes

We believe in ethical, safety, environmental friendly practices and teaching learning innovations.

Once, the vision mission statements are finalized. Using the same procedure vision mission statements of each programmes are finalized.

#### 2. Programme Educational Objectives (PEOs)

The Programme educational objectives of a diploma program are the statements that describe the expected achievements of diploma holders in their career, and also in particular, what they are expected to perform and achieve during the first few years after diploma. The PEOs, may be guided by global and local needs, vision of the Institution, long term goals etc. For defining the PEOs the faculty members of the program have continuously worked with all Stakeholders: Local Employers, Industry, Students and the Alumni

#### 3. Programme Outcomes (POs)

Programme outcomes are given by NBA. They are

1. **Basic knowledge:** An ability to apply knowledge of basic mathematics, science and engineering to solve the engineering problems.

2. **Discipline knowledge**: An ability to apply discipline - specific knowledge to solve core and/or applied engineering problems.

3. Experiments and practice: An ability to plan and perform experiments and practices and to use the results to solve engineering problems.

4. Engineering Tools: Apply appropriate technologies and tools with an understanding of the limitations.

5. The engineer and society: Demonstrate knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to engineering practice.

6. Environment and sustainability: Understand the impact of the engineering solutions in societal and environmental contexts, and demonstrate the knowledge and need for sustainable development.

7. Ethics: Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice.

8. **Individual and team work:** Function effectively as an individual, and as a member or leader in diverse/multidisciplinary teams.

9. Communication: An ability to communicate effectively.

10. Life-long learning: Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the context of technological changes.

#### 4. Programme Specific Outcomes (PSOs)

These outcomes are specific to a program in addition to NBA defined POs, namely, Civil, Computer, Electrical, Electronics, Mechanical, Information Technology, Instrumentation, Rubber Technology, Leather Technology, and Leather Goods and Footwear technology.

#### 5. Course Outcomes (COs) and Content detailing

"Statements of observable student actions that serve as evidence of the Knowledge, Skills and Attitudes acquired in a course". Each course is designed to meet (about 4 to 6) Course Outcomes The Course Outcomes are stated in such a way that they can be actually measured. "Blooms Taxonomy" is used for framing course outcomes.

Course Outcome statements are broken down into two main components:

- An action word that identifies the performance to be demonstrated;
- Learning statement that specifies what learning will be demonstrated in the performance;

Once the COs are finalized, content detailing of each course is done as per the course outcomes. For content detailing inputs are taken from stake holders, MSBTE curriculum and industry persons.

#### 6. CO-PO and CO-PSO mapping

When all COs are finalized, COs are mapped with POs and PSOs. During mapping if it is found that particular PO or PSO has not been addressed by any CO, then it is considered as gap. To remove this gap, again COs are modified. This process will repeat till all POs and PSOs are mapped by COs.

#### 7. Approval in PBOS and BOS meetings.

After CO-PO and CO-PSO mapping, content detailing is done. Then the curriculum is kept for approval in Programme wise Board of studies (PBOS) meeting. Each programme has its own PBOS committee whose structure is as follows.

| Head of Department concerned              | Chairman |
|---|----------|
| Two senior Lecturers                      | Members  |
| One expert from the neighboring institute | Member   |

| Nominee from the board of technical Education | Member           |
|---|------------------|
| One expert from the local industry            | Member           |
| Departmental Curriculum Coordinator           | Member Secretary |

Suggestions given by PBOS members are incorporated in the curriculum and then it is put in front of Board of studies (BOS). Structure of BOS is as follows.

| Representative from Industry                  | Chairman         |
|---|------------------|
| Principal                                     | Member           |
| Head of All departments                       | Member           |
| Local Experts of all programmes               | Member           |
| Nominee from the board of technical Education | Member           |
| In charge CDC / Academic Coordinator          | Member Secretary |

Suggestions given by BOS members are incorporated in the curriculum and the finalized curriculum is then offered to the students.

#### 8. Institute Policies

As per the guidelines given by All India Council of Technical Education (AICTE), Maharashtra State Board of Technical Education (MSBTE), Directorate of Technical Education (DTE) and NBA, Institute policies about curriculum design are decided in the meeting of all Heads of the departments.

Being an autonomous institute, we revise our curriculum after every 4 to 5 years. Earlier it was revised in 2011. Curriculum 2011 was objective based curriculum. As per instructions received from AICTE and NBA, **Outcome based curriculum** should be offered to students, we have decided to offer **Outcome based curriculum** in 2016. In 2016 it will be offered to first year and in subsequent years it will be offered to second year and third year. Once the curriculum frame work is finalized at the institute level, as per the demand of the industry, course contents can be changed at any level without disturbing the frame work. This is necessary to satisfy the present demand of the industry and remove the curricula gaps as per the advancement in technology.

2011 curriculum was of 180 credits. But as per AICTE norms given in APH 2015-16, contact hours per semester should be 525 hours and number of teaching days should be 75 in a semester (7 hours per day i.e. 35 hours per week). Diploma is of 3 years (6 semesters). ( $35 \ge 210$ ). So we decided to design 2016 curriculum with 200 credits + 10 non credit courses.

#### **Definition of Credit:**

1 Hr. Lecture (L) per week 1 credit

1 Hr. Tutorial (T) per week 1 credit

2 Hours Practical (P) per week 2 credit

Civil Engineering, Mechanical Engineering, Rubber Technology, Leather Technology, Leather Goods and Footwear Technology departments are incorporating Inplant training in their curriculum, wherein students will go for Inplant training in the industries during last semester. So their credits will be 190 credits + 10 non credit courses.

For rest of the branches 6 weeks Inplant training is incorporated in the curriculum. 4 week training will be performed after 4<sup>th</sup> semester during summer vacation and 2 week training will be performed after 5<sup>th</sup> semester during winter vacation. So their credits will be 200 credits + 10 non credit courses. Credit distribution of both cases is given below.

| Year   | Semester | Credits | Total Credits | Total credits |
|--------|----------|---------|---------------|---------------|
|        |          |         | Year wise     |               |
| First  | First    | 30      | 60            | 200           |
|        | Second   | 30      |               |               |
| Second | Third    | 35      | 70            |               |
|        | Fourth   | 35      |               |               |
| Third  | Fifth    | 35      | 70            |               |
|        | Sixth    | 35      |               |               |

Curriculum Frame work for (CO, IT, EC, EE, IS)

#### Curriculum Frame work for (CE, ME, RT, LT, LGFT)

| Year                             | Semester | Credits | Total Credits<br>Year wise | Total credits |
|----------------------------------|----------|---------|----------------------------|---------------|
| Year<br>First<br>Second<br>Third | First    | 30      | 65                         | 190           |
|                                  | Second   | 35      |                            |               |
| Second                           | Third    | 35      | 70                         |               |
|                                  | Fourth   | 35      |                            |               |
| Third                            | Fifth    | 35      | 55                         |               |
|                                  | Sixth    | 20      |                            |               |

Social-emotional learning develops **5 core competencies** in students: self-awareness, selfmanagement, social awareness, relationship skills, and responsible decision-making. Yoga and meditation foster these core competencies. Through a yoga and meditation practice, students first learn to bring awareness to their breath and physical body. By focusing on this connection, student become more able to feel and experience what is happening within the mind and bodies, developing stronger self-awareness. With this thought we have decided to incorporate "Yoga" as a non credit course in first semester for all programmes.

To Inculcate Social awareness, values and environmentally responsible behavior amongst students and to nurture students as citizens with moral, ethical and social values so as to provide service to the society through activities and discharge their obligations towards the society, we decided to incorporate "Social Work" as a non credit course in first semester for all programmes. First year, first semester of all programmes is of 30 credits, so 5 hrs non credit non exam courses are incorporated in curriculum of all programmes as shown below.

| Semester       | Courses     | Hours | Total hours |
|----------------|-------------|-------|-------------|
| First Semester | Yoga        | 2 Hrs | 5 Hrs       |
|                | Social work | 3 Hrs |             |

In order to inculcate self learning capability in students "Spoken Tutorial" course is incorporated in the curriculum of second semester of CO, IT, EC, EE, IS. Similarly to create awareness about Digital India, a course "Digital India" is incorporated in curriculum of second semester of CO, IT, EC, EE, IS.

First year, second semester of CO, IT, EC, EE, IS programmes is of 30 credits, so 5 hrs non credit non exam courses are incorporated in curriculum of these programmes as shown below.

| Semester        | Courses         | Hours  | Total hours |  |
|-----------------|-----------------|--------|-------------|--|
| Second Semester | Spoken Tutorial | 2 Hrs  | 5 Hrs       |  |
|                 | Digital India   | 3 Hrs. |             |  |

For all courses 70+30 pattern of examination is followed instead of 80+20. Two internal progressive assessment tests are conducted for theory courses in a semester having maximum marks 30. End semester examination of 70 Marks is conducted at the end of the semester. Average of two test marks out of 30 is added to end term marks out of 70. Thus total marks of the course are given out of 100.

After test as well as end term examination bitwise analysis of answer book of each student will be done in order to calculate course outcome attainment. From course attainment, PO and PSO attainment will be calculated. If attainment is not satisfactory remedial measures will be taken by respective department.

Entire curriculum of all Programmes is as per following levels

- Level1- Science and Humanities (10 to 15%)
- Level2- Core Technology (25 to 30%)
- Level3- Applied Technology (45 to 50%)
- Level4- Diversified Courses (5 to 10%)
- Level5- Management courses (3 to 5%)

Course Coding Scheme:-

| Course Code abbrevations | Definitions                |
|--------------------------|----------------------------|
| HU                       | Humanities                 |
| SC                       | Science                    |
| MG                       | Management                 |
| CE                       | Civil                      |
| СО                       | Computer                   |
| EC                       | Electronics                |
| EE                       | Electrical                 |
| IT                       | Information Technology     |
| IS                       | Instrumentation            |
| RT                       | Rubber                     |
| LT                       | Leather Technology         |
| LG                       | Leather Goods and Footwear |

Course codes are formed as:

First two letters are course code abbreviations. Then two digits "16" refers to 2016 curriculum.

Next digit is level number and last two digits are serial number from that level.

For example: HU16101 (Basics of Communication)

- HU- It belongs to Level 1 Science & humanities
- 16- 2016 curriculum
- 1- Level 1
- 01- Sr. No of Level 1 courses.

## **Salient Features of P-16 Curriculum**

- Autonomous institute- Freedom to design Curriculum as per the need of Industry/Society
- Outcome Based (OBE)
- > To design Curriculum- Feed back from stakeholders.
- More Practical approach
- Maintaining PR/TH ratio
- Total Diploma Marks 5000
- ➢ Total Credits 200
- First Year (Odd/Even Sem) 60 credits
- Second & Third Year (Odd/Even Sem) Each 70 credits
- ➢ For Skill development − Noncredit able courses
- Elective Courses in V & VI Sem (Final Year)
- > 70-30 Pattern (70 End Term Exam & 30 Unit Test (2 UT- Avg.)

#### 200 Credit Scheme P-16 Level Wise Marks Distribution

P-16 curriculum scheme is divided into 5 levels.

- Science & Humanities (10 to 15%)
- ➢ Core Technology Courses (25 to 30%)
- ➢ Applied Technology Courses (45 to 50%)
- Diversified Courses (5 to 10%)
- ➤ Management Courses (3 to 5%)

| Sr. | Course                        | <b>Course Code</b>   | Credits    | % of   | Marks  | % of  |
|-----|-------------------------------|----------------------|------------|--------|--------|-------|
| No. | Level                         |                      |            | Course |        | Marks |
|     |                               |                      |            | Level  |        |       |
|     | <b>C</b>                      | HU16101, SC16104,    |            |        |        |       |
| 1   | Science &                     | SC16107, HU16103,    | 27         | 13.5   | 750    | 15.0  |
|     | Humanities                    | HU16102, SC16108,    |            |        |        |       |
|     |                               | SC16106, HU16104,    |            |        |        |       |
|     |                               | CO16202, CO16203,    |            |        |        |       |
| 2   | G                             | AM16201, WS16201,    |            |        |        |       |
|     | Core<br>Technology<br>Courses | EE16202, EC16202,    |            | 35.5   | 1 (00) | 22.0  |
|     |                               | ME16201, EE16208,    | 71         |        | 1600   | 32.0  |
|     |                               | EE16209, EE16210,    |            |        |        |       |
|     |                               | ME16211, EE16211,    |            |        |        |       |
|     |                               | EE16212, EE16213     |            |        |        |       |
|     |                               | EE16301, EE16302,    |            | 32.0   | 1600   |       |
|     |                               | EE16303, EE16304,    |            |        |        |       |
|     | Applied                       | EE16307, EE16305,    | <i>c</i> 1 |        |        | 22.0  |
| 3   | Technology                    | EE16306, EE16308,    | 64         |        |        | 32.0  |
|     | Courses                       | EE16312, EE16309,    |            |        |        |       |

## Award of Diploma (P-16)

For the award of Diploma in Electrical Engineering programme, Applied Engineering courses of  $5^{\text{th}}$  semester and  $6^{\text{th}}$  semester will be considered along with their credit and marks weightage.

The details for the award of Diploma in Electrical Engineering programme are expressed in the following table and the related Reaching & Examination scheme is also attached herewith for any further reference.

| Award of Diploma          | Total Number of<br>Courses | Total Credits | Total Marks |
|---------------------------|----------------------------|---------------|-------------|
| Electrical<br>Engineering | 12                         | 58            | 1550        |

**Award of Class Courses** 

#### Following courses are offered for Award of Class for Electrical Engineering Diploma Government Polytechnic Mumbai

(Academically Autonomous Institute of Maharashtra Government)

49, Ali Yawar Jung Marg, Kherwadi, Bandra €

**Programme: Electrical Engineering** 

**Award of Class Courses** 

With effect from June 2018

Teaching & Examination Scheme for the Students admitted in Third Year in 2018-19

#### P-16\_Direct Second Year Electrical Engineering- List of Backlog Courses

#### (Directly Admitted to Second Year Electrical Engineering)

The details of the Backlog courses for the students those who are admitted directly to Second year (III<sup>rd</sup> Sem) Electrical Engineering Diploma they have to appear for the Backlog Courses which are expressed in the following table. (If till some cases are special then accordingly the decision will be taken)

| Sr. | Odd / Even   | Backlog Courses (Title & Code)  | Sem   | Credit | Total   |
|-----|--------------|---------------------------------|-------|--------|---------|
| No  | Semester     |                                 | ester |        | Credits |
|     | Odd Sem      | 1. Mathematics I (SC16107)      | Ι     | 4      |         |
| 1   | (During Sem- | 2. Computer Workshop (CO16203)  | I     | 2      | 14      |
| 1   | III)         | 3. Basic Electrical Engineering | II    | 8      | 14      |
|     |              | (EE16202)                       |       |        |         |
|     | Even Sem     | 1. C-Programming (CO16202)      | Ι     | 4      |         |
| 2   | (During Sem- | 2. Mathematics II (SC16108)     | II    | 4      | 1.4     |
| 2   | IV)          | 3. Elements of Electronics      | II    | 6      | 14      |
|     |              | Engineering (EC16202)           |       |        |         |
|     |              | 1                               | 1     | 1      | 1       |

The students who are admitted directly to second year, they have to complete their three backlog courses of Sem-I (SC16107 & CO16203) & II (EE16202) during Odd Sem (Sem-III) & three backlog courses of Sem-I (CO16202) & II (SC16108 & EC16202) during Even Sem (Sem-IV).

\*Indicates that students from P-11 scheme has to clear any two Mathematics (Basic Mathematics, Engg. Mathematics & Applied Mathematics). He will be exempted from the remaining Mathematics & will be awarded the credits from P-11 scheme.

\*\* Indicates that students from P-11 scheme has to clear any one from Basic Electronics (EC 11 203) & Applied & Digital Technique (EC 11 312). He will be exempted from the remaining Course & will be awarded the credits from P-11 scheme.

#Indicates On-Line Examination for the said courses.

Head of Department Electrical Engg.

#### **Equivalence Courses for P-11 to P-16 Scheme**

This is to inform you that following table represents equivalent courses for P-11 scheme to P-16 scheme.

| P-11 Scheme |  | P-16 Scheme |  |          |  |
|-------------|--|-------------|--|----------|--|
| Course Code | Course Title                                     | Course Code | Course Title<br>2016 Scheme            | Semester |  |
| EC 11 203   | Basic Electronics                                | EC 16 202   | Elements of Electronics<br>Engineering | Second   |  |
| SC 11 122   | Applied<br>Mathematics                           | SC 16 108   | Mathematics-II                         | Second   |  |
| EC 11 312   | Applied Electronics<br>and Digital<br>Techniques | EC 16 202   | Elements of Electronics<br>Engineering | Second   |  |
| MG 11 511   | Entrepreneurship<br>Development                  | MG 16 502   | Entrepreneurship<br>Development        | Sixth    |  |

Head of Electrical Engineering Govt. Polytechnic, Mumbai

To, The Controller of Examination, Govt. Polytechnic, Mumbai GPP/EE/Equivalence/P-11 P-16/2017-18/651 (A)

## **Department of Electrical Engineering**

Reference: - GPP/EE/Equivalence/P-11 P-16/2017-18/651 dated 20/03/2018

As per the above reference the following courses of Electrical Engg. Department represents the Equivalence courses for P-11 & P-16 scheme.

| Sr. No. | Programme  | P-11 Scheme |              | P-16 Scheme |               |
|---------|------------|-------------|--------------|-------------|---------------|
|         |            | Course Code | Course Title | Course Code | Course Title  |
| 01      | Electrical | CO11 201    | Computer     | CO16 203    | Computer      |
|         | Engg.      |             | Fundamentals |             | Workshop      |
| 02      | Electrical | CO11 302    | Programming  | CO16 202    | C-Programming |
|         | Engg.      |             | Language-C   |             |               |

Head of Department Electrical Engg. Government Polytechnic, Mumbai

## **Department of Electrical Engg**

#### **Detention Implementation 2016 (P16 Scheme)**

Applicable for students admitted from year 2016 onwards

- At the end of the year if a student is detained in any course, he/she is not allowed for admission in next year. Student is not allowed in higher year with detention in lower year.
- If a student is detained in Odd semester of any year, he/she will be allowed to re register for detained courses in even semester of same year along with regular courses of even semester. (Limited to 2 detained courses).
- However, if a student is detained in odd or even semester of current year, he/she will be allowed to reregister for these detained courses (maximum 2 courses) in summer vacation. A special semester called vacation semester will be run for such students. Dept. will make necessary arrangements in the departments.
- Such students has to pay additional fees for this, which is minimum Rs 1000 and Maximum Rs 10000, per course depending on number of students and remuneration of the faculty.
- Vacation semester will be of 4 weeks duration and will start after end term examination of even term, and students will appear for examination of vacation semester courses in reexamination of even term exam.
- Maximum 2 courses can be registered
- Remuneration per course to staff will be paid as per following rates.
   Visiting Lecturer Rs 500/- per hour for theory and Rs 500/- per practical (Maximum Rs 15000/-) Lab assistant: Rs 3000/- and Peon: Rs 2000/-
- Whenever students do registration of detained courses, he/she needs to pay additional fees for that.
- Such student has to pay additional fees, which is minimum Rs 1000 and Maximum Rs 10000, per course depending on number of students and remuneration of the faculty.
- Remuneration to staff will be paid as per given above
- Registration for such semester depends on willingness of students.

## If a student is failed in any course of first year, he/she will not be allowed for third year admission.

**Department of Electrical Engineering**

#### **Rationale:**

English is the global language today. The basic knowledge of this language is essential for everyone. It is necessary for the Engineering and Technology related students to cope up with the challenges of the modern world with the help of English. The major part of their work experience needs certain knowledge of this language. At worksite, on the shop floor or fields, they might be required to take the instructions from superiors and to pass them on to subordinates. To write letters, circulars, memos, notice and reports will be an important task for them. While designing the curriculum of communication skills and communication practice the probable needs of the future technicians are kept in view.

#### **Course Outcomes:**

Student should be able to

| CO1 | Make use of the basic concepts of grammar and communication techniques.                          |  |  |  |  |  |
|-----|--|--|--|--|--|--|
| CO2 | Interpret positive feedback at various situations by using appropriate body                      |  |  |  |  |  |
|     | language.  |  |  |  |  |  |
| CO3 | Write letters circulars, memos, notices and reports to communicate.                              |  |  |  |  |  |
| CO4 | Apply proper communication technique to cope up with the challenges of the modern world.         |  |  |  |  |  |
| CO5 | Adopt appropriate approach to take instructions from seniors and pass it on to the subordinates. |  |  |  |  |  |

#### **Course Content Details:**

| Unit<br>No | Topics / Sub-topics  |
|------------|--|
| 1          | <b>Basics of Grammar:</b> Articles, Tense, Transformation of Sentences, Affirmative and negative, Interrogative and assertive, Exclamatory and assertive, Degrees of comparison, Direct indirect speech, Voice, Types of sentences |
| 2          | <b>Theory and methods of communication:</b> Meaning and definitions of communication, Elements of communication, Communication cycle, Methods of communication, verbal: Oral, Written, Non verbal: Body language ii) Visuals       |
| 3          | <b>Types and Barriers of communication:</b> Formal - upward, downward, vertical, horizontal, diagonal. Informal, grapevine, Barriers of communication: Mechanical, Physical, Language, Semantic, Psychological, Status             |
| 4          | <b>Application Letters:</b> Job application, Resume / CV / Bio-Data, Application for loan, (home loan, car loan, education loan)   |
| 5          | Business correspondence & Office drafting: Memorandum, notice, circular, Enquiry and quotation, Order and complaint  |
| 6          | <b>Report writing :</b> Need of report writing, Principles of effective report writing, Types of reports: Individual & committee report, Accident report Feasibility and survey report, Report on fall in sales and production     |

#### **Rationale:**

The subject is included under the category of science. The special feature of the subject is to develop the laboratory skill using principles of scientific phenomenon. This course will serve to satisfy the need of the technical student for his development in technical field. Deep thought is given while selecting the topics related to all programmes which will develop intellectual skills of the students. Ultimately the focus of the course is on psychomotor skill.

#### **Course Outcomes:**

After the completion of course, students will be able to

| CO1 | Know the physical quantities accurately, to measure using different instruments and to interpret the results from observations and calculations.  |
|-----|---|
| CO2 | Know the physical properties of the various materials that are used by the engineer and to understand the principle and laws of physics.  |
| CO3 | Know the basic facts in Physics viz, force, elasticity, viscosity, surface tension, waves<br>and light and to apply the knowledge to correlate the properties of materials, their<br>engineering uses and applications. |
| CO4 | Classify and develop laboratory skills including the use of variety of physics apparatus, the compilation of data, its interpretation and analysis.   |
| CO5 | Achieve refined presentation skills through the presentation of coherent and comprehensible written accounts of laboratory work.  |

| 1       | 1.1 Fundamental Physical quantities, examples.                                   |
|         | 1.2 Derived physical quantities, examples.                                       |
|         | 1.3 Definition and requirements of unit  |
|         | 1.4 System of units, C. G. S., M. K. S. and S. I. units.                         |
|         | 1.5 Rules to write the unit and conventions of units and numerical.              |
|         | 1.6 Error – Definition, types of errors and minimization of errors.              |
| 2       | Motions:   |
| 2       | <b>2.1 Linear motion</b> –Definition, equation of motions: v = u +at,            |
|         | $s = ut + \frac{1}{2}at^2$ , $v^2 = u^2 + 2as$ and numerical.                    |
|         | 2.2Periodic motions- a) Oscillatory motion, b) Vibratory motion, c) Spin motion, |
|         | d) S.H.M. (only definition and examples), e) Circular motion.                    |
|         | 2.3 Circular motion :  |
|         | a) Introduction of the terms: Time period, frequency, amplitude, wavelength,     |
|         | phase. Uniform circular motion, Radius vector, linear velocity, Angular          |
|         | velocity, Angular acceleration,  |
|         | b) Relation between linear velocity and angular Velocity, Radial or centripetal  |
|         | acceleration (derivation), Three equations of motion (no derivations)            |
|         | Centripetal and Centrifugal force, examples and applications.                    |
|         | c) Banking of Roads, its necessity and applications. Numericals based on the     |
|         | topic  |
|         | General Properties of Matter:  |
| 3       |  |
|         | 3.1 Elasticity:<br>3.1.1 Elastic plastic and rigid substances, their examples    |
|         | 3.1.2 Types of deformations  |
|         | 3.1.2 Types of deformations.   |
|         | 2.1.4 Hooko's Low and electic limit  |
|         | 3.1.5 Strass versus Strain curve when the wire is under continuously             |
|         | increasing stress wield point, breaking point                                    |
|         | 2.1.6 Marticles halfs we delta in the state of the state                         |
|         | 5.1.6 Young's Modulus, bulk modulus and modulus of rigidity –                    |
|         | Definition, explanation and numerical.   |

|   | 3.1.7 Factor of safety.   |
|---|---|
|   | 3.1.8 Applications of elasticity.   |
|   | 3.2 Viscosity :   |
|   | 3.2.1 Concept and Definition of viscosity, velocity gradient.                         |
|   | 3.2.2 Newton's law of viscosity, Co-efficient of viscosity, unit of viscosity         |
|   | 3.2.3 Stokes' law, terminal velocity, derivation of Stokes' formula.                  |
|   | 3.2.4 Streamline flow, turbulent flow, critical velocity, examples.                   |
|   | 3.2.5 Reynolds' number and its significance.  |
|   | 3.2.6 Applications of viscosity and numerical.  |
|   | 3.3 Surface Tension :   |
|   | 3.3.1 Concept of surface tension.   |
|   | 3.3.2 Adhesive and cohesive forces, examples.   |
|   | 3.3.3 Laplace's Molecular theory of surface tension                                   |
|   | 3.3.4 Angle of contact, its significance.   |
|   | 3.3.5 Expression for surface tension by capillary rise method.                        |
|   | 3.3.6 Effect of impurity and temperature.   |
|   | 3.3.7 Applications of surface tension.  |
|   | 3.3.8 Numericals.   |
| 4 | Sound and Acoustic :  |
|   | 4.1 Sound Waves :   |
|   | 4.1.1 Wave motion, types of waves – progressive, longitudinal and transverse waves.   |
|   | 4.1.2 Characteristics of longitudinal and transverse waves and comparison.            |
|   | 4.1.2 Free or natural vibrations and forced vibrations, resonance –                   |
|   | definition and examples.  |
|   | 4.1.3 Newton's formula for velocity of sound and Laplace's correction.                |
|   | 4.1.4 Effect of temperature , pressure & humidity on velocity of sound and numerical. |
|   | 4.1.5 Determination of velocity of sound by resonance method.                         |
|   | 4.2 Acoustics :   |
|   | 4.2.1 Definition of echo, reverberation, reverberation time and acoustic              |
|   | 4.2.2 Sabine's formula for reverberation time no (derivation)                         |
|   | 4.2.3 Factors affecting acoustics of sound.   |
|   | 4.2.4 Acoustical planning of building.  |
|   |   |

|   | Optics and Optical Fibers :   |
|---|---|
| 5 | 5.1 Optics :  |
|   | 5.1.1 Revision of reflection and refraction of light.                                 |
|   | 5.1.2 Laws of refraction, Snell's law.  |
|   | 5.1.3 Determination of refractive index.  |
|   | 5.1.4 Dispersion, dispersive power, Prism formula (no derivation)                     |
|   | 5.1.5 Critical angle, Total internal reflection. Examples and applications.           |
|   | 5.1.6 Numericals.   |
|   | 5.2 Optical Fibers :  |
|   | 5.2.1 Principle of propagation of light through optical fiber.                        |
|   | 5.2.2 Structure of optical fiber.   |
|   | 5.2.3 Concept of numerical aperture and acceptance angle (formula).                   |
|   | 5.2.4 Types of optical fiber.   |
|   | 5.2.5 Method of production of optical fiber.  |
|   | 5.2.6 Applications (electronics and medical) and comparison with electrical cable for |
|   | communication.  |
| 6 | Nanotechnology, Laser and Ultrasonic:   |
| 6 | 6.1 Nanotechnology :  |
|   | 6.1.1 Introduction to nanotechnology.   |
|   | 6.1.2 Definition of nanoscale, nanometer and nanoparticles, nanotechnology.           |
|   | 6.1.3 Definition and examples of nanostructured materials.                            |
|   | 6.1.4 Methods of production of nanomaterial-  |
|   | a. Top down approach.   |
|   | b. Bottom up approach.  |
|   | 6.1.5 Techniques for the measurement of nanoparticles.                                |
|   | 6.1.6 Applications of nanotechnology in different fields -                            |
|   | a. electronics, b. automobile, c. medical, d. textile, e. cosmetics,                  |
|   | e. environmental, f. space and defense.   |
|   | 6.2 LASER and Ultrasonic :  |
|   | a) LASER  |
|   | 6.2.1a) LASER introduction,   |
|   | 6.2.1b) Properties of laser,  |
|   | 6.2.1c) Spontaneous and stimulated emission,  |
|   | 6.2.1d) Population inversion, Optical pumping,  |
|   | 6.2.1e) Types of LASER, He-Ne Laser- construction and method of production.           |
|   | 6.2.1f) Applications of LASER.  |

| b) Ultrasonic:   |
|--|
| 6.2.2a) Ultrasonic waves and infrasonic waves.                         |
| 6.2.2b) Audible range of soundwave,                                    |
| 6.2.2c) Piezoelectric effect and magnetostriction effect.              |
| 6.2.2d) Methods for the production of ultrasonic wave (any one),       |
| 6.2.2e) Properties of ultrasonic wave.                                 |
| 6.2.2f) Applications for distance measurement, hidden flaws detection, |
| signaling, drilling holes, metal cutting.                              |

#### Suggested Specifications Table with Hours and Marks (Theory):

| Unit |  | Teaching | Distribution of Theory Marks |            |            |                |  |  |
|------|--|----------|------------------------------|------------|------------|----------------|--|--|
| No   | Topic Title                            | Hours    | R<br>Level                   | U<br>Level | A<br>Level | Total<br>Marks |  |  |
| 1    | Physical Measurements and Units        | 6        | 2                            | 2          | 4          | 8              |  |  |

**Legends:** R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy). *Notes: This specification table shall be treated as a general guideline and actual distribution of marks* 

may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.

#### List of experiments/Assignments:

#### (Minimum <u>TEN</u> experiments should be completed by each student)

| Sr.<br>No. | Unit | Experiment/Assignment  |   |  |  |  |  |
|------------|------|--|---|--|--|--|--|
| 1          | 1    | To measure the dimensions of given objects and to determine their volume using Vernier caliper.        | 2 |  |  |  |  |
| 2          | 1    | Γο measure the dimensions of given objects and to determine their volume using micrometer screw gauge. |   |  |  |  |  |
| 3          | 2    | To determine Acceleration due to gravity by simple pendulum  |   |  |  |  |  |
| 4          | 3    | To determine coefficient of viscosity of liquid by Stokes' method.                                     | 2 |  |  |  |  |
| 5          | 3    | To determine coefficient of viscosity of liquid by Poiseullie's method.                                | 2 |  |  |  |  |
| 6          | 3    | To determine the surface tension of liquid using capillary rise method.                                | 2 |  |  |  |  |
| 7          | 3    | To determine the Young's modulus of elasticity of wire using Young's apparatus.                        | 2 |  |  |  |  |
| 8          | 4    | To determinerefractive index by pin method.  | 2 |  |  |  |  |

| 9  | 4   | To determine refractive index by total internal reflection.       | 2  |
|----|-----|---|----|
| 10 | 4   | To determine refractive index using spectrometer                  | 2  |
| 11 | 5   | To determine velocity of sound by resonance method.               | 2  |
| 12 | 5   | To determine sound absorption coefficient of different materials. | 2  |
| 13 | 6   | Flaws detection using ultrasonic waves.                           | 2  |
| 14 | 6   | Experiments on LASER  | 2  |
| 15 | 6   | To plot the characteristics of photo cell.                        | 2  |
| 16 | All | Showing Video on different applications related to umits,         | 2  |
|    |     | Total   | 32 |

*Notes:* If possible videos should be shown on different topics- especially on topics – LASER, Ultrasonic, TIR, Refractive index and on spectra.

#### **Rationale:**

This subject is kept under the branch of science. This subject intends to teach student basic facts, concepts, principle and procedure of mathematic as a tool to analyze Engineering problems and as such lays down foundation for understanding the engineering and core technology subjects.

### **Course Outcomes:**

Student will be able to:

| CO1 | Identify the basic principles of of mathematics about the field analysis of any engineering problem. |
|-----|--|
| CO2 | Apply rules, concept and properties to solve the basic problems.                                     |
| CO3 | Establish the relation between two variables.  |

## **Course Content Details:**

| Unit | Topics / Sub topics  |  |  |  |  |  |  |
|------|--|--|--|--|--|--|--|
| No   | Topics / Sub-topics  |  |  |  |  |  |  |
|      | Logarithms:  |  |  |  |  |  |  |
| 1    | 1.1 Definition of logarithm(Natural and Common logarithm)                          |  |  |  |  |  |  |
|      | 1.2 Laws of logarithm  |  |  |  |  |  |  |
|      | 1.3 Change of base rule& simple examples based on laws.                            |  |  |  |  |  |  |
|      | 1.4 Application of concept.  |  |  |  |  |  |  |
|      | Determinants:  |  |  |  |  |  |  |
| 2    | 2.1 Definition of determinant  |  |  |  |  |  |  |
|      | 2.2 Expansion of determent of order 2&3  |  |  |  |  |  |  |
|      | 2.3 Crammer's rule to solve simultaneous equations in 3 unknowns                   |  |  |  |  |  |  |
|      | 2.4 Application of concept.  |  |  |  |  |  |  |
|      |  |  |  |  |  |  |  |
|      | Matrices:  |  |  |  |  |  |  |
| 3    | 3.1 Definition of a matrix of order m x n  |  |  |  |  |  |  |
|      | 3.2 Types of matrices  |  |  |  |  |  |  |
|      | 3.3 Algebra of matrices - equality, addition, subtraction, multiplication & scalar |  |  |  |  |  |  |
|      | multiplication.  |  |  |  |  |  |  |
|      | 3.4 Transpose of matrix.   |  |  |  |  |  |  |
|      | 3.5 Minor, co-factor of an element.  |  |  |  |  |  |  |

|   | 3.6 Ad   | 3.6 Adjoint & inverse of a matrix by adjoint method.           |  |  |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|--|--|--|--|
|   | 3.7 Sol  | ution of a simultaneous equations by matrix inversion method.  |  |  |  |  |  |  |  |  |  |
|   | 3.8 Application of concept.  |  |  |  |  |  |  |  |  |  |  |
| 4 | Trigonometry:  |  |  |  |  |  |  |  |  |  |  |
|   | 4.1 Trigonometric ratios of allied angles, compound angles, multiple |  |  |  |  |  |  |  |  |  |  |
|   | angles (2A, 3A), Sub multiple angles                                 |  |  |  |  |  |  |  |  |  |  |
|   | 4.2 H  | Factorization and De-factorization Formulae                    |  |  |  |  |  |  |  |  |  |
|   | 4.3 I  | nverse Circular function (definition and simple problems).     |  |  |  |  |  |  |  |  |  |
|   | Straight   | line:  |  |  |  |  |  |  |  |  |  |
|   | 5.1  | Slope & intercept of straight line.                            |  |  |  |  |  |  |  |  |  |
|   | 5.2  | Equation of straight line in slope point form, slope           |  |  |  |  |  |  |  |  |  |
|   | intercept form, two point form, two intercept form,                  |  |  |  |  |  |  |  |  |  |  |
|   | General equation of straight line.                                   |  |  |  |  |  |  |  |  |  |  |
| 5 | 5.3 Angle between 2 straight lines; condition of parallel &          |  |  |  |  |  |  |  |  |  |  |
|   | Perpendicular lines.   |  |  |  |  |  |  |  |  |  |  |
|   | 5.4  | Intersection of two lines.                                     |  |  |  |  |  |  |  |  |  |
|   | 5.5  | Length of perpendicular from a point on the line &             |  |  |  |  |  |  |  |  |  |
|   |  | Perpendicular distance between parallel lines.                 |  |  |  |  |  |  |  |  |  |
|   |  |  |  |  |  |  |  |  |  |  |  |
|   | Vectors:   |  |  |  |  |  |  |  |  |  |  |
| 6 | 6.1  | Definition of vector, position vector                          |  |  |  |  |  |  |  |  |  |
|   | 6.2  | Algebra of vectors(Equality, addition, subtraction and scalar  |  |  |  |  |  |  |  |  |  |
|   | multipl  | ication)   |  |  |  |  |  |  |  |  |  |
|   | 6.3  | Dot (Scalar) product & Vector (Cross) product with properties. |  |  |  |  |  |  |  |  |  |

# Suggested Specifications Table with Hours and Marks (Theory):

| Unit |               | Teaching | Distribution of Theory Marks |       |       |       |  |

## **Rationale:**

In day to day life we come across different structures and at times design of the structures analysis plays an important role. Perfect analysis is possible only when one knows the types and effect of forces acting on the structure. This subject provides knowledge about the different types of forces/loads and their effects while acting in different conditions/systems. It is a branch of Applied Science where laws of physics are applied to solve engineering problems. Broadly speaking Engineering Mechanics can be classified in two categories-Static and Dynamics. In this course, an attempt has been made to apply different laws of science to solve Statics and Dynamics problems. An attempt is also made to strengthen the knowledge of students, so as to make the path for applied technological subjects smoother and logical.

## **Course Outcomes:**

Student should be able to

| AM16 201.1 | Identify the different forces & its effects on objects, motion of bodies, and friction with applications. |
|------------|---|
| AM16 201.2 | Apply the principles of equilibrium to Engineering problems   |
| AM16 201.3 | Compare & analyze the simple machines   |
| AM16 201.4 | Interpret the concept of centroid and centre of gravity   |
| AM16 201.5 | Analyze and solve the rectilinear & circular motion, work, energy and power problems                      |

# **Course Content Details:**

| Unit<br>No | Topics / Sub-topics  |
|------------|--|
| 1          | Simple Machines:   |
|            | 1.1 Definitions and formulae, if any, of simple machine, compound machine, load,   |
|            | effort, mechanical advantage, velocity ratio, input of a machine, output of a      |
|            | machine, efficiency of a machine, ideal machine, ideal effort and ideal load, load |
|            | lost in friction, effort lost in friction  |

|   | 1.2 Analysis: Law of machine, maximum mechanical advantage and maximum                  |
|---|---|
|   | efficiency of a machine, reversibility of a machine, condition for reversibility of a   |
|   | machine, self locking machine.  |
|   | 1.3 Identification, use and velocity ratio for following simple machines :              |
|   | Simple axle and wheel, differential axle and wheel, Weston's differential pulley        |
|   | block, single purchase crab, double purchase crab, worm and worm wheel, geared          |
|   | pulley block, screw jack, calculation of mechanical advantage, efficiency               |
| 2 | Force systems:  |
|   | 2.1 Fundamentals and Force systems:   |
|   | Definitions of mechanics, Engineering mechanics, statics, dynamics, Kinetics,           |
|   | Kinematics, rigid body, classification of force system according to plane coplanar      |
|   | and non coplanar, sub classification of coplanar force system- collinear,               |
|   | concurrent, non concurrent, parallel, like parallel, unlike parallel, general etc.      |
|   | Definition of a force, S.I. unit of a force, representation of a force by vector and by |
|   | Bow's notation method. Characteristics of a force, effects of a force, principle of     |
|   | transmissibility.   |
|   | 2.2 Resolution of a force and Moment of a force:  |
|   | Definition, Method of resolution, along mutually perpendicular direction and along      |
|   | two given direction. Definition of moment, S. I. unit, classification of moments,       |
|   | sign convention, law of moments Varignon's theorem of moment and it's use,              |
|   | definition of couple, S.I. unit, properties of couple with example.                     |
| 3 | Composition of Forces:  |
|   | 3.1 Analytical method:  |
|   | Definition of Resultant force, methods of composition of forces, Law of                 |
|   | parallelogram of forces, Algebraic method for determination of resultant for            |
|   | concurrent and non concurrent, parallel coplanar force system.                          |
|   | 3.2 Graphical method:   |
|   | Space diagram, vector diagram, polar diagram, and funicular polygon. Resultant of       |
|   | concurrent and parallel force system only.  |
| 4 | Equilibrium:  |
|   | 4.1 Equilibrant and Lami's Theorem:   |
|   | Definition of equilibrant, relation between resultant and equilibrant, equilibrant of   |
|   | concurrent and non-concurrent force system. Analytical and graphical conditions         |

|   | of equilibrium for concurrent, non-concurrent and parallel force system, free body        |
|---|---|
|   | and free body diagram. Statement and explanation of Lami's theorem, Application           |
|   | of Lami's theorem for solving various engineering problems.                               |
| 5 | Friction:   |
|   | 5.1 Definition:   |
|   | Friction, limiting frictional force, coefficient of friction, angle of friction, angle of |
|   | repose, relation between angle of friction, angle of repose and coefficient of            |
|   | friction. Cone of friction, types of friction, laws of friction, advantages and           |
|   | disadvantages.  |
|   | 5.2 Equilibrium of body on Horizontal and inclined plane:                                 |
|   | Equilibrium of body on horizontal plane subjected to horizontal and inclined force.       |
|   | Equilibrium of body on inclined plane subjected to forces applied parallel to the         |
|   | plane only. Concept of ladder fraction.   |
| 6 | Centroid and Centre Of Gravity:   |
|   | 6.1 Centroid:   |
|   | Definition of centroid. Moment of an area about an axis. Centroid of basic                |
|   | geometrical figures such as square, rectangle, triangle, circle, semicircle and           |
|   | quarter circle. Centroid of composite figure with not more than three geometrical         |
|   | figures.  |
|   | 6.2 Center of gravity:  |
|   | Definition, center of gravity of simple solids such as cylinder, sphere, hemisphere,      |
|   | cone, cube, and rectangular block. Centre of gravity of composite solids with not         |
|   | more than Two simple solids. (Hollow solids are not expected.)                            |
| 7 | Dynamics  |
|   | 7.1 Rectilinear motion:   |
|   | Velocity, average velocity, uniform velocity, speed, displacement, acceleration,          |
|   | retardation, motion under uniform acceleration & V-T diagram                              |
|   | 7.2 Curvilinear motion:   |
|   | Simple circular motion, Angular displacement, Angular velocity, Angular                   |
|   | acceleration and retardation  |
|   | 7.3 Work, power & energy:   |
|   | Workdone, force-displacement diagram Workdone in stretching the compound                  |
|   | spring, Torque, workdone by torque.   |

I.H.P., B.H.P. of engine - Equation of H.P. in terms of torque and R.P.M. -Engineering Problems on it. Kinetic and potential energy & Engineering problems on it

### Simple numerical problems on all topics

## Suggested Specifications Table with Hours and Marks (Theory):

| Unit |                                | Teaching | Distribution of Theory Marks |       |       |       |  |
|------|--------------------------------|----------|------------------------------|-------|-------|-------|--|
| No   | Topic Title                    | Hours    | R                            | U     | Α     | Total |  |

#### Rationale:

C is the most widely used computer language, which is being taught as a core subject. C is general-purpose structural language that is powerful, efficient and compact, which combines features of high-level language and low-level language. It is closer to Man and Machine both. Due to this inherent flexibility and tolerance it is suitable for different development environments. Due to these powerful features C has not lost its importance and popularity in recently developed and advanced software industry, C can also be used for system level programming so to develop Operating System like application. C is still considered as first programming language.

This subject covers from the basic concept of C to the pointers and files in C. This subject will act as "Programming Concept developer" for students.

#### Course Outcomes:

Student should be able to

| CO1 | Understand the basic terminology used in computer programming      |   |
|-----|--|---|
| CO2 | Write, compile and debug programs in C language.                   |   |
| CO3 | Use different data types in a computer program.                    |   |
| CO4 | Design programs involving decision structures, loops and functions |   |
| CO5 | Implement concept of array, string, structure                      | - |
| CO6 | Understand Pointer and file handling                               | _ |

# **Course Content Details:**

| Unit No | Topics / Sub-topics   |
|---------|---|
| 1       | Introduction to C-Programming<br>Introduction, History of C,Features of C,Structured Programming concept, Data<br>type & expression, Character Set in C,Variable & data types, Primary & Secondary<br>data type, Arithmetic, Relational & Logical Operators, Constant & keywords<br>Operators & expressions, Hierarchy of operators, Data type conversion |
| 2       | Basic Input output<br>C program structure, Input and output using printf()and scanf(),character I/O   |

|   | Control Structure  |
|---|--|
| 3 | Decision making & branching, If Statement, If else statement, Nesting of if- else, |
|   | The switch statement, Ternary operator, Go to statement, While loop, Do while      |
|   | loop, For loop, Use of break and continue statements                               |
| 4 | Arrays and String  |
|   | One dimension, two dimension and multidimensional arrays, Array declaration        |
|   | Array initialization, Operation on array, String input/output, Array of strings    |
|   | Structures   |
| 5 | Basic Concept, Structure declaration, initialization, Structure within structure   |
|   | Array of Structure, Union  |
| 6 | Functions  |
|   | Concept of library functions String functions (comparison concatenation length)    |
| - | User-defined functions Local & global variables Parameter passing Storage          |
|   | classes  |
| 7 | Pointers   |
|   |  |
|   | Basic concept, Pointer & arrays, Pointer & functions, Pointer arithmetic           |
| 8 | File Management  |
|   | Basic concept Types of files: Text and Binary files Operations on file File        |
|   | functions  |

۰,

#### Rationale:

The inclusion of this course is need of the day. The technicians along with technology must learn the generic skills to be successful technician. The subject is included under the category of humanities. The role of subject is to make the student aware of its importance in the society to inform him/her about technical education system, the institute (library, various dept, curriculums etc.) to help him/her with essential etiquettes & manners.

#### Course Outcomes: Student should be able to,

| C01 | Identify his/her role in various areas of life.                    |
|-----|--|
| C02 | Know the various areas in technical education system.              |
| C03 | Know importance of curriculum, MIS, IS, etc                        |
| C04 | Exhibit his/her behavior in proper manner                          |
| C05 | Develop & adopt self study techniques.                             |
| C06 | Follow rules & regulation strictly & become a law abiding citizen. |

#### **Course Content Details:**

| Contents  |  |  |  |

#### **Rationale:**

Workshop practice is the backbone of the real industrial environment which helps to develop and enhance relevant technical hand skills required by the technician working in the various engineering industries and workshops. The knowledge of basic shops like Wood working, Fitting, Welding, Plumbing and Sheet Metal Shop is essential for technicians to perform their duties in industries. Irrespective of engineering stream, the use of workshop practices in day to day industrial as well domestic life helps to solve various minor but critical problems. Working in workshop develops the attitude of working in a group and the basis for safety awareness is created. This foundation course intends to impart basic know-how of various hand tools and their use in different sections of manufacturing. The students are advised to undergo each skill experience with remembrance, understanding and application with special emphasis on attitude of enquiry to know why and how for the various instructions and practices imparted to them in each shop. Furthermore the demonstration of CNC Machine will give feel of advancement in industry.

Course Outcomes: Student should be able to,

| CO1 | Lay-outing of shops & Sketching of jobs, tools & equipments.                          |
|-----|---|
| CO2 | Select appropriate tools, machinery, equipment and consumables for given application. |
| CO3 | Use & Operate hand tools, equipment and machinery in different shops.                 |
| CO4 | Prepare the simple jobs as per specification & drawing.                               |
| CO5 | Maintain workshop related tools, equipment and machineries.                           |

#### **Course Content Details:**

| Unit No | Topics / Sub-topics   |
|---------|---|
| 1       | <ul> <li>1.1 Introduction to workshop :-</li> <li>1.2 Workshop layout, Importance of various sections/shops of workshop, Types of jobs done in each shop.</li> <li>1.3 Causes of accidents, general safety rules and work procedure in workshop, Safety signs and symbols, First Aid.</li> <li>1.4 Fire, Causes of Fire, Basic ways of extinguishing the fire. Classification of fire, Firefighting equipment, fire extinguishers and their types.</li> <li>1.5 Issue and return system of tools, equipment and consumables.</li> </ul> |
| 2       | <ul> <li>Smithy and Forging:-</li> <li>2.1 Sketching, understanding the specifications, materials, various applications and methods used in Smithy and Forging shop along with use of tools like anvil, hammers, swage block, tongs, chisels, flatters etc;</li> </ul>  |

Approved Copy ordinator

WS16 201

|   |   | 2.2 Demonstration of Smithy and Forging operations like here it  |
|---|---|--|
|   |   | upsetting etc;   |
|   |   | 2.3 Preparation of smithy & forging job  |
|   |   | 2.4 Safety precautions & Personal Protective Equipments  |
|   |   | Carpentry Section:-  |
|   | 3 | 3.1 Types of woods and their applications  |
|   |   | 3.2 Types of carpentry hardware's and their uses   |
|   |   | 3.3. Sketching, understanding the specifications and it.   |
|   |   | methods used in Carpentry shop along with use of table 1   |
|   |   | chisels, hammers, pallet, marking gauge, vice, try square, rule, stars   |
|   |   | 3.4 Demonstration of carpentry operations such as marking sawing planning  |
|   | 1 | chiseling, grooving, boring, joining, etc;   |
| • |   | 3.5 Preparation of wooden joints.  |
|   |   | 3.6 Safety precautions & Personal Protective Equipments.   |
|   |   | Welding Section:-  |
|   | - | 4.1 Types, sketching, understanding the specifications, materials and applications of any f  |
|   |   | gas welding accessories and consumables.   |
|   |   | 4.2 Demonstration of metal joining operations like arc welding, soldering and broging  |
|   |   | Show effect of current and speed. Also demonstrate various welding positions   |
|   |   | 4.3 Demonstrate gas cutting operation.   |
| 1 |   | 4.4 Preparation of metal joints.   |
| F |   | 4.5 Safety precautions & Personal Protective Equipments.   |
|   | 5 | Fitting Section:-  |
|   | 5 | 5.7 Sketching, understanding the specifications, materials, various applications and   |
|   |   | methods used in fitting, marking, measuring, work holding, cutting & finishing tools   |
|   |   | 5.2 Demonstration of various fitting operations such as chipping, filing, scraping, grinding   |
|   |   | sawing, marking, drilling, tapping, etc;   |
|   |   | 5.3 Preparation of male- female joint.   |
| - |   | 3.4 Safety precautions & Personal Protective Equipments.   |
|   | 6 | Plumbing:-   |
|   | v | 6.7 Types, specification, material and applications of pipes.  |
|   |   | 6.2 Types, specifications, material, applications and demonstration of pipe fitting tools.   |
|   |   | beinonstration of pipe fitting operations such as marking, cutting, bending, threading   |
|   |   | A Tupos and and line in the second se |
|   |   | 6.5 Proposition of various spanners such as flat, fix, ring, box, adjustable, etc.   |
|   |   | 6.6 Concent and even   |
|   |   | 6.7 Safety processions of SWG and other gauges in use. Use of wire gauge.  |
| - |   | 5.7 Safety precautions & Personal Protective Equipments.   |
|   | 7 | Laine and CNC Operations:-   |
|   |   | ".1 working principle of lathe along with sketch and procedure for its general   |
|   |   | 7.2 Demonstration - CL - I   |
|   |   | chamfaring start of Lathe machine operation like plain turning, taper turning, threading   |
|   |   | 73 Simple ich demendering  |
|   |   | Simple job demonstration for a group on CNC Machine.   |
|   |   |  |
| _ |   |  |

| 1          |      | - Perform mock drill session in group of minimum 10 students for<br>Extinguishing fire.   | 06              |
| 2          | 2    | <ul> <li>Prepare job involving operations like bending, setting down, bulging,<br/>upsetting etc; e.g. Pegs (Square/round), Hook, Hammer tongue, Agro<br/>equipment etc (Individually)</li> </ul> | 12              |
| 3          | 3    | - Prepare two wooden joints as per given drawings. (Individually)   | 12              |
| 4          | 4    | - Prepare lap joint/butt joint using either arc / gas welding as per given drawing. (Individually)  | 12              |
| 5          | 5    | -Prepare one male-female type fitting job as per given drawings (Individually)  | 16              |
| 6          | 6    | - Demonstration of Lathe Machine & CNC machine operations.  | 06              |
|            |      | Total   | 64              |

SUGGESTED STUDENT ACTIVITIES: - List of proposed student activities like,

- a. Follow safety practices.
- b. Practice good housekeeping.
- c. Function as a team member.
- d. Maintain tools and equipment.
- e. Follow ethics & maintain discipline.
- f. Prepare work diary based on practical performed in workshop. Work diary consist of job drawing, operations to be performed, required raw materials, tools, equipments, date of performance with signature of the teacher.
- **g.** Prepare journals consisting of free hand sketches of tools and equipments in each shop, detail specifications and precautions to be observed while using tools and equipments.
- h. Prepare/Download specifications of followings: a) various tools and equipment in various shops.
  b) Precision equipment in workshop c) Various machineries in workshop.
- i. Undertake a market survey of local dealers for procurement of workshop tools, equipment machineries and raw material.
- j. Visit any fabrication/wood working/sheet metal/forging workshop and prepare a report.

#### Rationale

The aim of the subject is to teach the basic working of Electronic and computer components .The students will be able to select the proper peripheral as per their specification and requirement. The subject is practical oriented and its will help to student identify Electronic and Computer Components.

#### **Course Outcomes:**

| COI | Identify and test various electronic components. |  |
|-----|--|--|
| CO2 | Handle different electronic instruments          |  |
| CO3 | Identify computer peripherals.                   |  |
| CO4 | Interface peripherals with computer system.      |  |

#### Rationale :

The programme aims to inculcate social <u>welfare</u> in students, and to provide service to society without bias. NSS volunteers work to ensure that everyone who is needy gets help to enhance their <u>standard of living</u> and lead a life of dignity. In doing so, volunteers learn from people in villages how to lead a good life despite a scarcity of resources, it also provides help in natural and man-made disasters by providing food, clothing and first aid to the disaster victims.

#### Course Outcomes:

After the completion of the course student will be able to

| COl | Understand the community in which they work & themselves in relation to<br>their community  |
|-----|---|
| CO2 | Identify the needs and problems of the community and involve them in<br>problem-solving. Acquire leadership qualities and democratic attitudes. |
| CO3 | Develop sense of social and civic responsibility, gain skills in mobilizing<br>community.   |
| CO4 | Develop capacity to meet emergencies and natural disasters and practice<br>national integration and social harmony                              |

#### **Course Content Details:**

#### **Rationale:**

Teenage is that period of our life when we are stuck between school, exams, sports, tuition and many other activities which result in our mental and health disorders. Adolescence is an important time for the development of mental health. Nowadays student's life revolves around academic activities, assignment help, to score good grades in the examination, performing better at the workplace and a lot of other hectic activities. They don't get much time for themselves or to relax their mind. To get first in the race of life, they lack somewhere behind and alleviate more and more stress for themselves. Yoga and meditation directly helps in contributing to improve mental focus and concentration among students. Yoga soothes our mind and body and helps to eliminate social and academic stress from students. Breath and movement combine yoga which helps in soothing cramped and jammed bodies. It also helps students in proper concentration while completing assignments and day to day work.

# **Course Outcomes:**

Student should be able to

|            | Psychomotor Outcomes:  |
|------------|--|
|            | 1) Demonstrate proficiency at the poses covered in class (at a basic level)    |
| COL        | 2) Increase their dynamic flexibility  |
| 001        | 3) Apply forces and exert themselves using rarely used muscle groups           |
|            | 4) Perform proper breathing techniques   |
|            | 5) Perform each difficult pose to the greatest extent of their ability         |
|            | Cognitive Outcomes:  |
|            | 1) Identify poses using the sanskrit name                                      |
| CO2        | 2) Categorize poses from a list by increasing level of difficulty              |
|            | 3) Sequence three poses according to a practice                                |
|            | 4) List the correct progressions into a given pose                             |
|            | 5) Identify some of the major muscles used in any given pose                   |
|            | Affective/Social Outcomes:   |
|            | 1) Work quietly without disturbing classmates                                  |
| <b>GO2</b> | 2) Fun participating in the activity   |
| 03         | 3) Motivated to continue the activity outside of class                         |
|            | 4) Assist a partner when called upon to help them with poses                   |
|            | 5) Develop a greater sense of body self esteem and appreciation for the art of |
|            | yoga   |

#### **Rationale:**

The medium of instruction in the technological field is English, so it is necessary for the students of Engineering and Technology to learn and express through English language. These students are the future technicians, must be able to face the interview, handle the questions and present them in a proper way, acquire confidence to participate in the group discussion, introduced with the modern communication technology and be able to use these Medias for effective communication.

#### **Course Outcomes:**

Student should be able to

| CO1 | Develop the ability of listening and conversation skills.               |
|-----|---|
| CO2 | Learn the social etiquettes and manners.                                |
| CO3 | Acquire the practical knowledge of interview.                           |
| CO4 | Participate in group discussion.  |
| CO5 | Identify the need of public speech and new techniques of communication. |
| CO6 | Enable the students to be a good team leader                            |

### **Course Content Details:**

| Unit<br>No | Topics / Sub-topics   |
|------------|---|
|            | Listening Skills : Importance of good listening, Types of listening, Effective  |
| 1          | listening, How to overcome the obstacles in good listening  |
|            | Social etiquettes : Business ethics, Telephone / Mobile etiquettes, E-mail  |
| 2          | etiquettes, Table manners & respect, Small talk and punctuality   |
| 3          | <b>Conversation skills :</b> How to begin the conversation, Proper use of body language, Tone, voice and pauses, Use of proper grammar and words, How to end the conversation |
| 4          | Interview Skills : Introduction, Types of Interview, Preparing for an interview,  |
|            | Mock interview  |

|   | Group Discussion : Need and importance of group discussion, Emotional          |
|---|--|
| 5 | stability, Communication with knowledge, Logical conclusion, Role of moderator |
|   | in the group discussion  |
| 6 | Public Speech : Welcome Speech, Farewell Speech, Guest's introduction, Vote of |
|   | thanks   |

| Sr.<br>No. | Unit | Experiment/Assignment   |    |  |  |
|------------|------|---|----|--|--|
| 1          | 1    | Development of listening skills.  | 02 |  |  |
| 2          | 1    | Feacher will read out a passage thrice. And the students will listen carefully following the guidelines and answer the questions. |    |  |  |
| 3          | 2    | Presentation of conversation on telephone / mobile (2 students)   |    |  |  |
| 4          | 2    | Presentation of table manners and etiquettes.   | 04 |  |  |
| 5          | 3    | Conversation on the given situation   | 04 |  |  |
| 6          | 4    | Mock interview (6 students)   | 04 |  |  |
| 7          | 5    | Group Discussion (6 students + 1 moderator)   | 04 |  |  |
| 8          | 6    | Public speech   | 01 |  |  |
| 9          | 6    | Presentation of welcome and farewell speech   | 02 |  |  |
| 10         | 6    | Guest's introduction speech and vote of thanks  | 02 |  |  |
|            |      | Total   | 32 |  |  |

#### **Rationale:**

The study of mathematics is necessary to develop in the student, the skills essential for Studying engineering subjects. The subject is an extension of basic mathematics of first semester, which is a pre requisite, for engineering studies.

#### **Course Outcomes:**

#### Student will be able to:

| CO1 | Define the basic principles of function, limits, derivatives, complex number and relations between two variables. |
|-----|---|
| CO2 | Apply rules, concept and properties to solve the problems.  |
| CO3 | Classify various types of statistical data.   |

#### **Course Content Details:**

| Unit No | Topics / Sub-topics   |  |  |  |  |  |  |  |
|---------|---|--|--|--|--|--|--|--|
| 1       | 1. <i>Function</i><br>1.1 Concept of function, domain and range,                      |  |  |  |  |  |  |  |
|         | 1.2 Type of functions (Only definitions).   |  |  |  |  |  |  |  |
|         | 2. <u>Limit</u>   |  |  |  |  |  |  |  |
| 2       | 2.1 Concept of limit  |  |  |  |  |  |  |  |
|         | 2.2 Limit of Algebraic, Trigonometric, Logarithmic and                                |  |  |  |  |  |  |  |
|         | Exponential functions with simple example.  |  |  |  |  |  |  |  |
|         | 3 <u>. Derivatives</u>  |  |  |  |  |  |  |  |
| 3       | 3.1 Definition of the derivative.   |  |  |  |  |  |  |  |
|         | 3.2 Derivatives of standard function.( No proof by first principle)                   |  |  |  |  |  |  |  |
|         | 3.3 Differentiation of sum, difference, product and quotient of two or more functions |  |  |  |  |  |  |  |
|         | 3.4 Differentiation of composite, inverse, implicit, parametric, exponential          |  |  |  |  |  |  |  |
|         | and logarithmic functions with simple example.  |  |  |  |  |  |  |  |
|         | <b>3.5</b> Second order derivative.   |  |  |  |  |  |  |  |
| 4       | 4 <u>APPLICATION OF DERIVATIVES</u>   |  |  |  |  |  |  |  |
|         | 4.1 Geometrical meaning of derivative   |  |  |  |  |  |  |  |
|         | 4.2 Tangents & Normals to the curve,  |  |  |  |  |  |  |  |
|         | 4.3 Maxima & minima of the functions  |  |  |  |  |  |  |  |
|         | 4.4 Radius of Curvature.  |  |  |  |  |  |  |  |

| r        |  |  |  |  |  |  |  |  |
|----------|--|--|--|--|--|--|--|--|
|          | 5. <u>STATISTICS</u>   |  |  |  |  |  |  |  |
|          | 5.1 Basic definitions-raw data, variate, frequency, cumulative frequency |  |  |  |  |  |  |  |
|          | 5.2 Classification of data class interval mid value length of the        |  |  |  |  |  |  |  |
|          | j.2 Classification of data, class incrival, initia variac, length of the |  |  |  |  |  |  |  |
| _        | interval   |  |  |  |  |  |  |  |
| 5        | 5.3 Measure of central tendency – (mean, median & mode)                  |  |  |  |  |  |  |  |
|          | 5.4 Mean deviation, Standard deviation, Coefficient of variance          |  |  |  |  |  |  |  |
|          |  |  |  |  |  |  |  |  |
| 6        | 6 <u>Complex number</u>  |  |  |  |  |  |  |  |
|          | 6.1 Definition & Algebra of complex numbers                              |  |  |  |  |  |  |  |
|          | 6.2 Geometrical representation of complex number                         |  |  |  |  |  |  |  |
|          | 6.3 Modulus & amplitude of complex number                                |  |  |  |  |  |  |  |
|          | 6.4 Polar form of complex number   |  |  |  |  |  |  |  |
|          | 6.5 De moivre's theorem (no proof) roots of complex number               |  |  |  |  |  |  |  |
|          | 6.6 Exponential form of complex number. Circular &                       |  |  |  |  |  |  |  |
|          | Hyperbolic functions of complex numbers, relation between                |  |  |  |  |  |  |  |
|          | Circular & Hyperbolic functions real & imaginary parts of                |  |  |  |  |  |  |  |
|          | Circular & Hyperbolic functions  |  |  |  |  |  |  |  |
|          | chedial & Hyperbolie functions   |  |  |  |  |  |  |  |
| 7        | 7. Numerical Analysis  |  |  |  |  |  |  |  |
|          | 7.1 Solution of Algebraic equations using –                              |  |  |  |  |  |  |  |
|          | i) Bisectional method ii) Regular – Falsi method,                        |  |  |  |  |  |  |  |
|          | iii) Newton- Raphson method  |  |  |  |  |  |  |  |
|          | 7.2 Solution of simultaneous equation                                    |  |  |  |  |  |  |  |
|          | (i) Gauss elimination method   |  |  |  |  |  |  |  |
|          | (ii) Jacobi's method (iii) Gauss-Seidal method                           |  |  |  |  |  |  |  |

### **Rationale:**

The subject is offered as one of the foundation subjects as it belongs to the category of basic sciences. The subject helps to understand and select different materials, their compositions, their properties and uses. The subject helps in reinforcing basic knowledge gained by students to apply and solve day to day problems related to the various engineering fields. This will provide input for better understanding of other foundation and technology subjects.

#### **Course Outcomes:** Student should be able to:

| CO1 | Identify and classify various materials used by them.                                  |
|-----|--|
| CO2 | Select suitable substance, metal/alloy for a particular use.                           |
| CO3 | Adopt methods of safety and precaution to aid preventive measures.                     |
| CO4 | Develop problem solving attitude towards given problems related to the field of study. |
| CO5 | Apply acquired knowledge to solve core engineering and technological problems.         |

#### **Course Content Details:**

| Unit<br>No | Topics / Sub-topics   |
|------------|---|
| 1          | Atomic structure  |
|            | 1.1 Introduction of atom, Fundamental Particles, Proton, Neutron, Electron; their |
|            | mass, charge, location. and symbol  |
|            | 1.2 Atomic number and atomic mass number. (Definition, symbol,                    |
|            | fundamental nature, difference between. Atomic no. and atomic mass no.)           |
|            | Numerical based on atomic number & atomic mass number. Orbits, Orbital,           |
|            | quantum no. and their significance  |
|            | 1.3 Rules governing filling up of atomic orbitals, Aufbau's Principle, Pauli's    |
|            | exclusion principle, Hund's rule. Electronic configuration of inert gases.        |
|            | Electronic configuration of atoms up to atomic number 20, Isotopes and            |
|            | isobars and their differences, etc.   |

|   | 1.4 Valency and chemical bonding.   |
|---|---|
|   | Valency: Definition, & examples.  |
|   | Types of valency: Electro valency & co-valency Examples.                              |
|   | 1.5 Electrovalent bond: Definition, Formation, examples.                              |
|   | Formation of NaCl, MgCl <sub>2</sub> , MgO,CaCl <sub>2</sub> ,CaO,Alcl <sub>3</sub> . |
|   | 1.6 Co-valent bond : Definition & formation   |
|   | Formation of following molecules  |
|   | Single bond : Hydrogen, Chlorine, Water, Ammonia, Hydrogen Chloride,                  |
|   | Methane.  |
|   | Double bond : Oxygen, Carbon dioxide, Ethylene.                                       |
|   | Triple Bond : Nitrogen, Acetylene.  |
|   | 1.7 Distinction between electrovalent and covalent compounds.                         |
| 2 | Electrochemistry  |
|   | 2.1 Definition of Electrochemistry, Electrolytes: Definition, Types.                  |
|   | Differences between Atom and ion. Definition of ionization & electrolytic             |
|   | dissociation, Arrhenius theory, Degree of ionization with factors affecting it.       |
|   | 2.2 Terms related to Electrolysis (resistance, conductance, potential difference,     |
|   | their units)  |
|   | Mechanism of electrolysis. Examples of: mechanism of electrolysis of NaCl             |
|   | in fused & in aqueous state, electrolysis of CuSo4 using Cu and Pt electrodes.        |
|   | 2.3 Faradays First law of electrolysis and its mathematical derivation.               |
|   | Faradays second law of electrolysis& its mathematical derivation, Numerical           |
|   | based on laws of Faraday.   |
|   | 2.4 Application of Electrolysis, electro- refining, Electroplating.                   |
|   | 2.5 PH value : Definition ,Formula, PH scale, its salient                             |
|   | Features, Numerical based on PH, Applications of PH related to Engg. field.           |
|   | (Corrosion of bridges, Electroplating Sewage treatment, City water supply).           |
|   | CASE STUDY RELATED TO PH/ ELECTROLYSIS PROCESS  |
| 3 | Cells and batteries   |
|   | 3.1 Conductors: Definition, types (Metallic & Electrolytic) Difference between        |
|   | the two,  |
|   | 3.2 Ohm's law, charge & discharge of cells, closed circuit voltage, open circuit      |
|   | voltage, Electrochemical couple, separator, electromotive force (EMF),                |

|   | 3.3 Cells Definition, types (Electrolytic & Electrochemical ), differences between |  |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|--|--|
|   | them   |  |  |  |  |  |  |  |  |
|   | 3.4 Classification of electrochemical cell (Primary & secondary cells)             |  |  |  |  |  |  |  |  |
|   | Definition & Difference between the two.   |  |  |  |  |  |  |  |  |
|   | 3.5 Primary cells: Lac lance cells, Dry cells, Daniel cells.                       |  |  |  |  |  |  |  |  |
|   | 3.6 Secondary cells: Lead acid storage cell (Construction working charging &       |  |  |  |  |  |  |  |  |
|   | discharging)   |  |  |  |  |  |  |  |  |
|   | Nickel- cadmium cell (Construction working charging & discharging)                 |  |  |  |  |  |  |  |  |
|   | Battery : Definition, Example  |  |  |  |  |  |  |  |  |
|   | CASE STUDY: PRIMARY CELLS/ SECONDARY CELLS   |  |  |  |  |  |  |  |  |
| 4 | Metallurgy & alloys  |  |  |  |  |  |  |  |  |
|   | 4.1 Metals & their characteristics, (hardness, ductility, malleability, toughness, |  |  |  |  |  |  |  |  |
|   | brittleness, tensile strength, weldability, casting, forging, soldering)           |  |  |  |  |  |  |  |  |
|   | Occurrence of metals (native state and combined state, examples),                  |  |  |  |  |  |  |  |  |
|   | definition of Mineral, Ore, Gangue, Flux, Slag, Metallurgy.                        |  |  |  |  |  |  |  |  |
|   | 4.2 Process of extraction of metal from ore i.e                                    |  |  |  |  |  |  |  |  |
|   | Flowchart of metallurgy.   |  |  |  |  |  |  |  |  |
|   | Different steps of metallurgy.   |  |  |  |  |  |  |  |  |
|   | A) Grinding and pulverization  |  |  |  |  |  |  |  |  |
|   | B) Concentration ( definition)   |  |  |  |  |  |  |  |  |
|   | a. Physical method (to be taught in detail)  |  |  |  |  |  |  |  |  |
|   | • Gravity separation   |  |  |  |  |  |  |  |  |
|   | Magnetic separation  |  |  |  |  |  |  |  |  |
|   | • Froth floatation   |  |  |  |  |  |  |  |  |
|   | b. Chemical method   |  |  |  |  |  |  |  |  |
|   | Calcination  |  |  |  |  |  |  |  |  |
|   | • Roasting (difference between the two)  |  |  |  |  |  |  |  |  |
|   | C) Reduction by  |  |  |  |  |  |  |  |  |
|   | a. Smelting (in detail: definition, diagram, description and zones                 |  |  |  |  |  |  |  |  |
|   | of blast furnace, products of blast furnace)                                       |  |  |  |  |  |  |  |  |
|   | b. Aluminothermic (only definition)  |  |  |  |  |  |  |  |  |
|   | c. Electrolysis ( only definition)   |  |  |  |  |  |  |  |  |
|   | D) Refining:   |  |  |  |  |  |  |  |  |

|   | Definition and Name of different methods (Poling, Liquation,                     |  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|--|
|   | Distillation, electro-refining)  |  |  |  |  |  |  |  |
|   | 4.3 Important ores of iron, Copper, Zinc, Aluminum,                              |  |  |  |  |  |  |  |
|   | 4.4 Physical properties and uses of some metals along with                       |  |  |  |  |  |  |  |
|   | chemical properties Ex :- Fe, Cu, Al, Cr, Ni, Sn, Pb.                            |  |  |  |  |  |  |  |
|   | Zn. Co. Ag. W  |  |  |  |  |  |  |  |
|   | 4.5 Definition of alloy: purposes of preparation of Alloy.                       |  |  |  |  |  |  |  |
|   | Preparation of binary alloy by fusion method                                     |  |  |  |  |  |  |  |
|   | 4.6 Some useful alloys : composition, properties and uses                        |  |  |  |  |  |  |  |
|   | 1 Brass  |  |  |  |  |  |  |  |
|   | 2. Duralumin   |  |  |  |  |  |  |  |
|   | 3. Solder: Wood's metal  |  |  |  |  |  |  |  |
|   | 4. Babbit metal.   |  |  |  |  |  |  |  |
|   | ACTIVITY: PREPARATION OF METALLURGY FLOWCHARTS /                                 |  |  |  |  |  |  |  |
|   | VAROUS METHODS OF CONCENTRATION  |  |  |  |  |  |  |  |
| 5 | Semiconductors & Insulators  |  |  |  |  |  |  |  |
|   | 5.1. Semiconductors: Definition, Example, properties & uses of silicon &         |  |  |  |  |  |  |  |
|   | Germanium, formation of semiconductor.   |  |  |  |  |  |  |  |
|   | <b>5.2</b> .Insulators : Definition, Example: air; silicone fluids : Definition, |  |  |  |  |  |  |  |
|   | Example, properties & uses   |  |  |  |  |  |  |  |
|   | 5.3 Superconductors: Definition, Example, properties & uses.                     |  |  |  |  |  |  |  |
| 6 | Corrosion.   |  |  |  |  |  |  |  |
|   | 6.1 Definition of corrosion, Types of corrosion ( Atmospheric &                  |  |  |  |  |  |  |  |
|   | Electrochemical Corrosion)   |  |  |  |  |  |  |  |
|   | 6.2 Mechanism of atmospheric corrosion, types of oxides formed, (stable,         |  |  |  |  |  |  |  |
|   | unstable, volatile, with examples), factors affecting atmospheric                |  |  |  |  |  |  |  |
|   | corrosion.   |  |  |  |  |  |  |  |
|   | 6.3 Electrochemical corrosion / immersed corrosion                               |  |  |  |  |  |  |  |
|   | • Definition, types of cells formed (galvanic cells & concentration cells,       |  |  |  |  |  |  |  |
|   | examples of both cell formations).   |  |  |  |  |  |  |  |
|   | Mechanism of immersed /electrochemical corrosion (hydrogen                       |  |  |  |  |  |  |  |
|   | evolution mechanism & oxygen absorption mechanism, diagram,                      |  |  |  |  |  |  |  |
|   | explanation and chemical equations of both mechanisms).                          |  |  |  |  |  |  |  |

|   | • Factors affecting immersed corrosion (Ph value, hydrogen over voltage,         |
|---|--|
|   | solubility of corrosion products, irregularities on surface, etc.)               |
|   | 6.4 Protection of metals from Corrosion :- only definition:                      |
|   | i. purification of metals  |
|   | ii. alloy formation  |
|   | iii. cathodic protection   |
|   | iv. controlling external conditions  |
|   | v. protective coatings   |
|   | a) organic coating(by paints and varnishes),                                     |
|   | b) inorganic coating (metallic oxides)   |
|   | c) metallic coating (detail)   |
|   | 6.5 Protective metallic coatings (definition, process, application, diagram)     |
|   | a. hot dipping(galvanizing & tinning)  |
|   | b. sherardizing  |
|   | c. metal spraying  |
|   | ACTIVITY : VIEWING THE PROCESSES DESCRIBED ABOVE                                 |
| 7 | Lubricants   |
|   | 7.1 Definition of lubricant, example, various functions of a lubricant,          |
|   | classification of lubricants (solid, semi-solid and liquid) examples, conditions |
|   | under which each lubricant is used.  |
|   | 7.2 Lubrication: definition and types.   |
|   | Types of lubrications: (Definition, diagram & description of each type.)         |
|   | • Fluid film   |
|   | • Boundary,  |
|   | • Extreme pressure lubrication.  |
|   | 7.3 Characteristic of good lubricants, requirements of an ideal lubricant        |
|   | A) Physical Characteristics  |
|   | • Viscosity  |
|   | • Viscosity index  |
|   | • Oiliness   |
| 1 |  |
|   | • Volatility   |

|   | Flash point & Fire Point  |
|---|---|
|   | Cloud and Pour point  |
|   | B) Chemical Characteristics   |
|   | <ul> <li>Acidity /Neutralization no.</li> </ul>                                 |
|   | • Emulsification  |
|   | Saponification value  |
|   | 7.4 Selection of lubricant for a particular machine depending upon its working  |
|   | condition (Table showing machines, their working condition, nature of lubricant |
|   | needed, type of lubrication used).  |
|   | ACTIVITY: SELECTION OF LUBRICANT BASED ON NATURE OF MACHINE                     |
| 8 | Engineering. Materials  |
|   | 8.1 Plastic   |
|   | • definition, example   |
|   | Polymerization: definition different methods of Polymerization                  |
|   | addition and condensation.  |
|   | • Addition polymerization : definition formation of polyethylene                |
|   | Polytetrafluoroethylene PVC, polystyrene etc.,                                  |
|   | Condensation-polymerization: definition and examples (formation                 |
|   | Of Bakelite, nylon-66 etc).   |
|   | • Types of plastic: thermosoftening ,thermosetting plastics,                    |
|   | Differences between them.   |
|   | • Compounding of plastic, Materials needed for it (pigments, fillers,           |
|   | Plasticizers accelerators etc.,)  |
|   | Properties and engineering applications   |
|   | 8.2 Rubber :  |
|   | • Definition of rubber (elastomer).   |
|   | • Natural rubber : Basic unit in natural rubber(isoprene)                       |
|   | • Occurrence & Processing of Latex .Limitations of natural rubber,              |
|   | • Vulcanization Of rubber: Definition. process, examples                        |
|   | • Synthetic rubber: need for it, various examples (Buna-S, Buna –N,             |
|   | Thiokol, neoprene, butyl rubber)  |

| • Properties of rubber (elasticity, tack, shock absorbance, rebound, tensile strength, related uses) |
|--|
| 8.3 Insulators (definition, examples)  |
| • Teflon(PTFE): Preparation, Properties and uses   |
| Ceramics : properties and uses   |
| 8.4 Adhesives  |
| • Phenol Formaldehyde resin : Preparation, Properties, Uses  |
| • Urea Formaldehyde resin : Preparation, Properties, Uses  |
| • Epoxy resin : Properties, Uses   |
| 8.5 Conducting Polymers : Properties, Uses   |
| 8.6 Liquid Crystal Polymers : Properties, Uses   |
| 8.7 XLPE Cross polyethylene: Properties, Uses  |

| Unit |                                | Teaching<br>Hours | Distribution of Theory Marks |            |            |                |

Suggested Specifications Table with Hours and Marks (Theory):

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

Notes: This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.

# List of experiments/Assignments: (any 12 experiments)

**RATIONALE :** The Diploma Course in Electrical Engineering mainly involves the study of Electrical machines, equipments and instruments. In order to understand the working principle, construction, operation and applications of the various Electrical machines, equipments and instruments; the basic concepts, rules and laws of Electrical and Magnetic Circuits must be studied and understood by the students of Electrical Engineering Course. This subject will help the students to study, understand and comprehend the fundamentals of various facts, the basic concepts, rules and laws of Electric Circuits.

#### **Course Outcomes :**

Student should be able to

| CO1 | Find out effect of current in different application.                       |
|-----|--|
| CO2 | Find out the current and voltages in series or parallel connected circuit. |
| CO3 | Demonstrate the mutually induced emf. With direction.                      |
| CO4 | Connect storage batteries to increase voltage level or current level.      |

#### **Course Content Details:**

| Ch.No. | Topics / Sub-topics   |  |  |  |
|--------|---|--|--|--|
|        | Basic Concepts:   |  |  |  |
| 1      | 1.1 Concept of Electric Current.  |  |  |  |
|        | 1.2 Concept of Electric Potential, Potential Difference (P D) and Electro-Motive- |  |  |  |
|        | Force (EMF).  |  |  |  |
|        | 1.3 Concept of Resistance, - Laws of Resistance, - Concept of Resistivity and     |  |  |  |
|        | Conductivity, - Effect of Temperature on Resistance, Temp. co-efficient of        |  |  |  |
|        | Resistance (simple numerical)   |  |  |  |
|        | 1.4 Classification of Electric Current: -Direct Current (DC)-Alternating          |  |  |  |
|        | Current(AC)   |  |  |  |
|        | 1.5 Sources of Electric Current (DC)  |  |  |  |
|        | - Concept of Voltage Source: Ideal and Practical                                  |  |  |  |
|        | - Concept of Current Source: Ideal and Practical                                  |  |  |  |
|        | - Source Conversion. (simple numerical)   |  |  |  |
|        | 1.6 Effects of Electric Current Heating Effect, Magnetic Effect, Chemical Effect  |  |  |  |
|        | with applications 1.7 Concept of Electrical Work, Power and Energy. Their SI      |  |  |  |
|        | units (simple numerical)  |  |  |  |
|        | 1.8 Types of Resistors and their Applications.                                    |  |  |  |
|        | - Carbon Composition  |  |  |  |

|   | - Deposited Carbon   |
|---|--|
|   | - High Voltage Ink Film  |
|   | - Metal Film   |
|   | - Metal Glaze  |
|   | 1.14. Wire Wound - Cermet  |
|   | D.C. Circuits:   |
| 2 | 2.1 Ohm's Law Concept of Voltage drop and Terminal Voltage   |
| 2 | 2.1 Ohin's Edw, Concept of Voltage drop and Terminar Voltage.  |
|   | 2.3 Resistance in Parallel Current Division Formula (Simple Numerical)   |
|   | 2.4 Calculations of Equivalent Resistance of simple Series Parallel and Series   |
|   | Parallal Circuits (Simple Numerical)   |
|   | 2.5 Duality Between Series and Parallel Circuits   |
|   | 2.5 Duality Detween Series and Farance Circuits.   |
|   | 2.0 Definitions of terms Related to Electric Circuits, Circuit Farameters, Elifeat   |
|   | Dessive Network Active Network Nede Brench Leon Mech   |
|   | Passive Network, Active Network, Node, Dranch, Loop, Mesh.   |
|   | 2.7 Kitchioff's Current Low  |
|   | - Kirchhoff's Valtage Law  |
|   | - Kitchiloff S Voltage Law   |
|   | (Simple Numerical with maximum two equations)  |
|   | Capacitors:  |
| 3 | Madium Coulomba Laura of algotrostation Electric Eigld Electrostatic induction   |
|   | Floatric Elux, Electric flux Density, electric notantial & energy potential  |

|   | Difference, Breakdown voltage & dielectric strength.   |
|   | 3.2 Concept and Definition of Capacitor  |
|   | J.5 Parallel Plate Capacitor:  |
|   | - Omiorin Di-electric Medium<br>Madium Darthy Air  |
|   | - Medium Party Air.  |
|   | - Composite Medium. (Simple Numerical)   |
|   | 3.4 Capacitors in Series, Capacitors in Parallel   |
|   | 5.5 Calculations of Equivalent Capacitance of simple Series, Parallel and Series   |
|   | Parallel Combinations of Capacitors. (Simple Numerical)  |
|   | 3.6 Energy Stored in Capacitor. (No Derivation only Simple Numerical)  |
|   | 3.7 Charging and Discharging of Capacitor(No Derivation only Simple Numerical)   |
|   | 3.8 Types of Capacitors and their Applications. Electrolytic, Non-Electrolytic   |
|   | (Paper, Mica, Plastic)   |
|   | Magnetic Circuits:   |
| 4 | 4.1 Magnetishi: Absolute and Relative Permeabilities of a Medium, Laws of Magnetic Force Magnetic field, strength, Elvy, & Elvy, Density |
|   | Magnetic Force, Magnetic field strength, Flux & Flux Density.  |
|   | 4.2 Magnetic Circuit - Onin's law of Magnetic Circuit.   |
|   | 4.5 Definitions Concerning Magnetic Circuit.   |
|   | - Magneto-Mourve-Force (MMIF), Ampere Turns (AT), Refuctance, Permeance,   |
|   | A 4 Comparison Batwaan Electric and Magnetic siravit   |
|   | 4.4 Comparison Derween Electric and Magnetic Circuit.  |
|   | 4.5 Composite Series Magnetic Circuit.   |
|   | 4.0 Farance Magnetic Uncult.   |
|   | 4.7 Calculations of Amp1 urns for simple Series, (Simple Numerical)  |
|   | 4.0 Mognetization Currie (D. 11 Currie)  |
|   | 4.9 Wagnetisation Curve (B - H Curve)<br>Magnetisation Curve for Magnetic and New Magnetic Materials                                     |
|   | - Magnetisation Curve for Magnetic and Non-Magnetic Materials.   |

|   | - Magnetic Hysteresis, Hysteresis Loop.  |  |  |  |  |  |  |
|---|--|--|--|--|--|--|--|
|   | - Hysteresis Loops for Hard & Soft Magnetic Materials.                           |  |  |  |  |  |  |
|   | - Area of Hysteresis Loop, Hysteresis Loss. (No Derivation and No Numerical)     |  |  |  |  |  |  |
|   | 4.10 Types of Magnets and their applications. Permanent Magnet, Electromagnet.   |  |  |  |  |  |  |
|   | Electromagnetic Induction:   |  |  |  |  |  |  |
| 5 | 5.1- Relation Between Magnetism and Electricity.                                 |  |  |  |  |  |  |
|   | 5.2- Production of Induced E.M.F. and Current.                                   |  |  |  |  |  |  |
|   | 5.3- Faraday's Laws of Electromagnetic Induction. Faraday's First Law, Faraday's |  |  |  |  |  |  |
|   | Second Law (No Numerical) Cork Screw Rule  |  |  |  |  |  |  |
|   | 5.4 Induced E.M.F: Statically Induced E.M.F., Dynamically Induced E.M.F.         |  |  |  |  |  |  |
|   | (Simple Numerical)   |  |  |  |  |  |  |
|   | 5.5 Direction of Induced E.M.F. and Currents.                                    |  |  |  |  |  |  |
|   | - Fleming's Right Hand Rule  |  |  |  |  |  |  |
|   | - Lenz's Law   |  |  |  |  |  |  |
|   | - Self Induced E.M.F., Mutually Induced E.M.F.                                   |  |  |  |  |  |  |
|   | 5.6 Self Inductance  |  |  |  |  |  |  |
|   | 5.7 Coefficient of Self-induction (L), (Simple Numerical)                        |  |  |  |  |  |  |
|   | 5.8 Mutual Inductance  |  |  |  |  |  |  |
|   | 5.9 Coefficient of Mutual Inductance (M) (Simple Numerical)                      |  |  |  |  |  |  |
|   | 5.10 Coefficient of Coupling   |  |  |  |  |  |  |
|   | 5.11 Inductances in Series and parallel. (No Derivation and No Numerical)        |  |  |  |  |  |  |
|   | 5.12 Types of Inductors and their Applications.                                  |  |  |  |  |  |  |
|   | - Air Cored Inductors  |  |  |  |  |  |  |
|   | - Iron Cored Inductors   |  |  |  |  |  |  |
|   | - Ferrite Cored Inductors.   |  |  |  |  |  |  |
|   | 5.13 Energy Stored in Magnetic Field (No Derivation and No Numerical)            |  |  |  |  |  |  |
|   | 5.14 Concept of DOT and UNDOT for coil   |  |  |  |  |  |  |
|   | LAMPS & BATTERIES  |  |  |  |  |  |  |
| 6 | CONSTRUCTION & WORKING OF LAMPS  |  |  |  |  |  |  |
|   | 6.1Energy Efficient lamp – CFL, LED  |  |  |  |  |  |  |
|   | 6.2 Storage Batteries:   |  |  |  |  |  |  |
|   | 6.3 Concept of Cell and Battery.   |  |  |  |  |  |  |
|   | 6.4 Electrical Characteristics of Batteries.                                     |  |  |  |  |  |  |
|   | 6.5 E.M.F., Terminal Voltage, Internal Resistance, Ampere-Hour Capacity,         |  |  |  |  |  |  |
|   | Efficiency: AH Efficiency and Watt - Hr Efficiency.                              |  |  |  |  |  |  |
|   | 6.6 Necessity of Series Connection of Batteries. And Parallel Connection of      |  |  |  |  |  |  |
|   | Batteries.   |  |  |  |  |  |  |
|   | 6.7 Maintenance of Lead Acid Batteries.  |  |  |  |  |  |  |
|   | 6.8 Applications of Storage Batteries.   |  |  |  |  |  |  |

# Suggested Specifications Table with Hours and Marks (Theory):

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

**Notes:** This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.

| Sr.<br>No. | Unit | Experiment   | Approx.<br>Hours |
|------------|------|--|------------------|
| 1          | 1    | Find the effect of temperature on resistance of copper conductor.                                      | 02               |
| 2          | 1    | Measurement of voltage, current and resistance by suitable meters.                                     | 02               |
| 3          | 2    | Verify Kirchoff's current law.   | 02               |
| 4          | 2    | Verify Kirchoff's voltage law.   | 02               |
| 5          | 2    | To determine the equivalent resistance (Req.) of Series connected resistances.                         | 02               |
| 6          | 2    | To determine the equivalent resistance (Req.) of Parallel connected resistances.                       | 02               |
| 7          | 2    | Demonstration of wave form of DC and AC current on suitable equipment.                                 | 02               |
| 8          | 2    | Demonstration of Rheostat as a current regulator & potential divider.                                  | 02               |
| 9          | 3    | To plot the charging and discharging curves of a capacitor and determine the time constant.            | 02               |
| 10         | 3    | Demonstrate different types of capacitors.   | 02               |
| 11         | 4    | To plot the B H curve for magnetic material and determine the relative Permeability.                   | 02               |
| 12         | 4    | Demonstrate different types of magnets.  | 02               |
| 13         | 5    | To verify Faraday's First Law of electromagnetic Induction (For Dynamically & Statically Induced EMF). | 02               |
| 14         | 5    | Demonstrate different types of inductors.  | 02               |
| 15         | 6    | Demonstration of series & parallel connection of storage batteries.                                    | 02               |
| 16         | 6    | Demonstration of charging of storage batteries.  | 02               |
|            |      | Total  | 32               |

#### List of Experiments

*Notes:* If possible videos should be shown of different applications of this course.

### Rationale:

This course is one of the core subject and it covers fundamentals of electronics. Therefore it is necessary for the students of electronics and related branches to study. It includes basic principles, construction of semiconductor devices, their biasing techniques and simple applications. Student will be able to analyze and apply knowledge of this subject.

Course Outcomes: Student should be able to:

| CO1 | Learn the fundamentals of electronics.   |
|-----|--|
| CO2 | Know the principle of diodes and transistors. Understand the construction and materials used for diodes and transistors. |
| CO3 | Identify the components from their configuration and sketch their symbols.   |
| CO4 | Evaluate the characteristics of electronic components  |
| CO5 | Assemble, test and analyze basic circuits such as rectifiers, amplifiers, clipper, oscillator etc.                       |

# **Course Content Details:**

| Unit<br>No | Topics / Sub-topics   |
|------------|---|
| 1          | Semiconductor Theory:   |
|            | 1.1 Review of atomic structure, Effect of Heat on atomic structure.           |
|            | Concept of Energy band theory, Classification of material on                  |
|            | the basis Energy band theory: Conductor, Insulator, Semiconductor.            |
|            | 1.2 Intrinsic and Extrinsic Semiconductors, P-type and N-type                 |
|            | Semiconductors. Majority and minority charge carriers.                        |
|            | 1.3 P-N Junction formation, Concept of depletion layer and barrier Potential. |
|            | 1.4 Biasing of PN Junction: Forward and reverse biased.                       |
|            | Reverse breakdown: Avalanche breakdown. Reverse Saturation current.           |
|            | 1.5 PN junction Diode: V-I characteristics, Diode current Equation,           |
|            | Effect of temperature, Static and dynamic resistance.                         |
|            | 1.6 Comparison of Si and Ge Diode. Packages of Diode.                         |
|            | 1.7 Definition of following terms: Forward voltage and Forward                |

Electronics Department

| - |   |
|---|---|
|   | Current, PIV, Power dissipation of diode, Junction Capacitance,                 |
|   | Barrier / Knee Voltage.   |
|   | 1.8 Testing of Diode using multimeter, Application of Diode.                    |
| 2 | Diode applications:   |
|   | 2.1 Review of Transformer: Step Up, Step down (Not for exam)                    |
|   | 2.2 Rectifier: Definition, Types, Circuit diagram, waveforms and                |
|   | Working of(a) Half wave rectifier (b) Full Wave rectifier (Centre               |
|   | Tapped) (c) Bridge rectifier.   |
|   | 2.4 Definition of following terms: Ripple factor, efficiency of                 |
|   | Rectifier, TUF.   |
|   | 2.5 Comparison of Rectifiers.   |
|   | 2.6Filters: Waveform and working of Capacitor, Choke input                      |
|   | And II-type filters circuit for rectifiers (Refer 2.2)                          |
|   | 2.7Diode as clipper and clamper   |
|   | (a) Circuit diagram, waveform and working of positive, negative                 |
|   | clipper (series and shunt)  |
|   | (b) Circuit diagram, waveform and working of positive, negative clamper.        |
| 3 | Special Diodes :  |
|   | Symbol, construction, characteristics, working, application and general         |
|   | specification of the following diodes:  |
|   | 3.1 Zener Diode. Application of Zener diode as regulator.(series and shunt)     |
|   | 3.2 Block diagram of regulated power supply, Definition of load                 |
|   | Regulation, line regulation. (Simple numerical on end expression,               |
|   | no derivation to be asked in the exam)  |
|   | 3.3Light Emitting Diode, Calculation of series resistance.                      |
|   | 3.4Photo Diode.   |
| 4 | Transistor Fundamentals:  |
|   | 4.1 Bipolar Junction Transistor: Two diode analogy of transistor, Packages and  |
|   | terminal identification of Transistor.  |
|   | 4.2Symbol. Construction and working of PNP and NPN transistors.                 |
|   | 4.3 Transistor configuration: CE. CB. CC modes.                                 |
|   | 4.4 Characteristics of transistors in CE configuration. Expression of collector |
|   | current Concept of collector leakage current. Relation between a and B.         |

|           | (Simple numerical on end expression, no derivation to be asked in the exam)        |
|-----------|--|
|           | 4.5 Concept of Early Effect.   |
|           | 4.6 Transistor Parameters/ Ratings: Maximum collector current, Maximum             |
|           | collector voltage, Maximum Base current, Maximum power dissipation,                |
|           | Operating frequency range, Current gain (hfe).                                     |
|           | 4.7 Importance of Heat sink.   |
|           | 4.8 Differentiate faulty and good Transistor.                                      |
| 5         | BJT biasing:   |
|           | 5.1 Introduction: Need of biasing, DC Operating point and load line, factors       |
|           | contributing to thermal instability, Effect of temperature (Thermal runway)        |
|           | Stability Factor   |
|           | 5.2 Transistor biasing: Circuit and analysis of biasing network such as Fixed bias |
|           | Collector feedback bias, Emitter Bias, Voltage divider bias, (Simple               |
|           | numerical on the end expression such as stability factor, current gain is          |
|           | expected).   |
|           | 5.3 Application of Transistor as a Switch  |
|           | 5.4 Single stage Common Emitter (CE) amplifier: Working and                        |
|           | frequency response.  |
| 6         | Field Effect Transistor:   |
|           | 6.1 Introduction, Symbol, Packages and terminal identification of FET (N           |
|           | channel, P channel)  |
|           | 6.2 JFET: Formation of depletion region, Operation, Output and Transfer            |
|           | characteristics.   |
|           | 6.3 JFET Parameters, relation between JFET parameters.                             |
|           | 6.4 Comparison between BJT and FET.  |
| 7         | Introduction to Oscillators:   |
|           | 7.1 Need and condition for oscillators (Barkhausen criteria)                       |
|           | 7.2 Types of feedback : Positive and Negative                                      |
|           | 7.3 Type of oscillator: RC phase shift oscillator and Hartley oscillator, working  |
|           | frequency expression and applications.   |
| 8         | Digital Electronics:   |
|           | 8.1 Number Systems:  |
|           | a) Binary numbers, Octal numbers, Hexadecimal numbers:                             |

#### Rationale:

Engineering drawing is the graphical language of engineers, designers, planners, supervisors and technicians to express their thoughts, ideas and concepts used in it. Engineering drawing offers students an insight into the methods of exploring engineering problems. It imbibes the principles of accuracy and exactness with regard to the information necessary for the production of an engineering component. This preliminary course aims at building a foundation for the further course in drawing and other allied subjects. This subject is useful in developing imagination, drafting and sketching skills of students.

Course Outcomes: Student should be able to,

| C01 | Effectively use drawing instruments for enhancing speed and accuracy in drawing. |
|-----|--|
| C02 | Construct different engineering curves and know their applications.              |
| C03 | Draw Orthographic Projections of solids with given orientation.                  |
| C04 | Visualize three dimensional objects and draw Isometric Projections.              |
| C05 | Draw the free hand sketches of different thread forms, bolts, screws and nuts.   |

#### **Course Content Details:**

| Unit<br>No. | Topics / Sub-topics  |
|-------------|--|
|             | Principles of Drawing : Drawing Instruments and their uses, Standard sizes of      |
| 1           | drawing sheets (ISO-A series), Letters and numbers (single stroke vertical),       |
|             | Convention of lines and their applications, Scale (reduced, enlarged & full size), |
|             | Dimensioning as per SP-46 (Latest edition), Simple geometrical constructions,      |
|             | Redrawing figures using above geometrical construction.                            |

| 2 | method & Concentric circles method, To draw a parabola and hyperbola by             |
|   | Directrix and focus method. To draw involutes of circle & pentagon, To draw a       |
|   | cycloid, Loci of points of Single slider crank mechanism with given specifications. |
|   | Orthographic projections: Introduction to Orthographic projections, Conversion      |
| 3 | of pictorial view into Orthographic views (first angle projection method only) -    |
|   | elevation, plan and end view, Types of sections and Conversion of pictorial view    |
|   | into sectional orthographic views. (Complete object involving slots, threads, ribs  |
|   | etc;.)  |
| 4 | Isometric projections: Isometric scale, comparison of true scale with isometric     |
|   | scale, Conversion of orthographic views into isometric view/projection. (complete   |
|   | object involving slots, ribs, holes etc.;)  |
|   | Freehand Sketches: Draw neat & proportionate free hand sketches of given            |
| 5 | elements and understands its function and use. Different types of thread forms,     |
|   | nuts, bolts, screws and foundation bolts (Rag, Eye and Lewis type).                 |
|   |   |

#### Suggested Specifications Table with Hours and Marks (Theory):

## List of Sheets/Assignments:

2

k

6

| No. | No. | Sheets /Assignment   | Approx.<br>Hours |
|-----|-----|--|------------------|
| 1   | 1   | Drawing types of lines, problems on redraw figures & geometrica construction.                                  | 1 08             |
| 2   | 2.  | Engineering curves & Loci of Points (Minimum four problems)  | 08               |
| 3   | 3   | Orthographic projection of objects by first angle method of projection. (Minimum two problems)                 | 10               |
| 4   | 3   | Orthographic projection with section of objects using first angle method of projection. (Minimum two problems) | 10               |
| 5   | 4   | To draw Isometric planes, Isometric projections with Isometric scale. (Minimum two objects)                    | 10               |
| 6   | 4   | To draw Isometric views of objects including slots, holes and sloping faces. (Minimum two objects)             | 10               |
| 7   | 5   | Free hand sketches of different types of thread forms, nuts, bolts and screws.                                 | 08               |
|     |     | Total  | 64               |

Assignment:- Assignments on above five topics to be given.

Note: Practical examination will be conducted based on the question bank provided.

#### Rationale :

Gos

The programme aims to inculcate social <u>welfare</u> in students, and to provide service to society without bias. NSS volunteers work to ensure that everyone who is needy gets help to enhance their <u>standard of living</u> and lead a life of dignity. In doing so, volunteers learn from people in villages how to lead a good life despite a scarcity of resources, it also provides help in natural and man-made disasters by providing food, clothing and first aid to the disaster victims.

#### Course Outcomes:

After the completion of the course student will be able to

| CO1 | Understand the community in which they work & themselves in relation to<br>their community  |
|-----|---|
| CO2 | Identify the needs and problems of the community and involve them in<br>problem-solving. Acquire leadership qualities and democratic attitudes. |
| CO3 | Develop sense of social and civic responsibility, gain skills in mobilizing<br>community.   |
| CO4 | Develop capacity to meet emergencies and natural disasters and practice<br>national integration and social harmony                              |

#### **Rationale:**

Basic knowledge of materials used in electrical engineering is essential for an electrical engineer. Also the knowledge of wiring accessories, wiring methods is vital for an electrical engineer. This subject is intended to develop skills of wiring and testing in the electrical wiring installations. This subject also gives insight of Electrical Engineering Materials.

#### **Course Outcomes:**

| EE 16 208.1 | List Physical, Mechanical and Electrical properties of electrical conducting materials |
|-------------|--|
| EE 16 208.2 | List Thermal, Mechanical and Electrical properties of electrical insulating materials  |
| EE 16 208.3 | Classify insulating materials based on temperature withstanding ability                |
| EE 16 208.4 | Categorize magnetic materials  |
| EE 16 208.5 | Make up different types of wiring  |

#### **Contents:**

| 01 Classification of electrical materials.   |
|--|
| <b>1.1</b> Importance of Materials in Electrical Engineering   |
| 02 Conducting Materials (Physical, Mechanical and Electrical properties):                                    |
| 2.1 Current Carrying Conducting Materials( Copper, Aluminum, Bronze and Iron)                                |
| 2.2 Non Current Carrying Conducting Materials( Cast iron, Cast Steel, etc)                                   |
| 03 Insulating Materials(Thermal, Mechanical and Electrical properties):                                      |
| 3.1 Classification on basis of state of materials as solid ,liquid gaseous insulating materials (            |
| Introduction and applications)   |
| <b>3.2</b> Classification on the basis of temperature withstanding ability such as Y (O), A, E, B, F,H and C |
| type with list of insulating materials in each type.   |
| <b>3.3</b> Effect of Nano Technology on properties of materials  |
| 04 Magnetic Material (Introduction and Applications)   |
| 4.1 Classification of magnetic material as Paramagnetic, Diamagnetic and Ferromagnetic material              |
| C.R.G.O. Silicon Steel   |
| • H.R.G.O. Silicon Steel   |
| Amorphous Metal  |
| 05 Wiring  |
| 5.1 Classification of electrical installations   |

5.2 General requirements of electrical installation

1

| 5.3 Reading & interpretation of electrical engineering drawings & symbols related to installations |
|--|
| 5.4 Types of Wires – PVC, CTS, TRS, Lead Sheathed, flexible, multicore, single strand, multi-      |
| strand   |
| 06 Methods of Wiring and Different types of Wiring systems   |
| 6.1 Methods of Electrical Wiring systems w.r.t taking connection                                   |
| 6.2 Joint Box or Tee or Jointing system  |
| 6.3 Loop-in or Looping system  |
| <b>6.3.1</b> Advantages of loop-in method of wiring  |
| <b>6.3.2</b> Disadvantages of loop-in method of wiring   |
| 6.4 Different types of Electrical wiring systems   |
| 6.5 Cleat Wiring   |
| 6.5.1 Advantages of Cleat wiring   |
| 6.5.2 Disadvantages of Cleat wiring  |
| 6.6 Casing and Capping wiring  |
| 6.6.1 Advantages of Casing and Capping wiring  |
| 6.6.2 Disadvantages of Casing and Capping wiring   |
| 6.7 Batten wiring (CTS/ TRS)   |
| 6.7.1 Advantages of Batten wiring  |
| 6.7.2 Disadvantages of Batten wiring   |
| 6.8 Lead sheathed wiring   |
| 6.9 Conduit wiring   |
| 6.9.1 Surface conduit wiring   |
| 6.9.2 Concealed conduit wiring   |
| 6.10 Types of Conduit  |
| 6.10.1 Metallic conduit  |
| 6.10.2 Nonmetallic conduit   |
| 6.11 Advantages of Conduit wiring system   |
| 6.12 Disadvantages of Conduit wiring system  |
| 6.13 Comparison between different Wiring systems   |

#### Suggested specification table with Hours and Marks (Theory)

|------------|---|----------|------------------------------|------------|------------|----------------|--|--|
|            | Topic Title   | Hours    | R<br>Level                   | U<br>Level | A<br>Level | Total<br>Marks |  |  |
| 1          | Classification of electrical materials                                | 2        |                              |            |            |                |  |  |
| 2          | Conducting Materials (Physical, Mechanical and Electrical properties) | 6        |                              |            |            |                |  |  |
| 3          | Insulating Materials(Thermal, Mechanical and Electrical properties)   | 6        |                              |            |            |                |  |  |
| 4          | Magnetic Material (Introduction and Applications)                     | 6        |                              |            |            |                |  |  |
| 5          | Wiring  | 4        |                              |            |            |                |  |  |
| 6          | Methods of Wiring and Different types of<br>Wiring systems            | 8        |                              |            |            |                |  |  |
|            | Total   | 32       |                              |            |            |                |  |  |

**Legends:** R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy). *Notes:* This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. *Numerical questions are to be asked only if specified.* 

| Sr,No. | Unit | Experiment/Assignment   | Approx-<br>Hours |
|--------|------|---|------------------|
| 1      | 5    | Identify the different types of fuses with their applications.  | 2                |
| 2      | 5    | Draw diagrams of different wiring accessories.  | 4                |
| 3      | 5    | Identify samples of different types of wires.   | 2                |
| 4      | 6    | Build wiring circuit for one lamp controlled by one switch  | 2                |
| 5      | 6    | Build a sample staircase wiring   | 2                |
| 6      | 6    | Build a sample godown wiring  | 2                |
| 7      | 6    | Build a sample cleat wiring   | 2                |
| 8      | 6    | Build a sample Casing Capping wiring  | 2                |
| 9      | 6    | Build a sample batten wiring  | 2                |
| 10     | 6    | Build a sample Conduit wiring   | 2                |
| 11     | 6    | Trace and draw a electrical installation of a classroom   | 2                |
| 12     | 6    | Trace and draw a electrical installation of a laboratory / workshop   | 2                |
| 13     | 2    | Identify the current carrying conducting material in at least five electrical accessories / devices.                                | 2                |
| 14     | 4    | Identify the magnetic material in a given electrical motor, Electric choke/ballast.   | 2                |
| 15     | 3    | Identify the name and class of insulation of insulating material in any five electrical accessories / equipment/ instrument/ device | 2                |

#### **Rationale:**

This is the subject where the concepts, facts, principles and applications of electrical measurements are studied. These are necessary for experimentation in electrical engineering and also for achieving high degree of accuracy in experimentation. This course is necessary for applications in the field of measurements.

#### **Course Outcomes:**

| EE 16 209.1 | Define terminology used in electrical measuring instruments.  |
|-------------|---|
| EE 16 209.2 | Demonstrate various constructional parts of electrical measuring instruments with working principles. |
| EE 16 209.3 | Measure electrical quantities with various instruments.   |
| EE 16 209.4 | Explain calibration procedure of electrical measuring instruments.                                    |
| EE 16 209.5 | Select suitable measuring instruments for particular application.                                     |

| Unit No. | Topics/ Sub Topics:   |
|----------|---|
| 1        | Basic Concepts:   |
|          | 1.1 Purpose of measurement & significance of measurement.   |
|          | 1.2 Various effects of electricity employed in electrical measuring instruments.                  |
|          | 1.3 Characteristics of Instruments: <u>Static</u> - Accuracy, Precision, sensitivity, resolution, |
|          | Static error, Repeatability, Drift, Dead zone. Dynamic- speed of response, Lag,                   |
|          | Fidelity, Dynamic error.  |
|          | 1.4 Types of static error- Gross, Systematic, Random.   |
|          | 1.5 Classification of instruments based on –  |
|          | a) Electrical effects.  |
|          | b) Nature of operation.   |
|          | c) Limits of permissible errors.  |
|          | 1.6 Different types of torque in Analog Instruments.  |
|          |   |
| 2        | Measurement of Current and Voltage:   |
|          | 2.1 Construction and principle of PMMC, MI & Electro-dynamometer type Instrument.                 |
|          | Merits and demerits.  |
|          | 2.2 Methods of production of torque.  |
|          | 2.3 Extension of Range of Ammeter and Voltmeter. (Simple Numerical)                               |
|          | 2.4 Different methods of Extension of Range of Ammeter and Voltmeter.                             |
|          | 2.5 Errors and their compensation.  |
|          | 2.6 Calibration of Ammeter and Voltmeter.   |
|          | 2.7 Clamp on meter construction and working.  |
|          | 2.8 Digital ammeters and voltmeters, application.   |
|          |   |

| 3 | Instrument Transformers:  |
|---|---|
|   | 3.1 Construction, theory and errors in CT and PT.   |
|   | 3.2 Effect of secondary of CT open circuited.   |
|   | 3.3 Use of C1 and P1 for extension of ranges.   |
|   | 5.4 Specifying a C1 and P1 Polarity.  |
| 4 | Measurement of Power:   |
|   | 4.1 Concept of power in A.C. Circuit.   |
|   | 4.2 Principle and Construction of dynamometer type wattmeter  |
|   | 4.3 Errors and their compensation.  |
|   | 4.4 Poly phase wattmeter.   |
|   | 4.5 Measurements of power in 3 phase circuit for balanced and unbalanced load                                 |
|   | 4.6 Effect of power factor variation on wattmeter readings in two wattmeter method.                           |
|   | 4.7 Measurement of reactive power in three phase balanced load by one wattmeter method                        |
|   | 4.8 Digital Wattmatar Principle Block Diagram advantages  |
|   | 4.6 Digitar wattheter – I metple, block Diagram, advantages   |
| 5 | Measurement of Electrical Energy:   |
|   | 5.1 Concept of electrical energy.   |
|   | 5.2 Constructional feature & principle of working of single phase and three-phase induction tupe energy mater |
|   | 5.3 Constructional feature & principle of working of single phase and three phase                             |
|   | bidirectional (Import-Export type) energy meter   |
|   | 5.4 Different types of errors and their compensation.   |
|   | 5.5 Calibration of energy meter.  |
|   | 5.6 Electronic energy meter.  |
|   | 5.7 Tri vector meter- Construction, working and Applications.   |
| ( |   |
| 0 | 6.1 Classification of Pasistance, Low Medium and High   |
|   | 6.2 Methods of Measurements of Low, Medium and High Resistance (Potentiometer                                 |
|   | Wheatstone's bridge and Megger)   |
|   | 6.3 Measurement of Earth resistance- Earth tester (Analog & Digital)  |
|   | 6.4 Measurement of Transmission tower footing resistance.   |
|   | 6.5 Digital Multimeter.   |
|   | 6.6 L.C.R. Meter – Block diagram and working  |
|   | 6.7 Testing of faults in cable.   |
| 7 | Oscilloscope  |
|   | 7.1 Block diagram study of CRO  |
|   | 7.2 Lissajous pattern, use of these in phase & frequency measurements.  |
|   | 7.3 Concept of Dual trace, dual beam, Sampling, storage, Digital read-out oscilloscope.                       |
|   |   |
| 8 | Other Meters:   |
|   | 8.1 Single phase and three phase Power Factor Meter (only dynamometer type).                                  |
|   | 8.2 Frequency meter (Weston and Ferro dynamic type).  |
|   | 8.3 Digital Frequency Meter.  |
|   |   |

#### (#) - indicates on line exam

#### **Rationale:**

This is the subject where the principles of electrical power generation systems are studied. Knowledge of different methods of generation of electricity and recent trends in the field is necessary for an electrical engineer. In this course, student will learn various method of generating power with function, location of equipment involved in power system operation. It also deals with economics of generation.

#### **Course Outcomes:**

The students will be able to

| EE 16 210.1 | Recall the principle of generation of electrical power and importance of grid system. |
|-------------|---|
| EE 16 210.2 | Illustrate working, location of main equipment in different power plants              |
| EE 16 210.3 | Construct block diagram of different power plants.                                    |
| EE 16 210.4 | Compare different types of power plants.  |
| EE 16 210.5 | Interpret energy bills for different customers using various tariffs.                 |

#### **Contents:**

#### 1 : Introduction:

1.1 Need of energy.

- 1.2 Electrical energy system.
- 1.3 Voltage level in AC Network.
- 1.4 Primary Conventional and non-conventional energy resources and energy conversion processes.
- 1.5 Types of generating stations.
- 1.6 Terms related to power generation: Energy resources, fuel, Pollution, Thermal efficiency,
- Thermodynamics, combined cycle plant, Installed capacity, Fossil fuels.
- 1.7 Interconnected power system.
- 1.8 National Grid of India.

#### 2 : Thermal Power Stations:

#### 2.1 Introduction

- Installed capacity in Maharashtra state, India
- 2.2 Selection of site for thermal power stations.
- 2.3 General layout of thermal power station.
- 2.4 Thermodynamic cycle
  - Definition, diagram.
    - Typical values of steam at turbine inlet

- Efficiency of Rankine cycle.
- 2.5 Main equipment in thermal power plant:
  - 2.5.1 Coal storage and Handling plant
    - Function
    - Types of coal in order of heat value.
    - Equipment used in coal handling plant.
    - Location of coal storage and handling plant
    - 2.5.2 Ash storage and handling plant:
      - Function
        - Problems in Ash handling plant in India
        - Classification of modern ash handling system
        - Location of Ash storage and handling plant
  - 2.5.3 Steam Boilers:
    - Function
    - Requirement of Boiler
    - Types of Boiler: fire tube boiler, water tube boiler, Fluidized Bed Combustion boiler (FBCB).
      - Location of steam boiler
  - 2.5.4 Function, Types, Location of following equipment: superheater, Economiser, Air Preheater, Steam turbines, Condensers.
  - 2.5.5 Feed Water circuit
  - 2.5.6 Cooling water systems.
  - 2.5.7 Turbine Governing
- 2.6 Pollution control: problems of Dust collection from flue gases, types of pollution control, Electrostatic Precipitator
- 2.7 Advantages and disadvantages of thermal power plant.
- 2.8 List of Thermal power plant in India, Maharashtra.

#### **3** : Hydro-electric Power Plants:

- 3.1 Introduction
  - Installed capacity in Maharashtra state, India
- 3.2 Classification of hydroelectric power plants.
- 3.3 Selection of site for hydroelectric power plants.
- 3.4 General layout of hydroelectric power plants.
- 3.5 Function and location of following component: Reservoir, Dam, Spill ways, Intake, Forebay, Penstock, Surge tank, Turbine, Power house, Draft tube.
- 3.6 Classification of turbine based on i) Head ii) Discharge iii) Direction of flow iv) Pressure v) Specific Speed
- 3.7 Governing of Turbine.
- 3.8 Advantages and limitations of Hydro-electric power plant
- 3.9 List of Hydro-electric Power Plants in India, Maharashtra

#### 4 : Nuclear Power Plants:

4.1 Introduction

4.2 Basic definitions: Nuclear Fission, Fusion, Fissionable Materials, Fissile Material, Chain reaction, Moderators.

- 4.3 Fuels for nuclear fission reactor
- 4.4 Nuclear Energy Released by Fission
- 4.5 Site selection of nuclear power plant
- 4.6 Nuclear Reactor: basic component of nuclear reactor with function.
- 4.7 Types of nuclear reactor power plants.
- 4.8 General Layout of Nuclear power station.

4.9 Working of Nuclear Reactor: BWR-PP, PHWR-PP, and LM-FBR.

4.10 Nuclear reactor waste management.

- 4.11 Advantages and disadvantages of Nuclear power plant.
- 4.12 list of nuclear power plant in Maharashtra.
- 4.13 Comparison with thermal and Hydro-electric power

#### **5** : Diesel Power Stations:

- 5.1 Introduction
- 5.2 General layout of Diesel Power Station.
- 5.3 Main component of Diesel power plant.
- 5.4 Major parts and working of Diesel Engine.
- 5.5 Applications of diesel power stations

#### **6:Combined Cycle Power Plants**

- 6.1 Introduction
- 6.2 General layout of combined cycle power plant.
- 6.3 major component of combined cycle power plant.
- 6.4 Advantages and disadvantages of combined cycle power plant
- 6.5 Applications of combined cycle power plant.
- 6.6 Example of combined cycle power plants in India

#### 7: Economics Of Power Generation:

- 7.1 Connected load, Actual load, Load-curve, Load duration curve, Integrated load duration curve. (Simple numerical)
- 7.2 Definition of following: Plant Factor and reserves, Maximum demand factor, Load Factor, Diversity Factor, plant factor, capacity factor, connected load factor (Simple numerical)
- 7.3 Concept of Load forecasting: short term and long term.
- 7.4 Cost of Generation: Power Project cost Fixed, Running, Annual, Break even
- 7.5 Tariffs: definition, types, factors deciding tariffs structure. (Simple Numerical)
- 7.6 Interpretation of electric bills. (Domestic and Industrial)

#### Note: Visit to minimum two types of power plants with report writing.

**Rational:** Student belonging to electrical engineering is made to learn some fundamentals of mechanical engineering so that they will have basic understanding of mechanical systems, equipments and processes. Finally, it develops the basic knowledge that is so essential to the creation of successful technician.

Course Outcomes: Student should be able to,

| C01 | Describe construction, working and principles of turbines, pumps &I.C.Engines.                    |
|-----|---|
|     | Acquire knowledge of mechanical engineering   |
| CO2 | Describe the scope of mechanical engineering with multidisciplinary industries.                   |
| CO3 | Describe and identify common machine element with their functions and power transmitting devices. |
| CO4 | Describe construction and working of boilers and turbines   |
| CO5 | Describe construction and working of hydraulic pumps and air compressors.                         |
| CO6 | Describe construction and working refrigeration and air conditioning equipments.                  |

| Торіс   | Hours | Marks |

#### Rationale:

n

Environmental studies is the interdisciplinary academic field which systematically studies human interaction with the environment in the interests of solving complex problems. It is a broad field of study that includes also the natural environment, built environment, and the sets of relationships between them. The turn of the twentieth century saw the gradual onset of its degradation through depletion of resources such as air, water and soil; the destruction of ecosystems and the extinction of wildlife by our callous deeds without any concern for the well-being of our surrounding. We are today facing a grave environmental crisis. It is therefore necessary to study environmental issues to realize how human activities affect the environment and what could possibly be the remedies or precautions which need to be taken to protect the environment.

#### **Course Outcomes:**

#### Student should be able to

| C01 | State importance of environment  |
|-----|--|
| C02 | Identify key issues about environment  |
| CO3 | Analyze the reasons for environment degradation                                |
| CO4 | Distinguish the various improvement methods                                    |
| CO5 | Identify measures taken by the world bodies to restrict and reduce degradation |

#### **Course Content Details:**

| Unit No | Topics / Sub-topics   |  |  |  |  |
|---------|---|--|--|--|--|
| 1       | Nature of Environmental Studies:  |  |  |  |  |
|         | 1.1 Definition, Scope and Importance of the environmental studies               |  |  |  |  |
|         | 1.2 Importance/significance of the environmental studies irrespective of course |  |  |  |  |
|         | 1.3 Need for creating public awareness about environmental issues               |  |  |  |  |
|         | 1.4 Ways/means/methods of creating public awareness                             |  |  |  |  |
|         | 1.5 Some important terms related with Environmental Studies                     |  |  |  |  |

## Civil Engineering

| 2 | Natural Resources and Associated Problems:                           |
|---|--|
| 2 |  |
|   | 2.1 Introduction   |
|   | 2.2 Renewable Resources  |
|   | 2.3 Forest Resources:  |
|   | o General description of forest resources                            |
|   | o Functions and benefits of forest resources                         |
|   | • Effects on environment due to over exploration of forest reconcern |
| 7 | Due to timber extraction   |
|   | Due to dams  |
|   | <ul> <li>Due to building of waterways</li> </ul>                     |
|   | Due to building of water ways  |
|   | 2.4 Water Resources:   |
|   | o Hydrosphere: Different sources of water.                           |
|   | Use and overexploitation of surface and ground water                 |
|   | o Effect of floods, draught, dams etc. on water resources and        |
|   | community  |
|   | 2.5 Mineral Resources:   |
|   | o Categories of mineral resources                                    |
|   | o Basics of mining activities  |
|   | o Mine safety  |
|   | <ul> <li>Effect of mining on environment</li> </ul>                  |
|   | 2.6 Food Resources:  |
|   | <ul> <li>Food for all (Food Security)</li> </ul>                     |
|   | o Effects of modern agriculture                                      |
|   | • World food problem   |
|   | • Case Study: Adverse environmental effect of Black a rungar Ball    |
|   | R  |
| 3 | Ecosystems:  |
|   | 3.1 Concept of Ecosystem   |
|   | 3.2 Classification   |
|   | 3.3 Structure and functions of ecosystem:                            |
|   | Structure (Components), Functions & Food Chain                       |
|   | 3.4 Energy flow in ecosystem:  |
|   | Gross primary product and Net primary product, Autotrophic levels    |
|   | and Bioaccumulation  |
|   | 3.5 Major ecosystems in the world                                    |
|   | 3.6 Case Study: Silent Spring  |
|   |  |
| 4 | Biodiversity and Its Conservation:                                   |
|   | to D. C. Min of Diadiuscrift   |
|   | 4.1 Definition of Blodiversity                                       |
|   | 4.2 Levels of blodiversity.  |

|   | Genetic, Species, Community & Ecosystem  |
|---|--|
|   | 4.3 Value of biodiversity  |
|   | 4.4 Threats to biodiversity:   |
|   | Habitat destruction, Invasive species, Genetic pollution,                            |
|   | Overexploitation, Hybridization, Climate change & Overpopulation                     |
|   | 4.5 Conservation of biodiversity: In-situ & Ex-situ                                  |
|   | 4.6 Case Study of any two endangered species   |
| 5 | Environmental Pollution:   |
|   | 5.1 Definition of environmental pollution  |
|   | 5.2 Air pollution:   |
|   | a. Definition  |
|   | b. Classification: Types of air pollution, Types of air pollutants                   |
|   | c. Sources: Anthropogenic & Natural  |
|   | d. Effects: Health effects, Climate change, Global warming, Acid rain,               |
|   | Ozone layer depletion & Photochemical smog   |
|   | e. Prevention: Particulate control, Scrubbers, NOx control, VOC                      |
|   | abatement, Acid gas control & Mercury control  |
| - | 5.3 Water Pollution:   |
|   | a. Definition  |
|   | b. Water trivia facts  |
|   | c. Water pollution trivia facts  |
|   | d. Classification: Surface, Groundwater, Oxygen depletion in waters,                 |
|   | Nutrient pollution, Microbiological pollution, Suspended matter & Chemical pollution |
|   | e. Sources/Causes of pollution: Sewage & waste water, Marine                         |
|   | dumping, Industrial waste water, Nuclear waste, Oil pollution,                       |
|   | Underground storage leakages, Atmospheric deposition and                             |
|   | Eutrophication   |
|   | f. Effects of water pollution  |
|   | g. Prevention (What you can do)  |
|   | h. Treating water pollution, Water pollution at home                                 |
|   | 5.4 Soil Pollution: Definition sources, effects, prevention                          |
|   | 5 <sup>15</sup> Noise Pollution: Definition sources, effects, prevention             |
|   | 5.6 Case Study: Bhopal Gas Tragedy and Minamata Disease                              |
| 6 | Social Issues and Environment:   |
|   |  |
|   | 6.1 Concept of development   |
|   | 6.2 Sustainable development: Environmental, Economic, Social & Cultural              |

#### **Rationale:**

Students of electrical engineering must know different types of circuits networks and related concepts. It is also necessary that, they should be able to apply appropriate laws or theorems to analyse the various circuits. This is one of the foundation courses which is required to understand the concepts of advanced courses and develop skills that are needed in Electrical field.

#### **Course Outcomes:**

| EE 16 211.1 | Define different terminologies related AC circuits and Poly-phase circuits.                     |
|-------------|---|
| EE 16 211.2 | Analyse simple linear DC networks and AC circuit using basic methods and theorem.               |
| EE 16 211.3 | Compare the behaviour of resistive inductive and capacitive circuit when AC voltage is applied. |
| EE 16 211.4 | Draw phasor diagram for resistive inductive and capacitive circuit.                             |
| EE 16 211.5 | Distinguish between active, reactive and apparent power.  |
| EE 16 211.6 | Compare star and delta connected system.  |

| Unit No. | Topics/Subtopics   |  |  |  |  |
|----------|--|--|--|--|--|
| 1        | DC Network theorem:  |  |  |  |  |
|          | 1.1 Network Analysis : Direct method, Network reduction method.        |  |  |  |  |
|          | 1.2 Statement, Explanation, and simple Numerical on following theorem. |  |  |  |  |
|          | a) Mesh/Loop analysis  |  |  |  |  |
|          | b) Nodal analysis  |  |  |  |  |
|          | c) Superposition theorem   |  |  |  |  |
|          | d) Thevenin's theorem.   |  |  |  |  |
|          | e) Nortons's theorem.  |  |  |  |  |
|          | f) Maximum Power Transfer Theorem.                                     |  |  |  |  |
|          | g) Star Delta transformation   |  |  |  |  |
|          |  |  |  |  |  |

| 2 | AC Fundamentals  |
|---|--|
| 4 |  |
|   | <ul> <li>2.1:Difference between a.c. and d.c. quantity, Advantages of a.c. over d.c. ,Generation of alternating voltages and currents, Mathematical expression of alternating quantity.</li> <li>2.2 Definition of : Waveform, Instantaneous Value, cycle, Alternation, Time period, frequency, amplitude.</li> <li>2.3 :Relationship between <ul> <li>a) Time period and frequency</li> </ul> </li> </ul> |
|   | b) Angular velocity and frequency  |
|   | c) Frequency and speed   |
|   | 2.4 : Different forms of equation of alternating voltage.  |
|   | 2.5 Definition of : Peak value, Average value, RMS value, form factor, peak factor for   |
|   | sinusoidal voltage and current.  |
|   | 2.6 : Concept of phase, phase difference, lagging and leading phasor, Phasor   |
|   | representation of sinusoidal quantity.   |
|   | Numericals based on above  |
| 3 | Phasor Algebra :   |
|   | 3.1Mathematical representation of phasor   |
|   | a) Symbolic Notation, significance of operator j.  |
|   | b) Trigonometric form  |
|   | c) Exponential form  |
|   | d) Polar form  |
|   | 3.2 Conversion from polar to rectangular form and vice versa.  |
|   | Numerical based on above   |
| Δ | AC series circuit :  |
| - | 4.1 AC through pure resistance: Circuit, Equation, waveform.   |
|   | Phasor diagram .Average power.   |
|   | 4.2 AC through pure Inductance : Circuit, Equation, waveform, Phasor diagram,  |
|   | Inductive reactance ,Average power.  |
|   | 4.3 AC through pure capacitance : Circuit, Equation, waveform, Phasor diagram,   |
|   | Capacitive reactance ,Average power.   |
|   | 4.4 Series RL, RC and RLC circuit: Circuit, phase angle, Impedance, Admittance,  |
|   | Average power, Power curve.  |
|   | 4.5 Voltage triangle, impedance triangle, Power triangle, Apparent power, frue Power,<br>Reactive power  |
|   | 4.6 Resonance in RLC series circuit: Derivation of resonance frequency. Effect of  |
|   | frequency on R.XL.XC, Z and current, quality factor, resonance curve.  |
|   | Numerical based on above   |
| 5 | AC Parallel Circuit :  |
|   | 5.1 Concept of parallel circuit.   |
|   | 5.2 Admittance, susceptance and conductance.   |
|   | 5.3 Solving parallel circuits by impedance/admittance method, phasor method.   |
|   | 5.4 Calculation of current, power, power factor in A.C. parallel RL RC and RLC circuits.   |
|   | (Numerical based on above.)  |
|   | Comparison with series resonance. Quality factor of parallel resonant circuit  |
| 6 | Polynhase Circuits:  |
| U | 6.1Difference between single phase and polyphase system. Generation of three-phase   |
|   | a.c. supply, Advantages of three-phase supply over single-phase supply.  |
|   | 6.2 Concept of phase sequence and balanced/unbalanced load.  |
|   | 6.3 Star connected system, Relation between phase and line values of current and voltage   |
|   | in balanced Star system.   |
|   | 6.4 delta connected system ,Relation between phase and line values of current and voltage  |

| in balanced Delta system.   |
|---|
| 6.5 Active, Reactive and Apparent power in three phase Star/Delta system. |
| 6.6 Advantages of star and delta connected system                         |
| (Numerical based on above.)   |

#### Suggested specification table with Hours and Marks (Theory)

| Unit | Topic Title         | Teaching | Distribution of Theory Marks |            |            |                |
|------|---------------------|----------|------------------------------|------------|------------|----------------|
| No   |                     | Hours    | R<br>Level                   | U<br>Level | A<br>Level | Total<br>Marks |
| 1    | DC Network Theorem  | 14       | 08                           | 10         | 4          | 22             |
| 2    | AC Fundamentals     | 06       | 04                           | 04         | 00         | 08             |
| 3    | Phasor Algebra      | 04       | 02                           | 03         | 00         | 05             |
| 4    | AC Series Circuit   | 10       | 06                           | 06         | 04         | 16             |
| 5    | AC Parallel Circuit | 08       | 03                           | 03         | 04         | 10             |
| 6    | Polyphase Circuit   | 06       | 05                           | 04         | 00         | 09             |
|      |                     | 48       | 28                           | 30         | 12         | 70             |

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

**Notes:** This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.

| Sr. | Unit | Experiment/Assignment  | Approx |
|-----|------|--|--------|
| No. |      |  | nours  |
| 1   | 1    | Verify Superposition theorem applicable to D.C. circuit.   | 04     |
| 2   | 1    | Verify Thevenin's theorem applicable to D.C. circuit.  | 02     |
| 3   | 1    | Verify Norton's theorem applicable to D.C. circuit.  | 02     |

#### 1. RATIONALE :

The knowledge of DC machines including their characteristics is necessary for students of Electrical Engineering. The subject deals with the concepts, characteristics & applications of DC Generators & Motors. A diploma holder has to work in various fields such as manufacturing industries, State Electricity boards, Power Generation Stations, etc. His work involves operation control and maintenance of electrical machines. He should therefore know the working principle, constructional features, and performance of AC machines. Transformer is one of the most important devices of electrical power system. It has imparted more flexibility to AC system than DC system, due to which the AC system is widely preferred over DC system in most of the applications. Since technicians are expected to work with various electrical / electronic systems involving transformer, it is highly essential to provide them necessary knowledge about construction, operation & testing of transformer with mathematical background. This course aims at strategic development of students so that they can understand, operate, use & test the transformer as per the requirement.

#### **Course Outcomes:**

| EE 16 212.1 | State the principle of electromechanical energy conversion  |
|-------------|---|
| EE 16 212.2 | State working principle and identify the different parts of DC generator, DC motor<br>and Transformer |
| EE 16 212.3 | Clarify material used for different parts of DC generator, DC motor and Transformer,                  |
| EE 16 212.4 | Compare different types of DC Generators, DC Motor and transformers                                   |
| EE 16 212.5 | Compare the characteristics of various DC generator and DC motors                                     |
| EE 16 212.6 | Solve Equivalent circuit and find losses, voltage regulation and efficiency of transformer            |
| EE 16 212.7 | Select proper DC machine and transformer for particular application                                   |

| Unit | Topics/Subtopics  |
|------|---|
| No.  |   |
|      | Introduction to D. C. Machine   |
| 1    | 1.1 Principles of Electromechanical Energy Conversion                           |
|      | 1.2 Necessity of DC machines  |
|      | 1.3 Constructional parts of D. C. machine and their functions.                  |
|      | 1.4 Winding Terms: i. e. terms related to windings, types of armature windings, |
|      | difference between Lap & Wave winding. (No Numerical)                           |
|      |   |
|      | D. C. Generator.  |

| 2 | 2.1 Working principles of DC generators   |
|---|---|
|   | 2.2 Types of DC generators.   |
|   | 2.3 E. M. F. equation & voltage equation of DC generator                            |
|   | 2.4 Losses in DC generator  |
|   | 2.5 Power stages of DC generator  |
|   | 2.6 Characteristics of DC generators  |
|   | 2.7 Armature reaction   |
|   | 2.8 Commutation, methods to improve commutation.                                    |
|   | 2.9 Applications of shunt, series and compound generator.                           |
|   | (Simple numerals on above)  |
|   | D. C. Motor.  |
| 3 | 3.1 Working principle of DC motor   |
|   | 3.2 Concept and significance of back emf.   |
|   | 3.3 Torque expression, voltage equation, speed regulation                           |
|   | 3.4 Characteristics & applications of DC motor, (shunt, series compound)            |
|   | 3.5 Power Stages in D. C. Motor (Numerical)   |
|   | 3.6 Speed control of D. C. Motor (Numerical)  |
|   | 3.7 Starters of DC motor- Necessity, Three & Four point starter, simple numerals on |
|   | above.  |
|   | Single phase transformer.   |
| 4 | 4.1 Introduction, Working principle of transformer,                                 |
|   | 4.2 Constructional parts and their functions.                                       |
|   | 4.3 Materials used for construction.  |
|   | 4.4 Classification of transformer.  |
|   | 4.5 EMF equation of transformer (derivation), Transformation ratio,                 |
|   | 4.6 Concept of ideal transformer.   |
|   | 4.7 Transformer on no load- Vector diagram & numerical.                             |
|   | 4.8 Transformer on load – phasor diagram of loaded transformer                      |
|   | 4.9 Magnetic leakage and kVA capacity of transformer.                               |
|   | 4.10 Equivalent circuit diagram of transformer.                                     |
|   | 4.11 Efficiency & Losses in Transformer and regulation of transformer               |
|   | 4.12 Method to find losses and efficiency and regulation of transformer (OC & SC    |
|   | test).  |
|   | 4.13 All day efficiency of 1-phase transformer.                                     |
|   | 4.14 Single phase Autotransformer, principles, advantages and disadvantages         |
|   | 4.15 Polarity of transformer.   |
|   | 4.16 Isolation Transformer  |
|   | 4.17 Simple numerals on above   |
| _ | Three Phase transformer.  |
| 5 | 5.1 Construction with function of each part.  |
|   | 5.2 Connections & their importance  |
|   | 5.3 Vector groups   |
|   | 5.4 Three Phase auto transformer  |
|   | 5.5 Applications of all types (Numerical on calculations of V, I & kVA capacity)    |
|   | 5.6 Concept and fundamentals of instrument transformer                              |

# Suggested specification table with Hours and Marks (Theory)

| Unit | т. • <b>т</b> .ч.1            | Teaching | Distribution of Theory Marks |       |       |       |  |

#### **Rationale:**

In the present scenario acquiring the technical knowledge is not sufficient, but every technocrat should be aware about his own professional progress to become a successful engineer in his carrier. He should know how to prepare his own CV, how to take part in group discussions, interview facing techniques, how to prepare a more interactive presentation, these all will help to improve his personality for the better success in his growing age. Industry visits, expert lectures from professionals and industry expert should really add for the job working progress.

#### Course Outcomes: (CO's)

| EE16 501.1 | Know his professional and social aim.  |
|------------|--|
| EE16 501.2 | Prepare own bio-data and various interview techniques.                         |
| EE16 501.3 | Know the importance of group discussion, presentation and latest job profiles. |
| EE16 501.4 | Plan industry visits, expert lectures for better practical experience.         |

#### **Contents:**

#### 1. Know Yourself

- 1.1 My Aim
  - 1.1.1 Professional Aim
  - 1.1.2 Social Aim and Awareness
  - 1.2 C.V. (Curriculum Vitae)
    - 1.2.1 Personality
    - 1.2.2 Behavior
    - 1.2.3 Personal Bio-data
  - 1.3 Group Discussion
    - 1.3.1 Importance of Group Discussion
    - 1.3.2 Making Groups as per the strength in the class and allocating the latest topics for discussion and write the report.
      - 1.3.2.1 Technical education and society
      - 1.3.2.2 Electrical energy sources
      - 1.3.2.3 All types of pollution
      - 1.3.2.4 Government industrial policies
      - 1.3.2.5 Any other related topic

#### 2. Seminar Presentation

- 2.1 Collection of information related to our course on any topic
- 2.2 Use books, websites, journals, magazine, field knowledge from experts etc.
- 2.3 Present this information through PPT. (Min 5 and max 7)

#### 3. Presentation of Professionals / Industry Experts

- 3.1 Why these presentations are necessary
- 3.2 How this will Help you to know more than your curriculum
- 3.3 Arrange minimum two expert lecturers for two hour session on various topics by these experts.
  - 3.3.1 Role of electrical engineer in Industry
  - 3.3.2 Scope and Industry culture
  - 3.3.3 Electrical Safety
  - 3.3.4 Industrial Drives and Control
  - 3.3.5 Any latest topic related to electrical engineering
- 3.4 Students should prepare a report as a part of term work.

#### 4. Industry Visits

- 4.1 Types of Industries and their purposes
  - 4.1.1 Manufacturing and Processing
  - 4.1.2 Trading and Marketing
  - 4.1.3 Services to the People and Maintenance
  - 4.1.4 Importing and Exporting
- 4.2 How small, medium and large-scale industries are different.
- 4.3 At least one visit should be organized to any of the following mentioned industries and write a report.
  - 4.3.1 Generating Station, Substation, Load Dispatch center, Switch gear manufactures, Motor

Generator manufactures Electrical sections of various industries etc.

- 5. Today's Job Profiles and Interview Techniques
  - 5.1 Current Market Survey to find the Job
  - 5.2 Your area of Interest to Apply and Preparation
  - **5.3** Make a report on various techniques as a part of term work.

#### Suggested specification table with Hours and Marks (Theory)

| Unit |   | Teaching | Distribution of Theory Marks |       |       |       |  |  |
|------|---|----------|------------------------------|-------|-------|-------|--|--|
| No   | Topic Title                                   | Hours    | R                            | U     | A     | Total |  |  |
|      |   |          | Level                        | Level | Level | Marks |  |  |
| 1    | Know Yourself                                 | 6        |                              |       |       |       |  |  |
| 2    | Seminar Presentation                          | 6        |                              |       |       |       |  |  |
| 3    | Presentation of Professionals / Industry      | 4        |                              |       |       |       |  |  |
|      | Experts                                       |          |                              |       |       |       |  |  |
| 4    | Industry Visits                               | 12       |                              |       |       |       |  |  |
| 5    | Today's Job Profiles and Interview Techniques | 4        |                              |       |       |       |  |  |
|      | Total   | 32       |                              |       |       |       |  |  |

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

**Notes:** This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.

#### Suggested Implementation Strategies:

- 1. Lecture method
- 2. Improved lecture method.
- 3. Expert Lecturers
- 4. Q & A technique with Group Discussion.

- 5. Demonstration
- 6. Seminars
- 7. Field visit

#### Suggested Learning Resources:

- 1. Print: Text Books/Reference Books/Manuals/Journals.
- 2. Non Print: CDs / PPT / Transparencies / Charts / Models/ Webs

#### **Reference Books:**

| Sr.<br>No. | Name of Book  | Name of Author                   | Publications |
|------------|---|----------------------------------|--------------|
| 1          | A professional practice course of EE's<br>[electrical engineering]                      | Nagurney L.S. and Frochlich J.P. | IEEE         |

# **Rationale:**

Working knowledge domestic appliances should be learnt by every electrical engineer. Engineers should be well versed with installation and maintenance procedure of the domestic appliances, rating of cable/wire/fuse/mcb, power supply specification, earthing, and specific safety requirement for the particular appliance. Standard and basic electrical tools need to be practiced. This subject is intended to develop skills of maintenance, testing and fault finding of domestic appliances with following course outcomes. These outcomes will be satisfied, when students actually performs the laboratory work.

#### **Course Outcomes:**

| EE16301.1 | Apply safe working practices  |
|-----------|---|
| EE16301.2 | Comply environment regulation and housekeeping  |
| EE16301.3 | Interpret & use company terminology, product catalogue and technical communication          |
| EE16301.4 | Make basic electrical / electronic circuits / connections and measure Electrical parameters |
| EE16301.5 | Carryout & test simple domestic wiring system with Earth continuity                         |
| EE16301.6 | Test & Repair Domestic appliances   |

| Unit | Topics/Subtopics  |
|------|---|
| No.  |   |
| 1    | Safety Practices  |
|      | 1.1 □Fires in electrical Circuits & Precautions                                   |
|      | 1.2 Fire Extinguishers & its Types  |
|      | 1.3 □General Safety of Tools & equipment which are used while testing, repairing  |
|      | and maintenance of electrical gadgets   |
|      | 1.4 Environment requirement of electrical installation of domestic appliances and |
|      | house keeping   |
|      | 1.5 Rescue of person who is in contact with live wire                             |
|      | 1.6 Treat a person for electric shock/ injury                                     |

| 2 | Revision of basic electricity and electronics   |
|---|---|
|   | 2.1 Single phase & three phase circuits   |
|   | 2.2 Electrical terms like Voltage, Currents, Resistance, Impedance & power factor   |
|   | 2.3 Familiarization with electronic components like Capacitor, Choke coil, Diode,   |
|   | Transistor, Thyristor, IGBT   |
|   | 2.4 Concept of open circuit and short circuit in the circuit diagram and  |
|   | installations   |
|   | 2.5 Series & Parallel Circuits  |
|   | 2.6 Direct current & Polarity testing   |
|   | 2.7 Alternating Current & identifying phase, neutral and earth terminals  |
|   | 2.8 Interpret the components as per circuits and laying components on PCB   |
|   | Testing of assembled PCB  |
|   | 2.9 Concept of earthing, purpose & types. □Introduction to Pipe earthing & Plate  |
|   | earthing, Earthing of domestic installation, earth continuity conductors  |
|   |   |
| 3 | Wiring & its concepts   |
|   | 3.1 Conductors, Insulators & its types  |
|   | 3.2 Crimping & Crimping Tools, Soldering  |
|   | 3.3 Joints in electrical conductor, end termination : Using glands, lugs, pin   |
|   | terminal and terminal connectors  |
|   | 3.3 Concept of gauge of wire, conductor material & its current carrying capacity  |
|   | 3.5 Determination of Fuse size according to the load of circuit and its location  |
|   | On single line diagram of domestic installation upto switch socket  |
|   | 5.0 Rating and specification of electrical cond, nextble cables, whes, single phase $6A/16A$ plug & socket. Terminal connection of switch socket and Plug |
|   | top MCBs ELCB Euses resistors inductors capacitor   |
|   | 3.7 Concept of different types of switchgears used in general Electrical  |
|   | installations   |
|   | 3.8 Use of Megger & Test lamps in fault location  |
|   |   |
| 4 | Domestic Appliances   |
|   | 4.1 Voltage and Power requirement of all kinds of home appliances   |
|   | 4.2 Symbols, Diagram & Rules, Study of product catalogues Does and Don'ts   |
|   | related to gadget, Service log book, test certificate, Report of service  |
|   | 4.3 Basic construction and assembly of electric iron, heater and fan  |
|   | 4.4 Basic construction and assembly of mixer, grinder, blender and OTG  |
|   | 4.5 Basic construction and electrical parts of washing machine, microwave oven,   |
|   | refrigerator and dish washer  |
|   | 4.6 Repair and service technique of home appliances and battery Maintenance   |
|   | 4.7 Types/rating of batteries and their application in inverter and UPS   |
|   | 4.8 Construction and parts of lead acid/ maintenance free battery. Specific gravity   |
|   | of battery  |
|   | 4.9 Process of discharging and recharging of battery  |
|   | 4.10 Battery chargers and precautions are to be taken while charging  |
|   |   |

| Sr.No | Unit | Experiment/Assignment  | Approx<br>Hours |
|-------|------|--|-----------------|
| 1     | 1    | To understand signs and notices which are observed in factory<br>and domestic electrical installation regarding electrical safety.   | 04              |
| 2     | 1    | To demonstrate dousing of fire caused electrical short circuit   | 04              |
| 3     | 1    | To identify proper electrical tool/equipment for general or specific purpose and practice its safe handling.   | 04              |
| 4     | 1    | To demonstrate rescue of person who is in contact with live wire   | 04              |
| 5     | 1    | To demonstrate first aid treatment to a person who receives electric shock/ injury   | 04              |
| 6     | 2    | To set up simple electrical connections using resistance, voltmeter, ammeter & multimeter for single phase and three phase circuit.  | 04              |
| 7     | 3    | To set up one board with fuse, switch and switch socket to<br>practice of electrical joints, crimping, end termination along with<br>test of continuity, polarity and insulation | 04              |
| 8     | 2    | To construct, solder, and test a simple circuit by using electronic components.  | 04              |
| 9     | 2    | To prepare and test electronic choke & CFL assembly,led  | 04              |
| 10    | 3    | To demonstrate good earthing of domestic installation and earth continuity conductors by measuring voltages between P-N, P-E and N-E   | 04              |
| 11    | 4    | To understand different electrical appliances, their circuit diagrams, faults finding and repairing. Equipment are listed from 11.1 to 11.9                                      | 04              |
| 11.1  | 4    | Electric Iron  | 04              |
| 11.2  | 4    | Electric Hot Plate   | 04              |
| 11.3  | 4    | Single phase invertor  | 04              |
| 11.4  | 4    | Electric Room Heater   | 04              |
| 11.5  | 4    | Electric Fan   | 04              |
| 11.6  | 4    | Electric water Heaters   | 04              |
| 11.7  | 4    | Electric Bell  | 04              |
| 11.8  | 4    | Electric Mixer Grinder   | 04              |
| 11.9  | 4    | Fluorescent lamp (FTL) with magnetic and electronic choke  | 04              |

# List of Practical : (All experiments from 1 to 10. And any six from 11.1 to 11.9)

#### **RATIONALE:**

This course is introduced with a view that the students will be exposed to various types of Transducers, signal conditioning and recording system to measure the process parameters. After completion of this course student will gain sufficient knowledge of process measurement.

#### **Course Outcomes:**

Upon completion of this course, students should be able to,

| EE16302.1 | Identify, list and classify different transducers.                             |
|-----------|--|
| EE16302.2 | Draw the Input/output characteristics of transducers.                          |
| EE16302.3 | Demonstrate and verify the transduction principles of transducers.             |
| EE16302.4 | Measure the process parameters such as Temperature, pressure, level, flow etc. |
| EE16302.5 | Select the relevant transducers and recorders for the given application.       |

#### **Course Content Details:**

#### **Rationale:**

This is the subject where the principles of electrical transmission and distribution systems are studied. Knowledge of components of electrical transmission and distribution system and their functions is necessary for understanding power system performance. Study of load dispatch and HVDC transmission is also important for working in power sector or industry.

#### **Course Outcomes:**

Upon completion of this course, students should be able to,

| EE16 303.1 | Know various types of transmission & distribution systems.                     |
|------------|--|
| EE16 303.2 | Understand importance of load dispatch centre.                                 |
| EE16 303.3 | Identify various components & their functions of transmission and distribution |
|            | systems.   |
| EE16 303.4 | Calculate string efficiency of insulator and transmission efficiency           |
| EE16 303.5 | Calculate the performance of transmission and distribution system.             |
| EE16 303.6 | Draw and explain the phasor diagram of short & medium transmission line.       |
| EE16 303.7 | Know about HVDC Substation and its types.                                      |

#### **Course Content Details:**

| Unit No | <b>Topics / Sub-topics</b>  |
|---------|---|
|         | Introduction to Transmission:   |
| 1       | 1.1 A.C. and D.C. transmission.   |
| -       | 1.2 Advantages and disadvantages.   |
|         | 1.3 National, Regional and State Load Dispatch Centers.                               |
|         | 1.4 Introduction to grid and different voltage levels for HVAC and HVDC.              |
|         | 1.5 Compare between HVAC & HVDC   |
|         | Transmission line components:   |
| 2       | 2.1 Introduction to line component.   |
|         | 2.2 Types of conductor- Al, ACSR, Cu and solid stranded bundle conductors.            |
|         | 2.3 Line supports – requirement, type. Construction of supporting structures, Towers, |
|         | monopoles   |
|         | 2.4 Spacing between conductors.   |
|         | 2.6 Concept of length of span.  |
|         | 2.7 Sag in overhead line.   |
|         | 2.8 Calculations of sag: effect of wind and ice loading (Simple Numerical)            |
|         | 2.9 Types of insulator – Pin, Suspension, Strain, Stay, Shackle.                      |
|         | 2.10 Safety factor, puncture and ultimate strength.                                   |

|   | 2.11 Potential distribution over a string of suspension insulator   |
|---|---|
|   | 2.11 Folchuar distribution over a sume of suspension insulator.   |
|   | 2.12 Shiple humerical off string efficiency.  |
|   |   |
|   |   |
| 3 | Transmission line parameters:   |
|   | 3.1 Constants of transmission lines   |
|   | 3.2 Skin effect   |
|   | 3.3 Transposition of conductor and necessity.   |
|   | 3.4 Corona  |
|   | 3.4.1 Factors affecting corona.   |
|   | 3.4.2 Important terms   |
|   | 3.4.3 Advantages and disadvantages of corona.   |
|   | 3.4.4 Methods of reducing corona effect   |
| 4 | Performance of transmission line:   |
|   | 4.1 Classification of transmission line, Important terms, regulation & efficiency of T/L  |
|   | 4.2 Short transmission line, eq. circuit representation & phasor diagram &  |
|   | analysis. (Simple Numerical)  |
|   | 4.3 Medium transmission line, End condenser method, Nominal T and $\pi$   |
|   | circuit representation & analysis, phasor diagram.  |
|   | 4.4 Ferranti effect.  |
|   | 4.5 Introduction of Long transmission line.   |
| 5 | High Voltage DC Transmission  |
|   | 5.1 Principle of HVDC system  |
|   | 5.2 Types of DC link (Block diagram, components & description)  |

#### Suggested Specifications Table with Hours and Marks (Theory):

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

**Notes:** This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.

#### List of experiments/Assignments:

| Sr.<br>No. | Unit | Experiment/Assignment  | Approx. Hours |
|------------|------|--|---------------|
| 1          | 1    | Introduction to MATLAB   | 04            |
| 2          | 1,2  | Study of basic tools required for Electrical Engg.                                   | 04            |
| 3          | 3    | Simulation of simple R,L,C of single phase circuit.                                  | 04            |
| 4          | 3,4  | Simulation of short Transmission Line  | 04            |
| 5          | 3,4  | Simulation of Numerical 'T' circuit representation of medium transmission line       | 04            |
| 6          | 3,4  | Simulation of Numerical ' $\pi$ ' circuit representation of medium transmission line | 04            |
| 7          | 6    | Simulation of distribution system – radial/ ring mains.                              | 04            |
| 8          | 8    | Simulation of Power factor improvement using FACTS devices                           | 04            |
|            |      | Total  | 32            |

#### **Rationale:**

The electrical supervisor / technician are expected to possess knowledge of utilization of electrical energy especially in the industry. Their main job functions are to supervise the operation & control of various electrical drives, electrical furnaces. Railway is one of the major employers of Electrical Diploma holders; therefore, Diploma holder should also study the electrical traction and Electric Traction system. This course deals with utilization of electrical energy in various industries.

#### **Course Outcomes:**

The students will be able to

| EE16304.1 | Define terminologies used in illumination.   |
|-----------|--|
| EE16304.2 | Select suitable lighting, lighting schemes and sources of light for specific applications. |
| EE16304.3 | Identify suitable methods of electric heating for specific applications.                   |
| EE16304.4 | Choose Electric Drive for specific applications.   |
| EE16304.5 | Preliminaries of track Electrification systems with equipment.                             |

| Contents:   |
|---|
| : Illumination:   |
| <ul> <li>Definitions of Terms used in Illumination-Light, Luminous flux, Luminous Intensity,<br/>Lumen, Illuminance or Illumination or Degree of illumination, Mean Horizontal Candle<br/>Power (M.H.C.P.), Mean Spherical Candle Power (M.S.C.P.), Mean Hemispherical<br/>Candle Power (M.H.S.C.P.), Reduction Factor, Foot candle, Lux, Nit, Stilb, Brightness.</li> <li>Laws of Illumination<br/>(simple numerical)</li> <li>Diffusing and Reflecting Surfaces: Globes and Reflectors</li> <li>Types of Lighting Schemes-Direct, Semi-Direct, Semi-Indirect, Indirect, General<br/>Lighting.</li> <li>Factory Lighting - General Requirement, Types of installations: General Lighting, local<br/>lighting, Emergency Lighting.</li> <li>Flood Lighting - Flood Lighting purposes, Classification of projectors, Location and<br/>mounting of projectors.</li> <li>Introduction of Street Lighting.</li> </ul> |
| : Sources of Light:   |
| - Incandescent Lamps  |
| - Halogen Lamps.  |
| - Low Pressure Mercury Vapour Lamps (Fluorescent Tube).   |
| - High Pressure Mercury Vapour Lamps.   |

- Sodium Vapour Lamps.

- Compact Fluorescent Lamps (C.F.L.)
- Metal Halide Lamps
- LED Lamps
- Neon Signs.
- Introduction to LASERS

#### **3 : Electric Heating :**

- Advantages of Electric Heating.
- Modes of Transfer of Heat:
- Classification of Electric Heating Methods:
- Resistance Heating: Construction & Operation, Direct Resistance Heating Salt Bath Furnace, Indirect Resistance Heating: Resistance Ovens, Requirements of Heating Element Material, Causes of Failure of Heating Elements, Methods of Temperature Control, Applications of Resistance Heating, Design of Heating Element. (Simple Numerical problems on heating elements)
- Arc Heating Construction & Operation, Direct Arc Furnace, Indirect Arc Furnace, Applications of Arc Heating.
- Induction Heating Construction & Operation Core Type Induction Furnaces: Ajax Wyatt Furnace, Coreless Induction Furnace, Applications of Induction Heating, High frequency eddy current heating. Radiant & infrared heating, Estimation of Heat data. (Simple Numerical problems on rating of furnace.)
- Dielectric Heating: Principle of Dielectric Heating, Advantages of Dielectric Heating
- Limitations of Dielectric Heating, Applications of Dielectric Heating.

#### 4 : Electric Drives:

- Introduction: What is drive?
- Drives Mechanical Drive and Electric Drive, Advantages and Disadvantages of Electric Drive.
- Factors Governing Selection of Electric Motors, Nature of Electric Supply 3 phase& 1 phase AC and DC, Type of Drive: Group Drive & Individual Drive.
- Nature of Load: Nature of the Mechanical Load, Matching of the Speed Torque Characteristics of the Motor with that of the Load, and Starting Conditions of the Load.
- Braking Characteristics Plugging, Rheostatic Braking and Regenerative Braking, as Applied to DC Series and Three Phase Induction Motor.
- Mechanical Features Type of Enclosure as per IS. Type of Bearings, Type of Transmission for Drive, Noise Level.
- Size of Motor Load Conditions Continuous Loads, Short Time Loads, Intermittent Loads, Continuous Operation with Short Time Loads and Continuous Operation with Intermittent Loads.
- Duty Cycles
- Standard Ratings for Motors as per ISS.
- Load Equalisation (No Calculations).

#### **5** : Electric Traction:

- Introduction to Traction System, Requirements of an Ideal Traction System, Non-electric Traction Systems, Electric Traction Systems, Advantages and Disadvantages of Electric Traction Systems.
- Systems of Track Electrification
- Block diagram of AC locomotives with description of various equipment and accessories
- Working principal, advantages and disadvantages of Mono Rail and Metro Railways.
- Introduction of Diesel Multiple Unit (DMU), Electrical Multiple Unit (EMU) and Main Line Electrical Multiple Unit (MEMU)

#### List of Practical's (Any 8)

| Sr. | Unit | Experiment/Assignment  | Approx. |
|-----|------|--|---------|
| No  | No.  |  | Hours   |
| 1   | 1    | Measure Illumination at various places within the college premises by lux-<br>meter.                           | 4       |
| 2   | 1    | Prepare a report by observing different lighting schemes at various sites / locations.                         | 4       |
| 3   | 2    | Prepare a survey report after collecting technical information of various lamps available in the local market. | 4       |
| 4   | 2    | Prepare an industrial visit report after visiting nearby lamp manufacturing industry.                          | 4       |
| 5   | 3    | Prepare a report on electrical heating furnace after visiting the industry.                                    | 4       |
| 6   | 4    | Select the appropriate motors and justify the selection for given different load situations. (at least two)    | 4       |
| 7   | 4    | Make a report by comparing various electrical drives for traction.   | 4       |
| 8   | 5    | Prepare a report visiting nearby electric traction sub-station.  | 4       |
| 9   | 5    | Prepare a report by comparing Metro and Mono Rail for public transport.  | 4       |
| 10  | 5    | Prepare a report on various equipment's and accessories used in AC Locomotives.                                | 4       |

#### Suggested specification table with Hours and Marks (Theory)

| Unit<br>No | Topic Title       | Teaching | Distribution of Theory Marks |            |            |                |  |
|------------|-------------------|----------|------------------------------|------------|------------|----------------|--|
|            |                   | Hours    | R<br>Level                   | U<br>Level | A<br>Level | Total<br>Marks |  |
| 1          | Illumination      | 8        | 4                            | 4          | 4          | 12             |  |
| 2          | Sources of Light  | 10       | 4                            | 6          | 4          | 14             |  |
| 3          | Electric Heating  | 12       | 6                            | 4          | 8          | 18             |  |
| 4          | Electric Drives   | 12       | 8                            | 4          | 4          | 16             |  |
| 5          | Electric Traction | 6        | 6                            | 4          |            | 10             |  |
|            |                   | 48       | 28                           | 22         | 20         | 70             |  |

**Legends:** R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy). *Notes:* This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified

#### **Rationale:**

This subject is applied technology subject. It teaches students facts, concepts, principles & procedure for operations of electrical machines such as induction motor, alternator and synchronous motor. Student will be able to analyze the characteristics and qualitative parameters of these machines. The knowledge and skills obtained will be helpful in discharging technical functions such as maintenance, supervision, and controlling in the industry.

#### **Course Outcomes:**

| EE16307.1 | Demonstrate the constructional details & explain working principal of various types |
|-----------|---|
|           | of ac machines.   |
| EE16307.2 | Solve Equivalent circuit parameters and construct the circle diagram of induction   |
|           | motor.  |
| EE16307.3 | Explain armature reaction, parallel operation and find voltage regulation of        |
|           | alternator.   |
| EE16307.4 | Examine effect of excitation and plot curves of synchronous motor.                  |
| EE16307.5 | Compare Induction motor and synchronous motor.                                      |
| EE16307.6 | Select proper rating of motors for particular application.                          |

#### **Contents:**

| contents.                                |  |  |
|--|--|--|
| 1: Introduction to AC Rotating Machines: |  |  |
| 1.1                                      | Introduction to AC rotating machines.  |  |
| 1.2                                      | General information of three phase machines.   |  |
| 1.3                                      | Difference between AC and DC Machines.   |  |
| 2: Three Phase Induction Motor:          |  |  |
| 2.1                                      | Working principle of 3-phase I.M.  |  |
| 2.2                                      | Construction and types of 3- phase induction motor.                                      |  |
| 2.3                                      | Comparison between squirrel-cage and slip-ring induction motor.                          |  |
| 2.4                                      | Production of rotating magnetic field.   |  |
| 2.5                                      | Three phase induction motor speed, slip, frequency, rotor frequency and their relations. |  |
|  | (Simple Numerical)   |  |
| 2.6                                      | Equation of rotor induced emf, current, frequency, reactance, and                        |  |
|  | impedance under steady and running condition. (Simple Numerical)                         |  |
| 2.7                                      | Torque equation of three phase induction motor. (Simple Numerical)                       |  |
| 2.8                                      | Starting and running torque of squirrel cage and slip ring induction                     |  |
|  | motor.   |  |
| 2.9                                      | Condition for maximum and starting torque.   |  |
| 2.10                                     | Torque slip characteristics of three phase induction motor.                              |  |
| 2.11                                     | Effect of change in rotor circuit resistance on torque-slip characteristics.             |  |
| 2.12                                     | Effect of change in supply voltage on torque-slip characteristics.                       |  |
| 2.13                                     | Torque Ratios (Numerical)  |  |
|  | 2.13.1 Starting torque to Maximum torque   |  |
|  | 2.13.2 Full load torque to Maximum torque  |  |

# 3: Three Phase Induction Motor – Starters, Speed Control & Circle diagram.

- 3.1 Need of starters
- 3.2 Various starters used to start 3-phase IM Starting of squirrel cage and slip ring induction motor. Compare starters with DOL starter (simple numerical)
- 3.3 Speed control of three phase induction motor by
  - Pole changing method
  - Frequency control method
  - By stator voltage control
  - Rotor resistance control (Simple Numerical)
- 3.4 Applications of three phase induction motor.
- 3.5 Power stages of three phase induction motor.
- 3.6 I.M. as a generalized transformer.
- 3.7 Equivalent Circuit of 3-phase IM.
- 3.8 Construction of Circle Diagram
  - Importance of circle diagram
  - No load test and Blocked rotor test on 3-phase IM
  - Construction of the circle diagram. (Numerical)

#### 4: Three Phase Alternator:

- 4.1 Construction of three phase Alternator
  - Rotor- smooth cylindrical & projected type
- 4.2 Advantages of stationary armature construction
- 4.3 Derivation of e.m.f. equation of Alternator which includes
  - Chording factor
    - Distribution factor
    - (Simple Numerical)
- 4.4 Factors affecting the terminal voltage of Alternator
  - Armature resistive drop
  - Leakage reactance drop
  - Armature reaction at various power factors & concept of Synchronous impedance
- 4.5 Regulation of three phase Alternator by
  - Synchronous impedance method
  - mmf method. (Simple Numerical)
- 4.6 Parallel operation of three phase alternator.
- Synchronizing by 1) One dark two bright lamp method, 2) Synchroscope.

#### 5 : Synchronous Motor:

- 5.1 Construction.
  - 5.2 Characteristics of synchronous motor.
  - 5.3 Principle of operation.
  - 5.4 Starting of Synchronous Motor.
  - 5.5 Synchronous Motor on load with constant excitation. (Simple Numerical)
  - 5.6 Effect of excitation at constant load. (Simple Numerical)
  - 5.7 Starting Methods.
    - Power flow within a synchronous motor.
    - V curve & inverted V curve. (Simple Numerical)
  - 5.8 Applications.
  - 5.9 Comparison between IM & Synchronous Motor.

#### **6: Single Phase Motors:**

- 6.1 Double field revolving theory.
- 6.2 Types of Single-phase IM.
- 6.3 Split phasing principle of starting.
| 6.4 | Principle of working, schematic diagram and applications of |
|-----|---|
|     | following motors  |
| -   | Resistance start induction run                              |
| -   | Capacitor start induction run                               |
| -   | Capacitor start Capacitor run                               |
| -   | Shaded pole   |

#### List of Practical:

| Sr. | Unit | Experiment/Assignment  | Approx. |
|-----|------|--|---------|
| No  | No.  |  | Hours   |
| 1   | 2    | To measure the slip of 3-phase induction motor by:                           | 2       |
|     |      | i) Tachometer ii) Comparing rotor & stator frequency.                        |         |
|     | 3    | To use different types of starters to start and run 3-phase induction motor. | 2       |
| 2   |      | i) D.O.L. starter, ii) Stator resistance starter, iii) Star-Delta starter,   |         |
|     |      | iv)Auto transformer starter, v)Rotor resistance starter.                     |         |
| 3   | 3    | To measure the performance of 3-phase induction motor by direct loading.     | 4       |
| 1   | 3    | Perform no load test and block rotor test on 3-phase induction motor, to     | 4       |
| 4   |      | construct the circle diagram.  |         |
| 5   | 3    | To study the Double cage IM.   | 2       |
| 6   | 4    | To perform O.C.C. of the alternator  | 2       |
| 7   | 4    | To determine the percentage regulation of 3-phase alternator by              | 4       |
| /   |      | synchronous impedance method at Various power factors.                       |         |
| 8   | 4    | To perform parallel operation of three phase alternator.                     | 4       |
| 0   | 4    | To find the percentage regulation of 3-phase alternator by direct loading    | 4       |
| 9   |      | method at various power factors.   |         |
| 10  | 5    | To start the synchronous motor by applying any one starting method. Plot     | 4       |
| 10  |      | V & inverted V curve of the same.  |         |

## **Survey Project:**

To list the various types of 1-phase induction motor. Collect the literature for them from dealers / manufacturers of local places & compare on the following points

 Method of starting ii) Cost iii) Performance iv) Starting torque etc.

and prepare a report.

#### Suggested specification table with Hours and Marks (Theory)

## 1. RATIONALE :

Due to the extensive use of energy the conventional energy sources like fossil fuel are depleting very fast & the thrust is to be given on renewable energy sources for power generation. An Electrical Engineer should be aware of methods of extracting energy from Non Conventional energy sources like Solar, Wind, Geothermal etc.

Energy is an important aspect in all sectors of country's economy. The energy crisis is mainly caused due to increased population and enhanced standard of living and life style of people. The conventional sources of energy are insufficient to meet these demands. Hence, alternative energy sources are utilized for power production. The use of alternate energy sources is increasing day by day. Diploma engineers are expected to develop, operate and maintain these systems. It is therefore essential to know basics of energy conversion, conservation, and energy audit and waste heat recovery techniques.

## **Course Outcomes:**

| EE16406.1 | State the various methods of energy conversion from solar energy & its applications.   |
|-----------|--|
| EE16406.2 | State the various methods of energy conversion from wind energy & its applications.  |
| EE16406.3 | State the various methods of energy conversion from ocean energy, geothermal energy, biomass & other sources of renewable energy |

| Unit<br>No. | Topics / Sub-topics  |
|-------------|--|
|             | Energy scenario and development:   |
| 1           |  |
|             | 1.1 Overview of world energy scenario  |
|             | 1.2 Overview of India's energy scenario  |
|             | 1.3 Energy Sources: classification of energy sources                                 |
|             | 1.5 Need and Prospectus of Alternate Energy Sources                                  |
|             |  |
| 2           | Solar energy   |
| Z           | 2.1Principle of conversion of solar radiation into Heat and Electricity.             |
|             | 2.2 Solar radiation Geometry: Declination, hour Angle, Altitude angle, incident      |
|             | angle, Zenith angle, solar Azimuth angle   |
|             | 2.3 Instruments for measuring solar radiation (explanation of only Pyranometer)      |
|             | 2.4 Construction and working of typical flat plate collector, solar concentrating    |
|             | collector and their applications, Advantages and Limitations                         |
|             | 2.5 Space Heating and Cooling (only vapour absorption system)                        |
|             | 2.6 Construction and working of solar cell, performance characteristic of solar cell |
|             | 2.7 Solar Photo voltaic Electric Conversion (Stand alone and Grid connected          |

|   | system)<br>2.8 Introduction to MPPT (no details)   |
|---|--|
|   | 2.9 Solar pond, solar electric power generation (explanation of only high temperature system). Solar Distillation. Solar cooking                               |
|   | 2.10 Solar pumping and Green House   |
|   | (No numerical on above content)  |
| 3 | Wind energy  |
|   | 3.1 Principle of Wind energy conversion, Nature of the wind energy.  |
|   | 3.2 Power in wind, Power coefficient, Maximum power, Forces on the blades, Wind Energy Conversion  |
|   | 3.3 Selection of site for wind mill.   |
|   | 3.4 Classification of WEC systems.<br>3.5 Advantages and limitations of WECS   |
|   | 3.6 Basic components of WECS.  |
|   | 3.7 Wind energy collectors- Horizontal and Vertical axis machines,   |
|   | (No numerical on above content)  |
| 4 | Bio-mass energy  |
| 4 | 4.1 Biomass conversion technologies - 1) combustion 2) Thermo chemical 3)  |
|   | Biochemical. Wet processes, Dry processes.   |
|   | 4.2 Biogas generation – anaerobic digestion,<br>4.3 Types of Bio-gas plants, KVIC Digester, fixed dome digester, Deenbhandu,                                   |
|   | Pragati Biogas plant.  |
|   | 4.4 Materials used for biogas generation. Selection of site for biogas plant.<br>Applications. Energy plantation.  |
|   | Energy from the oceans   |
| 5 | 5.1 Ocean Thermal Electric Conversion-Methods of Power Generation, Open and  |
|   | closed cycle OTEC system<br>5.2 Tidal power –Basic Principle, Components of Tidal Power Plants,  |
|   | 5.3 Operation Methods-single basin and double basin  |
|   | 5.4 Advantages and limitations for tidal power Generation<br>5.5 Sites Requirements, Prospects of tidal energy in India.                                       |
|   |  |
| 6 | Other alternate sources of energy  |
|   | 6.1 Geothermal Energy –Sources, Principle, Hydrothermal Resources, Geothermal<br>energy power plant, Advantages ,Limitation and application of Geothermal      |
|   | Energy, Geothermal occurrence in India   |
|   | 6.2 Small Hydroelectric Plant(Mini and Micro hydel) Nature, Classification of SHP<br>station, Components of SHP, Design Consideration for Mini and Micro Hydel |
|   | Projects, Advantages and Limitation of SHP   |
|   | 6.3 Fuel Cell- Principle of Operation, Classification, Advantages, Limitation and Application of Fuel cell   |
|   | 6.4 Magneto-Hydro Dynamic(MHD) Power Generation- Principles, MHD system,   |
|   | Advantages, Future Prospects   |

|      |                                   |          | <b>Distribution of Theory</b> |       |       |       |  |  |

## **RATIONALE:**

All the equipments, installations, circuits and other electrical and electronic systems in commercial, power and industrial sector need drawings for their manufacturing, installation, operation and maintenance. A technician working in design and shop floor must possess the skill of reading, interpreting different drawings and simulating electrical and electronics circuit for most of the activities. With the evolution of various computer software's the role of earlier draftsman is now taken over by Computer software. The Computer Aided Drawing (CAD) and simulation (MATLAB / SIMULINK, etc) software will be used to perform various practical exercises in this course. This will enable the students to become competent for working in the fast growing information technology environment by enhancing their computer aided drawing, designing and simulating skills in the field of electrical and electronics engineering.

## **Course Outcomes:**

| EE16 212 1 | Identify various symbols and notations in electrical and electronics          |
|------------|---|
| LE10 213.1 | engineering drawings.   |
| EE16 213.2 | Interpret drawings, draw interferences and workout other technical details.   |
| FF16 713 3 | Draw various electrical and electronics circuits according to standard        |
| LE10 213.3 | practices using CAD software.   |
| EE16 912 A | Simulate and test simple electrical and electronics circuits using Simulation |
| EE10 213.4 | software  |

## **Course Content Details:**

| Unit<br>No. | Topics/Subtopics                                   |
|-------------|--|
|             | Introduction to AutoCAD:                           |
| 1           | 1.1 Concept and terminology.                       |
|             | 1.2 Its advantages.                                |
|             | 1.3 Loading AutoCAD.                               |
|             | 1.4 Creating Opening, Saving and Closing Drawing.  |
|             | 1.5 User Co-ordinate System (UCS) icon.            |
|             | 1.6 Drawing with Precision.                        |
|             | 1.7 Drawing Units.                                 |
|             | 1.8 Linear and angular measurements.               |
|             | 1.9 Accessing help.                                |
|             | Drawing Commands:                                  |
| 2           | 2.1 POINT, LINES, CIRCLE, ARC, ECLIPSE, RECTANGLE, |
|             | POLYGON, PLINE, HATCH, TEXT, GRADIENT, BOUNDARY,   |
|             | RAY, CONSTRUCTION LINE.                            |

| 3  | Lating Commands:<br>2 1 EDASE OODS MOVE CODY MIDDOD CHANCE DDEAK   |
|----|--|
| 5  | FILLET ROTATE SCALE ARRAY  |
|    | Display Commands:  |
| 4  | 4.1 Control commands like ZOOM, PAN, VIEW, REDRAW, REGEN,  |
|    | REGENAUTO, etc.  |
|    | 4.2 Drawing with geometrical commands like SNAP & GRID.  |
|    | Dimensioning:  |
| 5  | 5.1 Elements of dimension.   |
|    | 5.2 Drawing linear dimensioning using dimension option.  |
|    | 5.3 MTEXT, TEXT, ANGLE, HORIZONTAL, VERTICAL, ROTATED.   |
|    | 5.4 Drawing aligned dimension.   |
|    | 5.5 Dimensioning arcs and circle.  |
|    | 5.0 Dimensioning angles using quick dimensions.  |
| 6  | Lavers:  |
| Ū  | 6.1 Understanding layers, Creating Naming, Assigning colour, LT, LW,   |
|    | Transparency value.  |
|    | 6.2 Using layers, Switching, Changing Layers state, Saving layers state,   |
|    | Changing an exisiting object layer, Making object layer current,   |
|    | Modifying layers.  |
| 7  | Plotting and Printing:   |
|    | 7.1 Preparing a drawing for plotting and printing.   |
|    | 7.2 Doing a draft plot.  |
|    | 7.5 Plotting a drawing.  |
|    | 7.5 Specifying plot setting preview  |
|    | 7.6 Plotting and printing.   |
| 8  | Draw various electrical circuits using CAD software  |
|    | 8.1 Draw the cross sectional view of various electrical machines using.  |
|    | 8.2 Draw lighting and power wiring diagram for a given installation  |
| 9  | Introduction of Simulation Software:   |
|    | 9.1 List the steps of using Simulation software.   |
|    | 9.2 Getting started, ending, commonly used blocks, Creating a model,   |
|    | Assigning variables, Observing variables during Simulation,<br>Storing/Saving Data, Creating and Masking Sub-systems |
|    | 9.3 State the steps to generate graphics and plot Waveform/ response for   |
|    | Analysis.  |
|    | 9.4 Graphics, Plot, sub plot, label, legend etc.   |
| 10 | Electrical Circuit Simulation:   |
|    | 10.1 List the steps of using Simulation software in Electrical engineering   |
|    | 10.2 State the procedure to build simple circuits  |
|    | 10.3 Build, Simulate and test simple electric circuits.  |
| 11 | Electronics Circuit Simulation:  |
|    | 11.1 List the steps of using Simulation software   |

| 11.2 State the procedure to build simple circuits          |
|--|
| 11.3 Build, Simulate and test simple electronics circuits. |

## List of Experiments: (Any 08 Experiments)

| Sr. No. | Experiment/Assignment   | Approx<br>Hours |
|---------|---|-----------------|
| 1       | To draw Electrical symbol.  | 02              |
| 2       | Draw different types of rectifier circuit using CAD and<br>take print out of :<br>(a)Single phase half wave<br>(b)Single phase full wave<br>(c)Bridge rectifier     | 02              |
| 3       | Simulate three resistances in series circuit and find out voltage and current in each resistance.   | 02              |
| 4       | Simulate the following circuits and find out voltage and<br>current in each resistance.<br>(a)Two resistances in parallel<br>(b)Resistance and inductor in parallel | 02              |
| 5       | Simulate R-L series circuit and observe voltage wave forms across each component.   | 02              |
| 6       | Simulate R-C series circuit and observe voltage wave forms across each component.   | 02              |
| 7       | Simulate R-L-C series circuit and observe voltage wave forms across each component.   | 02              |
| 8       | Simulate one switch one bulb house wiring diagram circuit.  | 02              |
| 9       | Simulate stair case wiring circuit.   | 02              |
| 10      | Simulate star connection using resistors and observe voltage current relation of line and phase.  | 02              |
| 11      | Simulate delta connection using resistors and observe voltage current relation of line and phase.   | 02              |
| 12      | Simulate single phase half-wave rectifier circuit.  | 02              |
| 13      | Simulate single phase full-wave rectifier circuit.  | 02              |
| 14      | Simulate single phase bridge rectifier circuit.   | 02              |
| 15      | Draw the circuit diagram of any electrical engg. practical set up.  | 02              |
| 16      | Draw Layout of Substation 11KV/415V   | 02              |

## **Books:**

| Sr.No. | Name of Book                 | Author      | Publisher                |

(\*) indicates assessment by internal examiner

## **Rationale:**

For implementing and monitoring effectiveness of the energy conservation methods and proper use of electrical energy, its audit is must. To maintain the growth of development, electricity generation will be required to be increased by proper mix of conventional and nonconventional sources of energy. But at the same time its conservation and audit should be done to increase the efficiency of electrical power system. Hence electrical engineers must have knowledge of various methods of energy conservation and concept of energy audit and its implementation.

## Course Outcomes: Students will be able to-

| EE 16 305.01 | Identify the relationship between energy consumption and its impact on<br>environment |
|--------------|---|
| EE 16 305.02 | Describe energy conservation principle, its management concept and objectives         |
| EE 16 305.03 | Assess the energy saving & conservation in different electric sector                  |
| EE 16 305.04 | Perform energy audits and decides simple payback period                               |
| EE 16 305.05 | Employ devices and equipment used for energy auditing and its conservation            |

Course Content Details:

| Topics/Subtopics   |
|--|
|  |
| Energy and Environment:  |
| 1.1 Environment and social concerns related to energy utilization. |
| 1.2 The green house effect.  |
| 1.3 Global Warming and its effect.                                 |
| 1.4 Pollution, Acid Rains.   |
| 1.5 Global Energy and environment Management.                      |
|  |
|  |

| 2 | Elements of Energy Conservation and Management   |
|---|--|
|   | 2.1 Present energy scenario, State and national level Sector wise Energy                             |
|   | consumption, demand supply gap   |
|   | 2.2 Scope for energy conservation and its benefits   |
|   | 2.3 Energy conservation Principle: Maximum energy efficiency, Maximum cost                           |
|   | effectiveness  |
|   | 2.4 Energy Conservation Act-Main features, Standards and labelling, designated                       |
|   | consumers  |
|   | 2.5 Energy Conservation Building Codes (ECBC): Brief introduction of the salient features of the act |
|   | 2.6 Energy management concept and objectives: Initializing Planning Leading                          |
|   | Controlling, Promoting, Monitoring and Reporting   |
|   | 2.7 Energy management programmes   |
|   | 2.8 Demand side Management, Aggregate Technical and Commercial loss                                  |
| 3 | Energy Conservation In Industries  |
| - | 3.1Energy saving opportunities in electric motors : selection, overrating/                           |
|   | oversizing,  |
|   | efficiency vs output power curve, starting method  |
|   | 3.2Benefits of Power factor improvement and its techniques-Shunt capacitor,                          |
|   | Synchronous Condenser etc., Block diagram of APFC panels (manual and                                 |
|   | automatic)Simple numerical on improvement of power factor by using shunt                             |
|   | capacitor  |
|   | 3.3 Effects of harmonics on – Motors, and remedies leading to energy                                 |
|   | conservation   |
|   | 3.4 Energy conservation by VSD, Energy efficient motors, retrofitting of old                         |
|   | motors   |
|   | 3.5 Energy conservation in electric furnaces, ovens and boilers.,                                    |
|   | 3.6 lighting techniques – Use of Daylight, concept of output lumen per watt                          |
|   | consumption of light source, use of modern lamp and luminaries (Ex. LED)                             |
|   | over conventional lighting, dimming, voltage regulators  |
|   | 3.7 Methods and techniques of energy conservation: Ventilation and air                               |
|   | conditioners,  |
|   | Area Sealing, Insulating the Heating / cooling fluid pipes, automatic door                           |
|   | closing- Air curtain, Thermostat / Control   |
|   | 5.8 Identification of losses and its minimisation in the power distribution system:                  |
|   | From point of suppry to utilisation point- transformers, cables, whes, Holspot                       |
|   | al alastria contesta   |
|   | electric contacts  |
| 4 | Energy Conservation In Commercial and residential premises   |
|   | 4.1 Requirement of electrical energy for a specific purpose in a school, college,                    |
|   | shops, malls, banks, offices, house /flat,   |
|   | 4.2 Use of alternative energy source in place of electrical energy                                   |
|   | 4.3 Utility services in residential complex, building, civic bodies                                  |
|   | 4.4 Use of standard and labelling or Energy star marked electrical consumer                          |
|   | goods or products  |
|   | 4.5 Adoption of energy conservation methods listed in 3.6, 3.7, 3.8                                  |
|   |  |

| 5 | Energy Audit:  |
|---|--|
|   | 5.1 Energy audit and its benefits  |
|   | 5.2 Energy flow diagram  |
|   | 5.3 Types of energy audits : Preliminary audit, Detailed audit   |
|   | 5.4 Methodology of Preliminary audit : ABC or Pareto Analysis, questionnaire   |
|   | form,  |
|   | data collection form, submission of preliminary audit report   |
|   | 5.5 Methodology of Detailed audit: i] Phase- I:pre audit, ii] phase-II: Audit process  |
|   | at site-Walk through audit and Device performance audit, iii]Phase- III post   |
|   | audit analysis and decision making   |
|   | 5.6 Energy audit report  |
|   | 5.7 Numerical on calculation of simple payback period for installing energy  |
|   | conservation equipment/devices   |
|   |  |
| 6 | Measurement and energy conservation Devices :  |
|   | 6.1. Measurements of parameters in energy audit process  |
|   | 6.2List and brief description of various electrical non electrical measuring   |
|   | instruments are during audit process, such as –smart meters(V,I,W,KVA,   |
|   | KVAR, PF) data loggers, remote sensing and measurements devices, Power   |
|   | Analyser, thermometer-contact, infrared, leak detector, tachometer   |
|   | and lux meter etc  |
|   | 6.3. List and brief description of Equipment/devices used for energy conservation  |
|   | Example, such as – photo sensors, day light controller, occupancy sensors,   |
|   | temperature controllers, thermostats, humidity controllers, pressure controllers,  |
|   | timers, harmonic filters, voltage stabilizers, motor starters, PLC   |
|   | 6.4 Introduction to: Energy Management System Internet of things and Mobile  |
|   | of a material of |

## Suggested Specifications Table with Hours and Marks (Theory):

| Unit |                                   | Teaching | Distribution of Theory Marks |       |       |       |  |  |
|------|-----------------------------------|----------|------------------------------|-------|-------|-------|--|--|
| No   | Topic Title                       | Hours    | R                            | U     | Α     | Total |  |  |
|      |                                   |          | Level                        | Level | Level | Marks |  |  |
| 1    | Energy and Environment            | 02       | 02                           | 04    | -     | 06    |  |  |

#### **Rationale:**

In generation, transmission and utilization of electrical energy switchgear and protection plays an important role for delivering uninterrupted power supply to the consumers. It is also necessary at various levels to protect the power system from damage. The electrical engineer must know switchgear and protection systems. It will help while working as a supervisor in substations, manufacturing industries & public service utilities.

#### **Course Outcomes:**

#### Student should be able to

| EE 16 306.1 | Identify the effects of abnormalities in the operation of power system        |
|-------------|---|
| EE 16 306.2 | Analyze the working principle and operation of current interrupting devices.  |
| EE 16 306.3 | Analyze the working principle and operation of protective relays.             |
| EE 16 306.4 | Identify the various components of switchgear and protection systems.         |
| EE 16 306.5 | Recognize the faults in the power system and remedies.                        |
| EE 16 306.6 | Name the specifications and select the suitable switchgears in the protection |
|             | of power system.  |
|             |   |

| Unit No | Topics / Sub-topics  |
|---------|--|
|         | Basic Concepts:  |
| 1       | 1.1 Necessity and functions of protective system.                    |
|         | 1.2 Substation equipment, functions and layout.                      |
|         | 1.3 Faults and abnormal conditions.                                  |
|         | 1.4 Types of faults and their causes.                                |
|         | 1.5 Short circuit calculations- Symmetrical faults only (Numerical   |
|         | problems).   |
|         | 1.6 Use of current limiting reactors & their arrangements.           |
| 2       | Circuit Interrupting Devices:  |
|         | 2.1 Fuses – Terms and definitions, types, construction and           |
|         | Working characteristics, selection and applications                  |
|         | (Rewirable, D-type, Cartridge, HRC and Drop-out Fuses)               |
|         | 2.2 Isolators- vertical break, horizontal break & pantograph type.   |
|         | 2.3 Arc formation process, methods of arc extinction, related terms. |
|         | 2.4 Circuit breakers- Concept, Classification, Working principle,    |
|         | Construction, Specification and Applications of –                    |
|         | Miniature circuit breakers (MCB), Moulded case circuit breakers      |

| 1    | Basic Concepts                | 04       | 2                            | 4          | 0          | 06             |  |
| 2    | Circuit Interrupting Devices  | 08       | 2                            | 6          | 6          | 14             |  |
| 3    | Protective Relaying           | 08       | 2                            | 6          | 6          | 14             |  |
| 4    | Neutral Earthing              | 04       | 2                            | 2          | 0          | 04             |  |
| 5    | Protection of Alternator      | 06       | 2                            | 3          | 3          | 08             |  |
| 6    | Protection of Transformer     | 06       | 2                            | 3          | 3          | 08             |  |
| 7    | Protection of Induction Motor | 04       | 2                            | 2          | 0          | 04             |  |
| 8    | Protection of Bus bar and     | 04       | 2                            | 0          | 4          | 06             |  |
|      | Transmission line             |          |                              |            |            |                |  |
| 9    | Over Voltage Protection       | 04       | 2                            | 4          | 0          | 06             |  |
|      | Total                         | 48       | 18                           | 30         | 22         | 70             |  |

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

**Notes:** This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.

## List of experiments/Assignments:

Any ten (10) of the following

| Sr.<br>No. | Unit | Experiment/Assignment   | Approx. Hours |
|------------|------|---|---------------|
| 1          | 2    | To identify the components of different types of low<br>voltage and medium voltage circuit breakers with their<br>specifications.(through visits, video or model).<br>I) Miniature circuit breaker (MCB)<br>II) Moulded case circuit breaker (MCCB) | 04            |

|    |   | III) Earth Leakage circuit breaker ( E L C B )  |    |
|----|---|---|----|
| 2  | 2 | <ul> <li>To identify the components of different types of high voltage circuit breakers with their specifications.(through visits , video or model ).</li> <li>I) Sulpher - Hexa fluoride circuit breaker (SF6)</li> <li>II) Vacuum circuit breaker.</li> </ul> | 04 |
| 3  | 2 | To Plot the characteristics of rewirable fuse.  | 02 |
| 4  | 3 | To plot performance characteristics of over current relay.  | 02 |
| 5  | 3 | To plot performance characteristics of IDMT relay.  | 02 |
| 6  | 3 | To plot performance characteristics of Differential relay.  | 02 |
| 7  | 3 | To plot performance characteristics of Impedance relay.   | 02 |
| 8  | 5 | Simulation of alternator protection.  | 04 |
| 9  | 6 | Simulation of transformer protection.   | 04 |
| 10 | 7 | Simulation of Induction Motor protection.   | 04 |
| 11 | 8 | Simulation of transmission line protection.   | 04 |
| 12 | 9 | To identify the components of different types of<br>lightning arresters with their specifications.<br>(through visits , video or model ).   | 04 |
| 13 | 4 | To identify the components of different types of earthing with their specifications. (through visits , video or model ).  | 04 |
| 14 | 2 | To identify the components of different types of isolators<br>with their specifications.<br>(through visits , video or model ).   | 04 |

**Visit :** Visit to a nearby substation and study all the circuit breakers, relays, isolators, lightening arrestors, etc and its protection scheme.

#### **Rationale:**

A Diploma holder in Electrical Engineering needs to supervise, operate and maintain electrical systems, in industries and fields. Project introduces the students to professional engineering practice by providing them with an opportunity to work on an engineering problem. It is also important to convey the ideas and to have effective communication with the people. In "Project & seminar I" student will present the seminar preferably on the selected project topic.

#### Course Outcomes: Student should be able to:

| EE16308.1 | Identify and use verity of academic resources.                        |
|-----------|---|
| EE16308.2 | Carry out literature survey from various sources available.           |
| EE16308.3 | Organize the information for presentation.                            |
| EE16308.4 | Develop audience-centered presentation.                               |
| EE16308.5 | Ask meaningful questions.   |
| EE16308.6 | Prepare appropriately to participate effectively in class discussion. |

#### **Course Content Details:**

| Unit No | Topics / Sub-topics   |
|---------|---|
| 1       | <ul> <li>Methodology:</li> <li>This course will be spread over two semesters i.e. fifth and sixth semester.</li> <li>Course registration will be at the beginning of the fifth semester.</li> <li>Students will form a batch of four to five students.</li> <li>Students will <ul> <li>Identify the project and get it approved from the guide.</li> <li>Carry out Literature survey</li> <li>Plan and design the project</li> <li>Identify the of required components</li> </ul> </li> </ul> |
| 2       | <ul> <li>Seminar:</li> <li>Student should present the seminar in fifth semester preferably on the selected project topic.</li> <li>Every student will prepare and deliver the seminar.</li> <li>Use of audio visual and / or power point presentation is desirable.</li> <li>Presentation will be for @ 15 minutes including 5 minutes of question and answer.</li> </ul>   |

| 3 | Submission of Seminar Document:  |
|---|--|
|   | • The student shall get the seminar draft approved from Guide and complete final   |
|   | document before presenting seminar   |
|   | • Each student shall prepare two hard copies of final seminar document and retain  |
|   | one copy with student and submit one hard copy along with soft copy for            |
|   | department.  |
|   | • The structure of the seminar document shall be as per the following format:      |
|   | Certificate / Acknowledgement / Index / Introduction / Detailed content /          |
|   | Conclusion / References.   |
|   | • The seminar report shall be of minimum 10 pages and Max. 20 pages with 1.5 line  |
|   | spacing. Font: New Times Roman, left margin 3 cm, right margin 1.5 cm, top         |
|   | margin 2 cm, bottom margin 2 cm, header & footer 1.5 cm, page numbers, size of     |
|   | font 12 pt, paragraphs left and right justified. It should be certified by seminar |
|   | Guide and Head of department.  |
| 4 | Suggestive list of topics for selection of project .                               |
|   | Industry supported project   |
|   | • Energy Conservation and Audit.   |
|   | Renewable energy.  |
|   | Maintenance based project.   |
|   | Smart Metering, Electricity Theft Reduction  |
|   | Power Quality  |
|   | Automation   |
|   | Illumination Engineering   |
|   | Green building Codes   |
|   | Hybrid Vehicles  |
|   | Variable Voltage Variable frequency drives   |
|   | Traction new trends  |
|   | BLDC motors  |
|   | Smart Grid Applications  |
|   | Simulation   |
|   | Traffic light control system   |
|   | Any other topics related to Electrical Engineering                                 |
|   |  |

## **Course Curriculum Development Committee:**

#### **Rationale:**

Power Electronics is ushering in a new kind of industrial resolution because of its important role in energy conservation, renewable energy systems, bulk utility energy storage, electric and hybrid vehicles in addition to its traditional roles in industrial automation and high energy efficiency systems. Electrical engineer should be competent enough to adjust with the new technology which has come due to advancements in Power Electronics. The intention of this course is to introduce important power electronic semiconductor switches and their applications as for the power conversion and control.

#### **Course Outcomes:** Student should be able to:

| EE16401.1 | Select appropriate power semiconductor device for a particular applications. |
|-----------|--|
| EE16401.2 | Compare various power converters and their applications                      |
| EE16401.3 | Select appropriate type of drive for a particular application                |
| EE16401.4 | Assemble and test simple power electronic circuit                            |
| EE16401.5 | Trace the fault in the simple circuit  |

#### **Course Content Details:**

#### No derivation and No numerical for all Topics

| Unit No | Topics / Sub-topics   |
|---------|---|
|         | Power Semiconductor devices:  |
| 1       | 1.1 Introduction to Thyristor family and other power devices.                           |
|         | 1.2 SCR: Construction, symbol, working & V-I characteristics                            |
|         | 1.3 Definitions: Holding current, latching current, break over voltage.                 |
|         | 1.4 Construction, symbol, V-I characteristics and application of Triac, Diac, MOSFET    |
|         | and IGBT  |
|         | 1.5 Phase control using TRIAC   |
|         | Light dimmer  |
|         | Fan regulator   |
|         | Temperature Control using SCR or triac  |
|         | SCR turn on, turn off methods and protection circuits:                                  |
| 2       | 2.1 SCR turn on methods : Voltage Triggering, Gate Triggering, dv/dt Triggering and     |
|         | Light Triggering, Temperature triggering.   |
|         | 2.2 Gate triggering circuits for SCR - Circuit diagram, working principle, waveforms of |
|         | Resistor triggering   |
|         | • R-C triggering  |
|         | • UJT triggering.   |

|   | 2.3 Thyristor Turn off methods.   |
|---|---|
|   | a) Natural Commutation  |
|   | b) Forced Commutation :   |
|   | • Class A- Self commutation by resonating load  |
|   | • Class B- Self commutation by LC circuit   |
|   | Class C- Complementary commutation  |
|   | Class D – Auxiliary commutation   |
|   | Class E – external pulse commutation  |
|   | di /dt protection, dv/dt protection   |
|   | Controlled Rectifier  |
|   | 3.1 Difference between uncontrolled rectification and controlled rectification.   |
| 3 | 3.2 Single Phase Fully Controlled Half Wave Converter - With Resistive Load ,With RL Load and Freewheeling Diode.               |
|   | 3.3 Single Phase Fully Controlled Full Wave Converter - With Resistive Load & With RL   |
|   | Load.   |
|   | 3.4 Single Phase Fully Controlled Bridge Converter - With Resistive Load & With RL  |
|   | 2.5 Three Phase Fully Controlled Bridge Converter With PL Load  |
|   | 3.6 Comparison of 3 phase and 1 Phase Converters  |
|   | 5.0 Comparison of 5 phase and 1 thase Converters.   |
| 4 | Inverters   |
|   | 4.1 Introduction. Classification of inverters according to nature of input source, method of                                    |
|   | commutation, connection of thyristor & commutating component.   |
|   | 4.2 Working principle & operation of  |
|   | • Basic and modified Series inverter,   |
|   | • Basic Parallel inverter   |
|   | 4.3 Circuit diagram, working, waveforms of  |
|   | • Single phase half bridge inverter   |
|   | • Single phase full bridge inverter   |
| 5 | 4.4 Voltage control in single phase inverters (PWM Inverters):Different Techniques  |
| 5 | Chopper   |
|   | 5.2 Control Techniques:   |
|   | 5.2 Constant Engineers System   |
|   | Vorishing Frequency System  |
|   | • Variable Frequency System   |
|   | 5.5 Step Op Chopper And Step down chopper<br>5.4 Circuit diagram and working of Class A. Class B. Class C. Class D and Class F. |
|   | choppers  |
|   | 5.5 SCR Vs MOSFET as the switching device used in chopper   |
| 6 | Drives and other application of power electronics :   |
|   | 6.1 Concept of electric drives.   |
|   | 6.2 Adjustable speed drive VS servo drives  |
|   | converter   |
|   | 6.4 Chopper based DC drive for separately excited DC motor.   |
|   | 6.5 Introduction to brushless DC motor.   |
|   | 6.6 Three phase half wave brushless DC motor.   |
|   | 6.7 Block diagram of DC brushless drive.  |
|   | 6.8 AC Drives - Speed control of three phase Induction Motor with Variable frequency  |
|   | • voltage source inverter red induction motor drive .   |

Г

| Pulse width modulated inverter fed induction motor drive |
|--|
| 6.9 Other applications                                   |
| Circuit diagram, operation of :                          |
| • Static circuit breaker(DC and AC)                      |
| Induction heating control                                |
| Dielectric heating control                               |

**Legends:** R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy). *Notes: This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified.* 

| List of experiments / | Assignments : |  |
|-----------------------|---------------|--|
|-----------------------|---------------|--|

| Sr.<br>No. | Unit | Experiment / Assignment ( Any 08 )  |    |
|------------|------|---|----|
| 1          | 1    | Construct circuit & verify the V-I characteristic of SCR.                                     | 4  |
| 2          | 1    | Construct circuit & verify the V-I characteristic of TRIAC.                                   | 4  |
| 3          | 1    | Construct circuit & verify the V-I characteristics of power MOSFET.                           | 4  |
| 4          | 1    | Construct circuit & verify the V-I characteristics of power IGBT                              | 4  |
| 5          | 1    | Construct the circuit of light dimmer/ fan regulator  |    |
| 6          | 1    | Observe temperature control using thyristor   | 4  |
| 7          | 2    | Construct circuit & observe firing angle ( $\alpha$ ) control of R , RC or UJT triggering     | 4  |
| 8          | 3    | Observe the output of single phase fully controlled bridge rectifier using R load and RL load | 4  |
| 9          | 4    | Observe the output of single phase series or parallel inverter                                | 4  |
| 10         | 4    | Observe the output of half Bridge Inverter  | 4  |
| 11         | 6    | Observe the output of step down chopper   | 4  |
| 12         | 6    | Observe the output of step up chopper   | 4  |
| 13         | 7    | Control of speed of Induction motor using v/f method  | 4  |
|            | •    | Total   | 32 |

## **Rationale:**

In changing economy now, a day more and more stress is being given up in increasing the throughput in industries. The basic tool for achieving this is automation. Control system being a backbone of the automation plays a vital role in engineering education. To understand and discharge the duties of an electrical engineer he/she should have knowledge of Principles of control system.

## **Course Outcomes:**

Student should be able to

| EE16403.1   | Know the difference between different types of control systems.   |
|---|---|
| EE16403.2   | Understand the working principle and operation of closed loop system.   |
| EE16403.3   | Analyze different types of control actions and choose a particular action .   |
| EE16403.4   | Understand the concept of stability of system.  |
| EE16403.5   | Understand the time response of control system.   |
| EE16403.6   | Understand the frequency response of control system.  |
| EE16403.2<br>EE16403.3<br>EE16403.4<br>EE16403.5<br>EE16403.6 | Understand the working principle and operation of closed loop system.<br>Analyze different types of control actions and choose a particular action .<br>Understand the concept of stability of system.<br>Understand the time response of control system.<br>Understand the frequency response of control system. |

| Unit No | <b>Topics / Sub-topics</b>   |
|---------|--|
|         | Basics of Control System:  |
| 1       | 1.1 Definition of Control System   |
|         | 1.2 Classification – open loop and closed loop system                          |
|         | 1.3 Manually controlled and automatically controlled closed loop system        |
|         | 1.4 Examples of closed loop system – Automatic tank level control system,      |
|         | A position control system, Rudder control of ship.                             |
|         | 1.5 Feedback and Its effect on: overall gain, Stability, Sensitivity, External |
|         | disturbance/ noise.  |
|         | 1.6 Types of Feedback Control Systems – (Only introduction)                    |
|         | a) Linear and Non Linear   |
|         | b) Time invariant and Time variant   |
|         | c) Continuous data and Sampled data (Discrete)                                 |
|         | 1.7 Transfer function and it's properties                                      |
|         | 1.8 Derivation of Transfer function for linear RLC series circuit.             |
|         | 1.9 Block Diagrams:  |
|         | a) use   |
|         | b) elements  |
|         | c) Six Rules for reduction technique   |
|         | d) block diagram for feedback control system (closed loop system) and          |
|         | derivation of it's transfer function.  |

|   | 1.10 Signal Flow Graph, step by step construction of signal flow graph for given set of algebraic equations   |
|---|---|
|   | given set of algebraic equations.   |
|   | 1.11 Basic properties of Signal flow graphs.  |
|   | (int) with Example of Lean Beth win Example of Lean   |
|   | (sink), path, Forward path, Loop, Path gain, Forward-path gain, Loop  |
|   | gain, non-touching loops.   |
|   | 1.13 Manipulation and algebra of Signal flow graph  |
|   | 1.14 Example of construction of Signal flow graph.  |
|   | 1.15 Explanation of Mason's gain formula  |
|   | <b>1.16</b> Force (Torque) – Voltage and Force (Torque) – Current analogy   |
|   | between Mechanical Translational, Rotational and Electrical systems   |
| 2 | Time response of Control system:  |
|   | 2.1 Transient and Steady state response of first order control system   |
|   | 2.2 Typical test signals for Time response of Control system: step, ramp and  |
|   | parabolic.  |
|   | <b>2.3</b> Unit step response of control system (rise time, delay time, settling time,  |
|   | maximum overshoot, steady state error)  |
|   |   |
| 3 | Concept of Stability:   |
|   | 3.1 Stability: Definition, types (absolute, relative)   |
|   | 3.2 Impulse responses corresponding to different locations of roots of  |
|   | characteristic equation.  |
|   | 3.3 Relation between the transient response and the characteristic equation roots.  |
|   | 3.4 Root location in S plane for determining stability.   |

# **Rationale:**

This course is designed to teach students various concepts of Illumination Engineering. Students shall apply the basic illuminations laws. He/She should be able to apply the acquired knowledge in designing the schemes. With changing needs of the society students shall be able to fulfil the optimized solution considering the need of energy conservation. He/She should be able to take care the needs of various sectors of the society in illumination area.

# **Course Outcomes:**

Student should be able to

| EE16 404.1 | Understand the meaning of terms used in illumination engineering   |  |  |  |  |  |
|------------|--|--|--|--|--|--|
| EE16 404.2 | Realize the requirements of various types of consumers             |  |  |  |  |  |
| EE16 404.3 | Study requirements of illumination levels for various applications |  |  |  |  |  |
| EE16 404.4 | Understand illumination schemes fundamentals.                      |  |  |  |  |  |
| EE16 404.5 | Differentiate between various types of lamps                       |  |  |  |  |  |

| <b>Topics / Sub-topics</b>  |
|---|
| Fundamentals of Illumination:   |
| 1.1.Fundamentals of Illumination  |
| 1.2.Illumination terminology: Illumination, Light intensity, Lumen, Lux |
| 1.3.Laws of Illumination (Simple numerical)                             |
| 1.4.Concept of Photometry   |
| 1.5.Measurement of Illumination   |
| 1.6.Features of good Illumination scheme                                |
| 1.7.Biological effect of artificial illumination, Light pollution       |
|   |
| Lowns & Lighting Assessanios  |
| 2 1 Types of Lights   |
| 2.1 Types of Light  |
|   |
| b. Ultraviolet light  |
| c. Infrared light   |
| 2.2 Types of Lamps  |
| a. Incandescent lamp  |
| b. ARC lamps – ac &dc arc lamp  |
| c. Fluorescent lamp   |
| d. Mercury vapour lamp. HPMV lamp. Mercury iodide lamp                  |
| e. Sodium vapour lamp   |
| f. Neon lamp, Neon Sign Tubes   |
|   |

|   | g. Halogen lamp   |
|---|---|
|   | h. CFL Lamps  |
|   | i. Metal halides lamp   |
|   | j. LED lamps  |
|   | k. Lasers   |
|   | k. Selection criterion for lamps  |
|   | 2.3 Construction, working principle advantages and disadvantages of all lamps               |
|   | 2.4 Comparison between incandescent & Florescent lamps                                      |
|   | 2.5 Lighting schemes: selection of lamp, illumination efficiency, glare &                   |
|   | power consumption   |
|   | a. Direct & Indirect  |
|   | b. Semi direct & semi indirect  |
|   | c. General lighting scheme  |
|   | 2.6 Lighting calculation methods  |
|   | a. Watt/m2 method   |
|   | b. Lumens or light flux method  |
|   | c Point to point method (simple numerical)  |
|   | er i enne te pome memor (ennipre numerreur)   |
| 3 | Illumination Control & Control Circuits:  |
|   | 3.1 Purpose of lighting control   |
|   | 3.2 Working principle and operation of:   |
|   | a) Dimmer   |
|   | i) Resistance type dimmer   |
|   | i) Solt water dimmer  |
|   | h) Dimmon Transformen   |
|   | b) Dimmer Transformer   |
|   | 1) Autotransformer dimmer   |
|   | 11) I wo winding transformer dimmer   |
|   | c) Electronic Dimmer  |
|   | i) Thyristor operated dimmer  |
|   | ii) Triac operated dimmer   |
|   | 3.3 Control of enhance lightning  |
|   | 3.4 Methods used for light control  |
|   | 3.5 Control circuits for lamps: single lamp controlled by single switch, two                |
|   | switches  |
|   | 3.6 Single lamp controlled by two-point method, three-point method & four-<br>point method. |
|   | 3.1 Polar curve: its meaning and applications for designing the lamps                       |
| 4 | Illumination for Interior Applications:   |
| • | 4.1 Standards for various situations in Interior Illumination                               |
|   | 4.2 Methods for Designing illumination schemes  |
|   | 4.3 Design considerations for Interior location of Residential Commercial,                  |
|   | Industrial premises   |
|   | 4.4 Design Illumination scheme for different Interior locations of Residential,             |
|   | Commercial, Industrial unit   |
|   | 4.5 Numericals on above sub topics  |
|   |   |
|   |   |

| 5 | Illumination for Outdoor Applications:                         |
|---|--|
|   | 5.1. General and specific requirements for lighting schemes of |
|   | a) Factory Lighting  |
|   | b) Street Lighting   |
|   | c) Flood Lighting  |
|   | d) Railway Platform Lighting                                   |
|   | e) Lighting for Advertisement / Hoardings                      |
|   | f) Sports Lighting   |
|   | g) Simple numericals based on design of simple scheme          |
| 6 | Lighting for Special Applications                              |
|   | 6.1. Lighting schemes and general requirements for:            |
|   | a) Agricultural & Horticultural applications                   |
|   | b) Health Care Centers and Hospitals                           |
|   | c) Decorative lighting   |
|   | d) Stage lighting  |
|   | e) Aquariums and Shipyards                                     |
|   |  |

## **Rationale:**

This subject deals with the representation of the power system, analysis of its components and determines performance by analytical as well as graphical methods which will be useful in analysis of electrical power system. This subject provides the basic knowledge required to study power system operation & control, Power Quality & Deregulation System.

Representation of power system will be useful to know the actual components of power system, Circuit model of system along with their per unit values. Transmission line parameter is useful to study the effects of parameter on performance of power system. Generalized circuit constants method is very useful & simple tool for predicting the performance of power system wrt. its parameters. Power flow serves as guidance for analysis of power system analytically & Circle diagram is a graphical tool for putting across the concept of load flow & line compensation,

## **Course Outcomes:**

| Develop per unit reactance diagram for given system using power system components    |
|--|
| Compute Transmission line parameters   |
| Determine performance of line by using Generalized circuit constant equations        |
| Compute real power & reactive power for sending end & receiving end by using complex |
| power equations.   |
| Construct the circle diagram to know the performance of transmission line            |
|  |

## **Contents:**

## 1: Representation of Power System

- Basic Structure of Power System.
- Equivalent Circuit representation of the System components-Alternator, Transformer,
- Transmission line: Short, Medium & long
- Single line diagram.
- Impedance diagram.
- Reactance diagram.
- Per unit Calculations. (Numerical)
- Aspects of Power System analysis.
- Role of power system Engineer

## 2 : Transmission Line Parameter

## 2-1 Resistance

- Concept of transmission line resistance.
- Difference between A.C. resistance & D.C. resistance.
- Influence of skin effect and proximity effect on Line conductors.

- Effect of temperature on Transmission line resistance.(No derivation)
- Effect of resistance on line performance.

## 2.2 Inductance

- Concept of Transmission Line Inductance.
- Significance of inductance.
- Flux linkage of isolated current carrying conductor due to internal and external flux. (Derivation only)
- Inductance of single-phase line composed of solid conductors & bundled conductors. (No Numerical)
- Concept of self G.M.D. and mutual G.M.D. (Numerical)
- Inductance of single phase line composed of composite conductors. (No derivation) Numerical
- Inductance of three phase line (single circuit) composed of solid conductors with symmetrical and asymmetrical spacing.

# 2.3 Capacitance

- Concept of Line capacitance.
- Significance of capacitance.
- Potential difference between two points due to charged conductors (Gauss's Law.)
- Potential difference between two conductors in a group of charged conductors.
- Capacitance of single phase line composed of solid Conductors and duplex bundled
- conductors. (Numerical)
- Capacitance of three phase line (single circuit) with symmetrical spacing. (Numerical)
- Effect of earth field on transmission line capacitance.
- Capacitance of single phase line with solid conductors considering earth.

# 3 : Generalized Circuit

## 3.1

- Concept of generalized circuit constants.
- Generalized circuit constants of short, medium & long transmission line.(No derivation) Numerical
- Measurement of Generalized circuit constant

## 3.2

- Generalized circuit constants of two networks connected in series & connected in parallel. (Only derivation)
- Advantages of Generalized circuit representation.

# 4 : Power Flow

- Concept of Complex Power (S=V I\*), Real Power and reactive Power.
- Derivation of complex power, real power, reactive power for sending end as well as receiving end of the transmission line using GCE(Numerical)
- Condition for maximum power (Numerical)

# 5 : Circle Diagram

- Concept of circle diagram.
- Receiving end circle diagram. (procedure and numerical)
- Determination of ratings of reactive power compensating equipments. (procedure and numerical)
- Sending end circle diagram. (procedure and numerical)
- Advantages of circle diagram.

## Suggested specification table with Hours and Marks (Theory)

| Unit<br>No |                                     | Teaching | Distribution of Theory Marks |            |            |                |  |
|------------|-------------------------------------|----------|------------------------------|------------|------------|----------------|--|
|            | Topic Title                         | Hours    | R<br>Level                   | U<br>Level | A<br>Level | Total<br>Marks |  |
| 1          | Representation of Power System      | 06       | 02                           | 02         | 04         | 08             |  |
| 2          | Transmission Line Parameter (R+L+C) | 16       | 04                           | 10         | 12         | 26 (6 +12+8)   |  |
| 3          | Generalized Circuit                 | 12       | 02                           | 08         | 08         | 18 (12+6)      |  |
| 4          | Power Flow                          | 06       | 02                           | 02         | 04         | 08             |  |
| 5          | Circle Diagram                      | 08       | 00                           | 04         | 06         | 10             |  |
|            | Total                               | 48       | 10                           | 26         | 34         | 70             |  |

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

**Notes:** This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified

# **Rationale:**

The diploma engineers are required to work in industry to manufacture and test Semi finished/Finished Products, and in substations etc for diagnose problems and technical resolutions. The students need to have industry and workshop exposure, where they can experience real life equipment, materials, instruments and various kinds of Process & related Equipments. This course has been designed for the students to have real life experiences to help them prepare for their career. The Electrical sector needs skilled and managerial personnel who have technical expertise as well as entrepreneurial qualities to manage the industry and substation.

# **Course Outcomes:**

| EE 16 312.1 | Assign the opportunity to apply the knowledge and skills they have acquired on   |  |  |  |  |  |  |  |
|-------------|--|--|--|--|--|--|--|--|
|             | campus in a real-life work situation.  |  |  |  |  |  |  |  |
| EE 16 312.2 | Furnish the opportunities for practical, hands-on learning from practitioners in |  |  |  |  |  |  |  |
|             | the students' areas of specialization.   |  |  |  |  |  |  |  |
| EE 16 312.3 | Expose students to a work environment, common practices, employment              |  |  |  |  |  |  |  |
|             | opportunities and work ethics in their relevant field.                           |  |  |  |  |  |  |  |
| EE 16 312.4 | Enhance the employability skills of the students.                                |  |  |  |  |  |  |  |
| EE 16 312.5 | Provide opportunities for students to be offered jobs in the organizations in    |  |  |  |  |  |  |  |
|             | which they undergo their Industrial Training.                                    |  |  |  |  |  |  |  |

# **DURATION OF INDUSTRIAL TRAINING:**

Total no. of weeks: 4 weeks before the beginning of  $5^{th}$  semester after finishing of final exam of  $4^{th}$  semester (during summer vacation of  $5^{th}$  Semester).

Training Area: Students can be trained in

- 1. electrical machines production units,
- 2. Generating stations,
- 3. electrical substations,
- 4. domestic rewiring
- 5. Electrical appliances maintenance shops/workshops,
- 6. Power system protection,
- 7. Locomotives,

- 8. Industry Automation,
- 9. Lifts / Elevators maintenance
- 10. Repairing of electrical measuring instruments
- 11. Renewable energy sources
- 12. Electrical contractor,
- 13. Authorized Testing Laboratories workshop,
- 14. Technical Consultant etc.

# **Role of Department:**

- 1. Department have to send training request letter to various industries well in advance before commencement of training.
- 2. After getting sufficient number of seats from the industries, students will be placed in different industries for their 5<sup>th</sup> semester training (during summer vacation).
- 3. Students will have to fill up training form.
- 4. Department will issue an order letter to industry for the said training mentioning the name and registration number of students.
- **5.** All above activities have to be carried out in advance of previous semester as plan out of placement in consultation with students. The students would normally be placed as per their choices, in case of more demand for a particular industry/service centre, students would be allocated place based on their relative merit (based on third semester results)
- 6. During the training period, the head of the department will maintain a schedule for follow up of industrial training and according to it he/she will send the faculty members to various industries.
- 7. The faculty member in touch with industry will check the progress of the student in the training, his/ her attendance, discipline and project report preparation.
- **8.** At the end of the training internal faculty member will assess the work done by student based on his presentation at the institute and training report.

# **Role of Industry:**

- 1. Industry will give effective training to the students for improving their practical skills
- **2.** Industry is expected to assign group of the students under training to some middle management level person for supervision and guidance (Training-in-charge).
- **3.** Training in-charge has to sign weekly diary (To certify the work done by students) with appropriate remarks.
- **4.** Industry may allot project to individual or group of students under training and students has to prepare report on the same project.
- 5. Training in-charge are requested to guide students for preparing their project report.
- **6.** Industry is expected to maintain attendance for the student under training and report any irregularity of the students to their parent college.
- 7. Industry is also expected to issue a certificate of attending training on their letter head with comments if any for student's record and motivation.

# **Guidelines for the Students**

**1.** Students would interact with the identified faculty of the department to suggest his choices for suitable industry/service centre

- 2. Students have to fill the forms duly sealed and signed by authorities along with training order letter and submit it to training officer in the industry on the first day of training.
- **3.** Student would carry with him/her the Identity card issued by institute during training period
- **4.** He/she will have to get all the necessary information from the training officer regarding schedule of the training, rules and regulations of the industry. Student is expected to follow these rules, regulations, procedures etc obediently.
- **5.** During the training period students has to keep record of all the useful information in Log book and maintain the weekly diary (attached here with form-1).
- **6.** Prepare final report about the whole training for submitting to the department at the time of final presentation i.e. seminar.

# Seminar

- Every student will prepare the Industrial training report and deliver the seminar.
- Seminar will be on the Industrial training completed by the student in the industry .
- Use of audio visual and / or power point presentation is desirable.
- Presentation will be for @ 15 minutes including 5 minutes of question and answer.
- Seminar should be presented during fifth semester.

# **Industrial Training Report Format**

- 1. Cover Page
- 2. Inner Pages
  - a) Certificate with signature and seal by Industry/ Company/Factory
  - b) Declaration by student
  - c) Acknowledgement
- 3. Introduction about Industry/ Company/Factory
- 4. Training schedule
- 5. Table of Contents
- 6. List of Tables
- 7. List of Figures
- 8. Abbreviations and Nomenclature (If any)
- 9. Chapters
- 1 Introduction to Project
- 2 Tools & Technology Used
- 3 Snapshots
- 4 Work Done / Observations
- 5 Specific Assignment / Project Handled
- 4. Results and Discussions
- 5. Conclusions and Future Scope
- 10. References
- 11. Data Sheet(If any)
- 12. Appendices ( If any)

# **INSTRUCTIONS FOR TRAINING REPORT**

- 1. A chapter may be further divided into several divisions and sub-divisions depending on type & volume of work.
- 2. The length of the training report may be about 20 to 30 pages.
- 3. The training report shall be computer typed (English- British, Font -Times Roman, Size-12 point) and printed on A4 size paper.
- 4. The training report shall be Hard Copy of Training Report (Spiral Binding) The training report shall be typed with 1.5 line spacing with a margin 3.5 cm on the left, 2.5 cm on the top, and 1.25 cm on the right and at bottom. Every page in the report must be numbered. The page numbering, starting from acknowledgements and till the beginning of the introductory chapter, should be printed in small Roman numbers, i.e, i, ii, iii, iv..... The page number of the first page of each chapter should not be printed (but must be accounted for). All page numbers from the second page of each chapter should be printed using Arabic numerals, i.e. 2,3,4,5... All printed page numbers should be located at the bottom centre of the page.

- 5. The table of contents should list all headings and sub-headings.
- 6. **The list of tables** should use exactly the same captions as they appear above the tables in the text. One and a half spacing should be adopted for typing the matter under this head.
- 7. **The list of figures** should use exactly the same captions as they appear below the figures in the text. One and a half spacing should be adopted for typing the matter under this head.
- 8. The list of symbols, abbreviation & nomenclature should be typed with one and a half line spacing. Standard symbols, abbreviation etc should be used.
- 9. Subject matter must be typed on single side of the page.

All the pages must be numbered properly

## \* Indicates External Examiner

## **Rationale:**

Role of Electrical diploma holder is to work as Technicians & Supervisors for Electrical Installations of residential, commercial and industrial electrification schemes and prepare estimates for these schemes. Has opportunity to work as independent electrical contractors and execute illumination and electrification schemes. Knowledge of electrical engineering drawing, IE rules, NEC (National Electric Code), professional ethics, different types of electrical installation their design considerations equips the students with the capability to prepare the schedule of materials with specifications and estimates for different types of electrical installations. The contents of this subject have been designed keeping in view developing requisite knowledge and skills of estimation and costing in students of diploma in electrical engineering.

## **Course Outcomes:**

| EE16309.1 | Understand various types of electrical symbols, diagrams, IE rules and Important terms related to electrical installation.          |
|-----------|---|
| EE16309.2 | Recognize various types of materials required for wiring  |
| EE16309.3 | Prepare the schedule of materials with specifications and estimates for service mains.  |
| EE16309.4 | Draw the wiring plan; prepare the schedule of materials with specifications and estimates for residential and commercial buildings. |
| EE16309.5 | Draw the layout of machines, wiring plan, prepare the schedule of materials with specifications for industries.                     |
| EE16309.6 | Exercise of contractor ship and tendering   |

# **Contents:**

# 1 : Electrical Symbols, Diagrams and IE Rules

- 1.1 Need of Symbols
  - **1.1.1** List of symbols for electrical equipment's and accessories used in electrical Works.
  - **1.1.2** Light, fan and power circuits, alarm and indicating circuit, contactor control circuits as per I.S.S.
- 1.2 Type of Diagrams
  - **1.2.1** Wiring diagrams (multiple and single line representation) and schematic diagrams as per I.S.S.
  - 1.2.2 Plans & Layouts
- **1.3** Wiring Materials and Accessories
  - **1.3.1** Brief description, general specifications (as per I.S.S.) and approximate cost of different types of wires, cables, switches, distribution board, switch board, boxes, batten and its accessories, conduit and its accessories, lamp holders, socket out lets, plug ceiling roses.
  - **1.3.2** Fuse and energy meter used in domestic and power wiring installations.
- 1.4 Important Terms & IE rules related to Electrical Installation

# 2 : Service Mains

- 2.1 Meaning of service mains and their types, I.S. specification and I.E. rules.
- 2.2 Over Head Service Mains –materials, main components and specifications.
- 2.3 UG Service Mains –materials, main components and specifications.
- 2.4 Estimation of overhead and underground service connection system. (Simple Numerical)

# 3 : Estimation and Costing of Residential and Commercial Buildings

- 3.1 General requirements of electrical installations for Residential flats and Commercial Buildings
  - **3.1.1** Relevant IE rules and IS standard practices
  - 3.1.2 Lighting and power sub circuits with their circuit designs
  - **3.1.3** Diversity factor for sub circuits
  - 3.1.4 Location of outlets and Control switches
  - **3.1.5** Main board and distribution boards with their selection of rating & numbers
  - 3.1.6 Load calculation, Cable selection and Conduit selection
  - 3.1.7 Permissible Voltage drops and size of wires and conductors
  - **3.1.8** Need of earthing and point to be earthed as per IE rules.
  - **3.1.9** Difference between Residential & Commercial installation.
- **3.2** Steps to be followed in preparing electrical estimate.
- **3.3** Detailed estimates and costing of Residential & Commercial Buildings. (Simple Numerical)

# 4 : Estimation and Costing of Industrial Installation

- **4.1** General requirements of electrical installations for industries.
- **4.2** Relevant IE rules and IS standard practices
- **4.3** Concept of industry load as per small, medium and large scale industries.
  - **4.3.1** Concept of single line diagram and motor wiring circuit & Electrical circuit diagram
- **4.4** Design considerations of electrical installation in industries.

- **4.4.1** Motor current calculations
- **4.4.2** Points considered for the location of motor, starter and cable route
- 4.4.3 Selection and rating of wire, cable and size of conductor
- 4.4.4 Selection of rating of fuse wire, starter, main board, distribution board
- **4.4.5** Determination of length of Wire, Cable and Conduit
- **4.4.6** Need of industry earthing and point to be earthed as per IE rules.
- 4.5 Essential requirements for the design of foundation of static and rotating machines.
  - **4.5.1** Factors considered for the design of foundation
    - **4.5.2** Procedure of levelling and alignment of two shafts of directly and indirectly coupled drives
    - 4.5.3 Effects of Misalignment
    - 4.5.4 Installation of rotating machines as per Code of Practice 900:1992
    - 4.5.5 Installation of small Substations
  - **4.5.6** Introduction to installation of Solar roof panel
- **4.6** Steps to be followed in preparing electrical estimate.
- 4.7 Detailed estimates and costing of small scale industries/workshop (Simple Numerical)

## 5 : Contracting and Tenders

- 5.1 Contacting
  - 5.1.1 Concept of Contracts, their types and Contractors
  - 5.1.2 Contract Documents Valid Contracts
- 5.2 Tenders
  - **5.2.1** Concept of Tenders and their types
  - 5.2.2 Tender notices and general conditions in Tender forms
  - 5.2.3 Procedure for submission and opening of Tenders
  - **5.2.4** Comparative Statements and Criterion for selecting Contractors
  - 5.2.5 Administrative approval and Technical sanctions
  - **5.2.6** Principles of Execution of work
  - 5.2.7 Billing of Executed work
    - 5.2.7.1 Compare various methods of Billing

## Suggested specification table with Hours and Marks (Theory)

| Unit<br>No |  | Teaching | Distribution of Theory Marks |            |            |                |  |  |

|            | Topic Title  | Hours    | R<br>Level                   | U<br>Level | A<br>Level | Total<br>Marks |  |  |
| 1          | Electrical Symbols, Diagrams and IE Rules                      | 04       | 02                           | 02         | 04         | 08             |  |  |
| 2          | Service Mains  | 08       | 02                           | 04         | 06         | 12             |  |  |
| 3          | Estimation and Costing of Residential and Commercial Buildings | 18       | 04                           | 10         | 12         | 24             |  |  |
| 4          | Estimation and Costing of Industrial Installation              | 12       | 02                           | 04         | 08         | 16             |  |  |
| 5          | Contracting and Tenders  | 06       | 02                           | 04         | 04         | 10             |  |  |
|            | Total  | 48       | 12                           | 24         | 34         | 70             |  |  |

Legends: R- Remember; U-Understand; A- Apply and above levels (Bloom's revised Taxonomy).

*Notes:* This specification table shall be treated as a general guideline and actual distribution of marks may slightly vary from table. But the questions from each topic should be asked as per marks weightage. Numerical questions are to be asked only if specified

## List of Tutorials/Assignments:

| Sr. | Unit | Title  |
|-----|------|--|
| No. | No.  |  |
| 1   | 1    | Drawing sheet containing List of symbols for electrical equipment's.   |
| 2   | 1    | Drawing sheet containing Light, fan and power circuits, alarm and indicating circuit, contactor control circuits as per I.S.S. |
| 3   | 1    | Drawing sheet containing wiring diagrams and single line diagrams.   |
| 1   | 2    | Drawing sheet containing overhead service mains and underground service mains  |
| 4   | 2    | connection with required accessories.  |
| 5   | 3    | Practice to draw layout (Single line diagram) of Residential & Commercial Buildings.   |
| 6   | 3    | Wiring diagram (real time problem) of Residential & Commercial Buildings.  |
| 7   | 4    | Practice to draw layout (Single line diagram) of Industrial installation   |
| 0   | 1    | Wiring diagram (real time problem) of Industrial installation with minimum two   |
| 0   | 4    | machines.  |
| 9   | 4    | Drawing sheet containing installation of small substation  |
| 10  | 4    | Drawing sheet containing installation of Solar Roof Panel  |

## **Rationale:**

The aim of the project is to provide an opportunity to the students to work on an open-ended engineering problem. The students will be able to apply knowledge from different areas or courses, which they have studied in their curriculum to a real-world scenario. The scientific way of solving the problems and ability to apply it to find alternative solutions for the problems will help them in their professional life. This course will help to inculcate leadership skills, decision making, participative learning, resource management, cost considerations, documentation and report writing skills with effective communication.

Course Outcomes: Student should be able to:

| EE16310.1 | Propose projects with innovative ideas in a clear and concise manner                               |
|-----------|--|
| EE16210.2 | Identify and summarize an appropriate list of literature review, analyze previous work             |
| EE10510.2 | done and relate them to current project  |
| EE16310.3 | Plan and coordinate work in a group.   |
| EE16310.4 | Implement the skills acquired in the previous semesters to solve complex engineering problems.     |
| EE16310.5 | Test the designed project model and evaluate its performance.                                      |
| EE16310.6 | Communicate effectively in oral or written format to present the working of their project/product. |

## **Course Details:**

• The Project groups of fifth semester will continue the project work in sixth semester and complete project in all respect

## 1. Activity plan

| Sr. | Activity   | Week     |
|-----|--|----------|
| No. |  | No       |
| 1   | Prepare activity plan  | 1        |
| 2   | Allocation of work responsibility to individual/team                 | 2        |
| 3   | Visits to Industries / Institutions / Market/field work/sites        | 3        |
| 4   | Collection of Data /Survey/Analysis                                  | 4        |
| 5   | Design of Components, preparation of drawing, estimates wherever     | 5,6      |
|     | required, printed circuits design, its checking,                     |          |
| 6   | Fabrication, Assembling, Model/Prototype development, Testing as per | 7,8,9,10 |
|     | project requirements   |          |
| 7   | Consolidation of work allotted to individual or team                 | 11       |
| 8   | Presentation of initial draft: pre-submission draft                  | 12       |
| 9   | Final Project Report: Printed: Submission: soft & Hard copy          | 13       |
| 10  | Group presentation of project work at the time of final evaluation   | 16       |

The project work along with project report should be submitted as part of term work in third year sixth semester on or before the term end date.

## 2. Project Execution:

1. Guide shall monitor the work and help the students from time to time.

2. A project diary is to be maintained by each student, giving details of planning, work executed, information collected etc., on weekly basis and the same should be shown to the guide concerned

4. The guide should maintain a record of progressive / continuous assessment of project work and observe the progress of each group member on weekly basis.

5. The same shall be kept ready for submission to the external examiner before the final examination.

## 3. Project Report:

1. The student shall get the initial draft copy of the project approved from the Project Guide.

2. Structure: It shall be as follows

## **Project Report Structure**

- Title page
- Inner title page (white)
- Certificate
- Certificate from Industry
- Index/Content/Intent
- List of Abbreviations/Symbols
- List of Figures
- List of Graphs
- List of Tables
- List of if any other inclusion
- Introduction
- Literature Survey/Review
- System Development
- Performance Analysis
- Conclusion
- References
- Appendices
- Acknowledgement
- 1. Introduction (2-3 pages)
  - 1.1 Introduction
  - 1.2 Need/Necessity/Motivation
  - 1.3 Objectives
- 2. Literature Survey/Review (5-10 pages)

Related information available in standard Books, Journals, Transactions, and Internet Websites.

# 3. System Development (20-25 pages)

- The reporting shall be presented in one or more chapters with appropriate chapter titles.
- Experimental setups, procedures adopted, techniques developed, methodologies adopted. Important derivations/formulae
- Figures and tables should be presented immediately following their first mention in the text.

# 4. Performance Analysis (5-15)

• Test results

# 5. Conclusions (1 page)

- 5.1. Conclusion
- 5.2. Future Scope
- 5.3. Applications/Utility

# 6. References (1-2 pages)

- Author, "Title", Name of Journal/Transactions/ Book, Edition/Volume, Publisher, Year of Publication, pp.\_\_\_.
- In case of web pages complete web page address with assessing date has to be enlisted
- List of references should be as per use in the text of the report

# 7. Appendices (5-7 pages)

- Related data or specifications or referred charts, details computer
- Code/program, etc.

## 8. Acknowledgement (1 page)

• Expression of gratitude and thankfulness for helping in completion of the said task with names starting from Guide, HOD, Principal and related persons Signed by the candidate.

## 9. General Guidelines

- Text should be printed on front and correct side of the watermark on quality white bond paper
- Paper size-A4
- Font : Times New Roman
- Report heading :- All capital-16 font
- Chapter heading :- All capital-14 font
- Subchapter :- Title case-12 font
- Sub-subchapter :- First alphabet capital case-12 font
- Content : -Sentence case-12 font
- Title of the Report should not be more than two lines
- Spacing between lines-1.5
- Left Margin-1.5"

- Right Margin-1/2"
- Top Margin-1"

# 10 Flap

Suitable flap with name of the candidate, Department, Institute, symbol of can be used with nylon strip

# **Course Curriculum Development Committee:**

(\*) indicates assessment by External examiner

# **Rationale:**

This is applied technology level subject with application in industry, commercial, public utility departments of government / municipal councils, residential buildings etc. After studying this subject student will be able to inspect / test / troubleshoot electrical machines. They will be conversant about Indian Electricity Act, safety rules, safety of machines & persons, prevention of accident. Also students will be able to carry out routine and preventive maintenance of electrical equipment.

# **Course Outcomes:**

| EE 16 311.01 | Know safety measures & state safety precautions.                             |
|--------------|--|
| EE 16 311.02 | Test and troubleshoot Transformer, AC machine as per IS code of practise     |
| EE 16 311.03 | Identify / Locate common troubles in electrical machines & switch gear.      |
| EE 16 311.04 | Plan & carry out routine & preventive maintenance.                           |
| EE 16 311.05 | Diagnosis and recondition of Insulating materials resistance as per IS code. |

| Unit | Topics/Subtopics   |
|------|--|
| No.  |  |
| 1    | Safety & Prevention:   |
|      | 1.1 Definition of terminology used in safety; safety, hazard, accident, major accident |
|      | hazard, responsibility, authority, accountability, monitoring.                         |
|      | 1.2 Indian Electricity Act 1956 - Chapter IV General Safety Requirements               |
|      | Section-29 Construction, installation, protection, operation & maintenance of          |
|      | electric supply lines and apparatus, Section 30- Service lines and apparatus on        |
|      | consumers premises, Section 36- Handling of electric supply line and                   |
|      | apparatus, General Electricity Safety precautions (Do's & Don't's).                    |
|      | 1.3 Meaning & causes of electrical accidents; factors on which severity of             |

|   | <ul><li>Shock depends, Procedure for rescuing the person who has received an electric shock, methods of providing artificial respiration.</li><li>1.4 Precautions to be taken to avoid fire due to electrical reasons, operation of fire extinguishers.</li></ul>  |
|---|--|
| 2 | <b>General Introduction:</b><br>2.1 Objectives of testing significance of I.S. Concept of tolerance, routine tests, type   |
|   | <ul> <li>tests, special tests</li> <li>2.2 Concept of routine, preventive &amp; breakdown maintenance, advantages of preventive maintenance, procedure for developing preventive maintenance schedule, Factors affecting preventive maintenance schedule. #### **Rationale:**

This course deals with architecture and application of 8051 microcontroller. As the technology is changing, many electrical applications are now microcontroller based so it will be beneficial for students to learn the architecture, programming, interfacing & real world applications of microcontroller in the field of Electrical engineering.

#### **Course Outcomes:**

Student should be able to:

| EE16408.1 | Comprehend the concepts and basic architecture of 8051 microcontroller                                |
|-----------|---|
| EE16408.2 | Interpret the difference between microprocessor and microcontroller                                   |
| EE16408.3 | Recalls 8051 instruction set & composes programs of 8051 microcontroller                              |
| EE16408.4 | Analyzes and Interface different external devices to the processor according to the user requirements |
| EE16408.5 | Implementation of 8051 in the field of Electrical Engineering   |

#### **Course Content Details:**

| Unit No | Topics / Sub-topics                                     |  |  |  |  |
|---------|---|--|--|--|--|
| 1       | Introduction Microcontrollers                           |  |  |  |  |
|         | 1.1 What is Microcontrollers                            |  |  |  |  |
|         | 1.2 Microcontrollers Vs Microprocessors                 |  |  |  |  |
|         | 1.3 Basic architecture                                  |  |  |  |  |
|         | 1.3.1 microcontroller chips                             |  |  |  |  |
|         | 1.3.2 features of modern microcontroller                |  |  |  |  |
|         | 1.3.3 internal structure of microcontroller             |  |  |  |  |
|         | 1.3.4 Harvard Vs Princeton architecture                 |  |  |  |  |
|         | 1.3.5 Micro coded and hard coded processor              |  |  |  |  |
|         | 1.4 Memory Types  |  |  |  |  |
|         | 1.4.1 ROM   |  |  |  |  |
|         | 1.4.2 EPROM   |  |  |  |  |
|         | 1.4.3 EEPROM  |  |  |  |  |
|         | 1.4.4 Flash   |  |  |  |  |
|         | 1.5 Memory Organization,                                |  |  |  |  |
|         | 1.6 External Memory Interfacing, Stacks                 |  |  |  |  |
| 2       | 8051 Microcontrollers                                   |  |  |  |  |
|         | 2.1 Introduction to Intel 8051 Microcontrollers         |  |  |  |  |
|         | 2.1.1Basic 8051 Architecture (Block Diagram & Features) |  |  |  |  |

|   | 2.1.2 Clock and Instruction Cycle                       |  |  |  |  |  |
|---|---|--|--|--|--|--|
|   | 2.2 Internal RAM Structure                              |  |  |  |  |  |
|   | 2.3 Internal Data Memory Map                            |  |  |  |  |  |
|   | 2.4 Special Function Register map                       |  |  |  |  |  |
|   | 2.5 Processor Status Word                               |  |  |  |  |  |
|   | 2.6 Addressing Modes                                    |  |  |  |  |  |
|   | 2.6.1 Immediate   |  |  |  |  |  |
|   | 2.6.2 Direct  |  |  |  |  |  |
|   | 2.6.3 Register  |  |  |  |  |  |
|   | 2.6.4 Register Indirect                                 |  |  |  |  |  |
|   | 2.7 I/O Port Configuration (port0, port1, port2, port3) |  |  |  |  |  |
|   | 2.8 Interfacing of External Memory                      |  |  |  |  |  |
| 2 | 0071 D '  |  |  |  |  |  |
| 3 | 8051 Programming:                                       |  |  |  |  |  |
|   | 3.2805 INitcrocontroller Instructions:                  |  |  |  |  |  |
|   | 2.2.2. A still wastin Lester stillers                   |  |  |  |  |  |
|   | 3.2.2 Arithmetic Instructions,                          |  |  |  |  |  |
|   | 3.2.4 Logical Instructions,                             |  |  |  |  |  |
|   | 3.2.5 Branch Instructions,                              |  |  |  |  |  |
|   | 3.2.0 Subjourne instructions,                           |  |  |  |  |  |
|   | 3.3 Assembler Directives.                               |  |  |  |  |  |
|   | 3.4 Assembly Language Programs                          |  |  |  |  |  |
|   | 3.5 Time Delay Calculations.                            |  |  |  |  |  |
|   |   |  |  |  |  |  |
| 4 | Interfacing with 8051 and Applications:                 |  |  |  |  |  |
|   | 4.1Basics of I/O Concepts, I/O Port Operation,          |  |  |  |  |  |
|   | 4.2 Interfacing 8051 to LCD, Keyboard,                  |  |  |  |  |  |
|   | 4.3 Interfacing with ADC, DAC,                          |  |  |  |  |  |
|   | 4.4 Stepper Motor Interfacing                           |  |  |  |  |  |
|   | 4.5 DC Motor Interfacing and Programming                |  |  |  |  |  |
|   |   |  |  |  |  |  |
| 5 | 8051 Interrupts and Timors/counters:                    |  |  |  |  |  |
| 0 | 5.1 Basics of Interrunts                                |  |  |  |  |  |
|   | 5.1.1 Schematic Representation                          |  |  |  |  |  |
|   | 5.1.1 Schematic Representation                          |  |  |  |  |  |
|   | 5.1.2 Types   |  |  |  |  |  |
|   | 5.1.5 Interrupt Enable Register (IE)                    |  |  |  |  |  |
|   | 5.1.4 Priority Level Structure                          |  |  |  |  |  |
|   | 5.1.5 Interrupt Priority Register (IP)                  |  |  |  |  |  |
|   | 5.2 Timers / Counters                                   |  |  |  |  |  |
|   | 5.2.1 Timer Control (TCON)                              |  |  |  |  |  |
|   | 5.2.2 Timer Modes                                       |  |  |  |  |  |
|   | 5.2.3 Timer Mode Control (TMOD)                         |  |  |  |  |  |
|   |   |  |  |  |  |  |

#### **Rationale:**

In the changing scenario of today's highly automated world day by day the interest on special machines is increasing. These machines serve for several applications. Students are being introduced with special machines as these machines have wide applications in industry, robotic and automation. It is expected that the knowledge of construction, working principles, basic characteristics of these motor will bring deep sight ness in the students, which will enable them to work comfortably in the highly changing industry.

#### **Course Outcomes:**

Student should be able to

| EE16406.1 | Explain the construction, working and starting methods of 1 $\phi$ Induction Motors        |  |  |  |  |  |  |
|-----------|--|--|--|--|--|--|--|
| EE16406.2 | Describe concept of revolving field  |  |  |  |  |  |  |
| EE16406.3 | State advantages/ disadvantages of 1¢ IM over 3¢ IM  |  |  |  |  |  |  |
| EE16406.4 | <b>6406.4</b> Describe the construction and working of $1\phi$ synchronous motors          |  |  |  |  |  |  |
| EE16406.5 | <b>EE16406.5</b> Describe working and phasor diagrams of compensated and repulsion motor.  |  |  |  |  |  |  |
| EE16406.6 | Describe construction, working and classify LIM, stepping motor                            |  |  |  |  |  |  |
| EE16406.7 | <b>EE16406.7</b> Describe construction, working and classify Synchronous Reluctance Motor, |  |  |  |  |  |  |
|           | Switched Reluctance Motor, BLDC, Permanent Magnet Synchronous Motors                       |  |  |  |  |  |  |
|           | and their applications.  |  |  |  |  |  |  |

| Unit No | Topics / Sub-topics  |  |  |  |  |  |  |  |

#### **Rationale:**

In changing economy now, a day more and more stress is being given up in increasing the throughput in industries. The basic tool for achieving this is automation. The aim of this course is to develop the technician to carry out the responsibilities in the industries related to industrial automation. Diploma holder employed in industry needs to operate, test and maintain the industrial drives and its power control. It is very essential for him to know the electrical logic, Input devices, Control supply, control devices and designing control circuits.

This subject covers design of electromagnetic control circuit, basics of PLC programming and introduction to SCADA, operation of hydraulic and pneumatic control systems. This knowledge will help the diploma holder to work as an automation engineer in the industry.

#### **Course Outcomes:**

| Student should | Student should be able to  |  |  |  |  |
|----------------|--|--|--|--|--|
| EE16407.1      | Explain significance of Automation.  |  |  |  |  |
| EE16407.2      | Draw block diagram of PLC  |  |  |  |  |
| EE16407.3      | Understand ladder diagram development  |  |  |  |  |
| EE16407.4      | Know the working of SCADA and DCS  |  |  |  |  |
| EE16407.5      | Develop power and control circuit for different examples like Skip Hoist,<br>Overhead Crane, Conveyor belt, compressor motor |  |  |  |  |
| EE16407.6      | Understand use of potentiometer, synchros as error detector  |  |  |  |  |
| EE16407.7      | Know fundamentals of hydraulic system and Pneumatics systems   |  |  |  |  |

#### **Rationale:**

The diploma engineers are required to work in industry to manufacture and test Semi finished/Finished Products, and in substations etc for diagnose problems and technical resolutions. The students need to have industry and workshop exposure, where they can experience real life equipment, materials, instruments and various kinds of Process & related Equipments. This course has been designed for the students to have real life experiences to help them prepare for their career. The Electrical sector needs skilled and managerial personnel who have technical expertise as well as entrepreneurial qualities to manage the industry and substation.

#### **Course Outcomes:**

| EE 16 313.1 | To give students the opportunity to apply the knowledge and skills they have |
|-------------|--|
|             | acquired on campus in a real-life work situation.                            |
| EE 16 313.2 | To provide students with opportunities for practical, hands-on learning from |
|             | practitioners in the students' areas of specialization.                      |
| EE 16 313.3 | To expose students to a work environment, common practices,                  |
|             | employment opportunities and work ethics in their relevant field.            |
| EE 16 313.4 | To enhance the employability skills of the students.                         |
| EE 16 313.5 | To provide opportunities for students to be offered jobs in the              |
|             | organizations in which they undergo their Industrial Training.               |

## **DURATION OF INDUSTRIAL TRAINING :**

Total no. of weeks: 2 weeks before the beginning of  $6^{th}$  semester after finishing of final exam of  $5^{th}$  semester (during winter vacation of  $6^{th}$  Semester).

Training Area: Students can be trained in

- 1. electrical machines production units,
- 2. Generating stations,
- 3. electrical substations,
- 4. domestic rewiring,
- 5. Electrical appliances maintenance shops/workshops,
- 6. Power system protection,
- 7. Locomotives,
- 8. Industry Automation,

- 9. Lifts / Elevators maintenance
- 10. Repairing of electrical measuring instruments
- 11. Renewable energy sources
- 12. Electrical contractor,
- 13. Authorized Testing Laboratories workshop,
- 14. Technical Consultant etc.

## **Role of Department:**

- 1. Department have to send training request letter to various industries well in advance before commencement of training.
- 2. After getting sufficient number of seats from the industries, students will be placed in different industries for their  $6^{th}$  semester training (during winter vacation).
- 3. Students will have to fill up training form.
- **4.** Department will issue an order letter to industry for the said training mentioning the name and registration number of students.
- **5.** All above activities have to be carried out in advance of previous semester as plan out of placement in consultation with students. The students would normally be placed as per their choices, in case of more demand for a particular industry/service centre, students would be allocated place based on their relative merit (based on third semester results)
- 6. During the training period, the head of the department will maintain a schedule for follow up of industrial training and according to it he/she will send the faculty members to various industries.
- **7.** The faculty member in touch with industry will check the progress of the student in the training, his/ her attendance, discipline and project report preparation.
- **8.** At the end of the training internal faculty member will assess the work done by student based on his presentation at the institute and training report.

## **Role of Industry:**

- 1. Industry will give effective training to the students for improving their practical skills
- **2.** Industry is expected to assign group of the students under training to some middle management level person for supervision and guidance (Training-in-charge).
- **3.** Training in-charge has to sign weekly diary (To certify the work done by students) with appropriate remarks.
- **4.** Industry may allot project to individual or group of students under training and students has to prepare report on the same project.
- 5. Training in-charge are requested to guide students for preparing their project report.
- **6.** Industry is expected to maintain attendance for the student under training and report any irregularity of the students to their parent college.
- 7. Industry is also expected to issue a certificate of attending training on their letter head with comments if any for student's record and motivation.

## **Guidelines for the Students**

- **1.** Students would interact with the identified faculty of the department to suggest his choices for suitable industry/service centre
- **2.** Students have to fill the forms duly sealed and signed by authorities along with training order letter and submit it to training officer in the industry on the first day of training.

- **3.** Student would carry with him/her the Identity card issued by institute during training period
- **4.** He/she will have to get all the necessary information from the training officer regarding schedule of the training, rules and regulations of the industry. Student is expected to follow these rules, regulations, procedures etc obediently.
- **5.** During the training period students has to keep record of all the useful information in Log book and maintain the weekly diary (attached here with form-1).
- **6.** Prepare final report about the whole training for submitting to the department at the time of final presentation i.e. seminar.

## Seminar

- Every student will prepare the Industrial training report and deliver the seminar.
- Seminar will be on the Industrial training completed by the student in the industry .
- Use of audio visual and / or power point presentation is desirable.
- Presentation will be for @ 15 minutes including 5 minutes of question and answer.
- Seminar should be presented during fifth semester.

## **Industrial Training Report Format**

- 1. Cover Page
- 2. Inner Pages
  - a) Certificate with signature and seal by Industry/ Company/Factory
  - b) Declaration by student
  - c) Acknowledgement
- 3. Introduction about Industry/ Company/Factory
- 4. Training schedule
- 5. Table of Contents
- 6. List of Tables
- 7. List of Figures
- 8. Abbreviations and Nomenclature (If any)
- 9. Chapters
- 1 Introduction to Project
- 2 Tools & Technology Used
- 3 Snapshots
- 4 Work Done / Observations
- 5 Specific Assignment / Project Handled
- 4. Results and Discussions
- 5. Conclusions and Future Scope
- 10. References
- 11. Data Sheet(If any)
- 12. Appendices ( If any)

## INSTRUCTIONS FOR TRAINING REPORT

- 1. A chapter may be further divided into several divisions and sub-divisions depending on type & volume of work.
- 2. The length of the training report may be about 20 to 30 pages.
- 3. The training report shall be computer typed (English- British, Font -Times Roman, Size-12 point) and printed on A4 size paper.
- 4. The training report shall be Hard Copy of Training Report (Spiral Binding) The training report shall be typed with 1.5 line spacing with a margin 3.5 cm on the left, 2.5 cm on the top, and 1.25 cm on the right and at bottom. Every page in the report must be

of the introductory chapter, should be printed in small Roman numbers, i.e, i, ii, iii, iv..... The page number of the first page of each chapter should not be printed (but must be accounted for). All page numbers from the second page of each chapter should be printed using Arabic numerals, i.e. 2,3,4,5... All printed page numbers should be located at the bottom centre of the page.

- 5. The table of contents should list all headings and sub-headings.
- 6. **The list of tables** should use exactly the same captions as they appear above the tables in the text. One and a half spacing should be adopted for typing the matter under this head.
- 7. **The list of figures** should use exactly the same captions as they appear below the figures in the text. One and a half spacing should be adopted for typing the matter under this head.
- 8. The list of symbols, abbreviation & nomenclature should be typed with one and a half line spacing. Standard symbols, abbreviation etc should be used.
- 9. Subject matter must be typed on single side of the page.
- All the pages must be numbered properly

#### **Rationale:**

Globalization, liberalization & privatization along with revolution in Information Technology, have thrown up new opportunities that are transforming lives of the masses. Talented and enterprising personalities are exploring such opportunities & translating opportunities into business ventures such as- BPO, Contract Manufacturing, Trading, Service sectors etc. The student community also needs to explore the emerging opportunities. It is therefore necessary to inculcate the entrepreneurial values during their educational tenure. This will help the younger generation in changing their attitude and take the challenging growth oriented tasks instead of waiting for white- collar jobs. The educational institutions should also demonstrate their uniqueness in the creation of enterprising personalities in their colleges. This subject will help in developing the awareness and interest in entrepreneurship and create employment for others.

#### **Course Outcomes:**

#### Student should be able to

| Student Should be where to |   |  |  |  |  |
|----------------------------|---|--|--|--|--|
| CO1                        | Appreciate the concept of Entrepreneurship                                      |  |  |  |  |
| CO2                        | Identify entrepreneurship opportunity   |  |  |  |  |
| CO3                        | Understand the Marketing Strtegy.   |  |  |  |  |
| CO4                        | Collect and use the information to prepare project report for business venture. |  |  |  |  |
| CO5                        | Develop awareness about enterprise management                                   |  |  |  |  |

#### **Course Content Details:**

| Sr. No. | Contents   |  |  |  |  |  |
|---------|--|--|--|--|--|--|
| 1.      | INTRODUCTION   |  |  |  |  |  |
|         | • Definition of Entrepreneur.  |  |  |  |  |  |
|         | Characteristics of Entrepreneur.                                       |  |  |  |  |  |
|         | • Functions of an Entrepreneur.  |  |  |  |  |  |
|         | Barriers to Entrepreneur.  |  |  |  |  |  |
|         | Distinction between Entrepreneur, Manager and Intrapreneur             |  |  |  |  |  |
|         | <ul> <li>Women Entrepreneur-problems and developing trends.</li> </ul> |  |  |  |  |  |
|         | Entrepreneurship-definition, need.                                     |  |  |  |  |  |
| 2.      | FROM BUSINESS IDEA TO OPPORTUNITY                                      |  |  |  |  |  |
|         | <ul> <li>Identifying trends, opportunities and ideas.</li> </ul>       |  |  |  |  |  |
|         | Creativity techniques for idea generation.                             |  |  |  |  |  |
|         | <ul> <li>Evaluate business opportunities</li> </ul>                    |  |  |  |  |  |
|         | • Use of SWOT analysis.  |  |  |  |  |  |
