Two practical skill test are to be conducted. First skill test at mid term and second skill test at the end of the term

Rationale:

Technicians working in industries or elsewhere essentially require the knowledge of environmental Studies so as to enable them to work and produce most efficient, economical and eco-friendly finished products. Solve various engineering problems applying ecosystem to produce eco – friendly products. Use relevant air and noise control method to solve domestic and industrial problems. Use relevant water and soil control method to solve domestic and industrial problems. To recognize relevant energy sources required for domestic and industrial problems. Solve local solid and e-waste problems.

Course Outcomes: Student should be able to

CO1	Understand the ecosystem and terminology and solve various engineering problems
	applying ecosystem knowledge to produce eco – friendly products.
CO2	Understand the suitable air, extent of noise pollution, and control measures and acts.
CO3	Understand the water and soil pollution, and control measures and acts.
CO4	Understand different renewable energy resources and efficient process of harvesting.
CO5	Understand Solid Waste Management & E Waste Management, ISO 14000, 45001 &
	Environmental Management.

Course Content Details:

Unit No	Topics / Sub-topics							
	Ecosystem							
	1.1 Structure of ecosystem, biotic & Abiotic components							
	1.2 Food chain and food web							
1	1.3 Aquatic (Lentic and Lotic) and terrestrial ecosystem							
	1.4 Carbon, Nitrogen, Sulphur, Phosphorus cycle							
	1.5 Global warming -Causes, effects, process, Green House Effect, Ozone depletion							
	Course Outcome: CO1 Teaching Hours : 6 hrs Marks: 03 (R- NA, U-NA, A- NA)							
	Air and Noise Pollution							
2	2.1 Definition of pollution and pollutant, Natural and manmade sources of air pollution							
2	(Refrigerants, I.C., Boiler)							
	2.2 Air Pollutants: Types, Particulate Pollutants: Effects and control (Bag filter, Cyclone							

	computer Electrostatic Dussinitator)									
	2.3 Gaseous Pollution Control: Absorber, Catalytic Converter, Effects of air pollution due									
	to Refrigerante I C. Boiler									
	2.4 Noise pollution: sources of pollution, measurement of pollution level. Effects of Noise									
	nollution									
	Course Outcome: CO2 Teaching Hours : 6 hrs Marks: 05 (D NA U NA A NA)									
	Course Outcome. CO2 Teaching Hours . 0 ms Marks. 05 (K- NA, U-NA, A- NA)									
	Water and Soll Pollution 2.1 Sources of water pollution. Types of water pollutents. Characteristics of water pollutents									
	5.1 Sources of water pollution, Types of water pollutants, Characteristics of water pollutants									
	2.2 Weste Water Treatment: Primary methods: sodimentation froth floatetion Secondary									
	methods: A stivisted sludge treatment Trickling filter Bioreaster Tertiary Method:									
3	Membrane separation technology PO (reverse osmosis)									
	2.2 Causes Effects and Preventive measures of Sail Pollution : Causes Excessive use of									
	5.5 Causes, Effects and Freventive measures of Son Fondtion. Causes – Excessive use of									
	refunzers, resucides and insecucides, imgation, E-waste									
	3.4 Mangroves : Importance, benefits.									
	Course Outcome:CO3 Teaching Hours : 6 hrs Marks: 05 (R- NA, U-NA, A- NA)									
	Renewable sources of Energy									
	4.1 Solar Energy: Basics of Solar energy. Flat plate collector (Liquid & Air). Theory of flat									
	plate collector. Importance of coating. Advanced collector. Solar pond. Solar water									
	heater, solar dryer. Solar stills.									
	4.2 Biomass: Overview of biomass as energy source. Thermal characteristics of biomass as									
4	tuel. Anaerobic digestion. Biogas production mechanism. Utilization and storage of									
-	biogas									
	4.3 Wind energy: Current status and future prospects of wind energy. Wind energy in India.									
	Environmental benefits and problem of wind energy									
	Ambiantions of (Hydrogen anergy Ocean anergy resources. Tidal anergy conversion)									
	Concept, origin and nower plants of geothermal energy									
	Course Outcome: CO4 Teaching Hours : 6 hrs Marks: 05 (R- NA U-NA A- NA)									
	Solid Weste Management OD F. Weste Management ISO 14000 & Environmental									
	Solid waste Management OK E- waste Management, ISO 14000 & Environmental Management									
	For Civil Engineering · VOW FDG									
	For Civil Engineering.									
	5.1 Sond waste generation- Sources and characteristics of : Municipal sond waste, E- waste,									
	biomedical waste.									
	5.2 Metallic wastes and Non-Metallic wastes (lubricants, plastics, rubber) from industries.									
	Hererdous wests									
	5.3 Air quality act 2004 air pollution control act 1981 and water pollution and control									
5	act1006 Structure and role of Central and state pollution control hoard									
5	5.4 Concept of Carbon Credit, Carbon Footprint									
	5.5 Environmental management in fabrication industry									
	5.6 ISO14000: Implementation in industries Benefits ISO 45001:2018									
	5.7 Role of MPCB in factory permit									
	5.8 Green pro IGBC certification, its benefits									
	OR									
	For Computer Engineering & Information Technology :									
	5.1 E-Waste Electronic products which have become unwanted, non-working, obsolete									
	5.2 E-Waste Management Services									
	5.3 Separation of E-Waste from other waste									

5.4 Categorization of E-Waste into old working equipments, old computers, non-working components 5.5 Authorized Recycling Facilities 5.6 Refurbishing OR For Electrical Engineering : 5.1 Various e-waste sources, their constituents, and health impacts 5.2 e-Waste Problem in India 5.3 Initiatives on building awareness in e-waste management. 5.4 Current Status of e-Waste Management & Environmental (Protection) Act 1986 5.5 Development of waste recycling technologies. 5.6 Opportunities of e-Waste Management in India 5.7 e-Waste Management techniques OR For Electronics Engineering & Instrumentation Engineering : 5.1 Solid waste generation- Sources and characteristics of : E- waste, biomedical waste. 5.2 Toxicity due to hazardous substances in E waste and their impact 5.3 Metallic wastes and Non-Metallic wastes (lubricants, plastics, rubber) from industries. Collection and disposal: MSW (3R, principles, energy recovery, sanitary landfill), Hazardous waste 5.4 Domestic E waste disposal and E waste management 5.5 Air quality act 2004, air pollution control act 1981 and water pollution and control act1996. Structure and role of Central and state pollution control board. 5.6 Concept of Carbon Credit, Carbon Footprint. OR For Leather Technology/ Leather Goods & Footware Technology : 5.1 Solid waste generation- Sources and characteristics of : Municipal solid waste, E- waste, biomedical waste. 5.2 Metallic wastes and Non-Metallic wastes (lubricants, plastics, rubber) from industries. Collection and disposal: MSW (3R, principles, energy recovery, sanitary landfill), Hazardous waste 5.3 Air quality act 2004, air pollution control act 1981 and water pollution and control act1996. Structure and role of Central and state pollution control board. 5.4 Concept of Carbon Credit, Carbon Footprint. 5.5 Environmental management in fabrication industry. 5.6 ISO14000: Implementation in industries, Benefits. 5.7 Solid waste management in leather and footwear industries **Course Outcome: CO5 Teaching Hours : 6 hrs** Marks:07(R- NA, U-NA, A- NA)

Note : Chapter 5 should be teach as per department mentioned.

List of tutorials:

Sr.	Unit	COs	Title of the Experiments			
No.	No					
1	1,2,3,	CO1,CO2,	Prepare a write up on each unit (altogether 5 in number) that	14		
	4,5	CO3,CO4,	summarizes the whole unit and presents important points on			
		CO5	it.			
2	2,3	CO2,CO3	Visit to a local polluted site :	4		
			Urban/Rural/Industrial/Agricultural and prepare a report			

			based on visit.	
3	4	CO4	Visit to biomass plant and prepare a report based on visit.	6
4	5	CO5	Visit to municipal solid waste management organization or an authorized e-waste recycling plant and prepare a report based on visit.	6
		Total		30

Abbreviations: L- Theory Lecture, P-Practical, TU-Tutorial, TH- Theory Paper TS1 & TS2- Term Tests, PR-Practical, OR-Oral, TW: Term Work (progressive assessment), * Indicates assessment by External Examiner else internal practical skill test, # indicates Self, on- line learning Mode, @ indicates on line examination Note: For Minimum passing marks under various heads, refer, examination rule AR 26. Two practical skill test are to be conducted. First skill test at midterm and second skill test at the end of the term

Rationale:

Electrical Engineering Diploma holders employed in the field of power generation mostly works in large thermal, hydro power stations, non-conventional power plants and substation. Some may hold independent charge of small generating station and substation. All of them need to know the various primary sources of energy available, the process of energy conversion, equipment necessary for these processes, safety measures and their function.

The aim of this course is to help the student to attain the following industry identified competency through various teaching learning experiences.

Course Outcomes: Student should be able to

EE19207.1	Understand the types of power generation
EE19207.2	Interpret the layout of power plant
EE19207.3	Apply the knowledge of functioning of generating equipment for supervision and maintenance
EE19207.4	Apply safe practices in power plants
	- OWLEDG-

Course Content Details:

Unit No	Topics / Sub-topics					
	Thermal Power Plants: Coal, Gas/ Diesel					
	1.1 Energy conversion process of thermal power plant(A block diagram concept)					
	1.2 Layout and working of a typical thermal power plant (Coal, Gas/ Diesel)					
	1.3 Properties of conventional fuels used in the energy conversion					
	1.4 Equipment used in thermal power plants with its function: Coal, Gas/ diesel					
1	1.5 Functions of the following types of thermal power plants and their major auxiliaries:					
	1.5.1 Coal fired boilers: fire tube and water tube					
	1.5.2 Gas/diesel based combustion engines					
	1.6 Temperature and pressure of steam in modern power plant. Introduction to Super					
	Critical Technology Thermal power plants					
	1.7 Safe Practices, observed in thermal power plants: coal, gas and diesel based					
	1.8 Thermal power plants with capacity in Maharashtra					

	Assignment: Demonstration of Watch video of working of thermal power plant and answer					
	questions					
	Course Outcome: EE19207.1, EE19207.2, EE19207.3, EE19207.4					
	Teaching Hours : 12 Marks: 12 (R- 4, U-4, A-4)					
	Nuclear Power Plant					
	2.1 Energy conversion process					
	2.2 Atomic fusion and fission action, Commonly used Nuclear fuels					
	2.3 Layout and working of a typical nuclear power plant					
	2.3 Equipment used in nuclear power plants and their function only					
	2.4 Disposal of nuclear waste and nuclear shielding					
2	2.5 Safe Practices observed in typical nuclear power plant					
	2.6 Nuclear power plants with capacity at national and state level					
	Assignment: Demonstration of video of working of nuclear power plant and answer questions					
	Course Outcome: EE19207.1, EE19207.2, EE19207.3, EE19207.4					
	Teaching Hours :06 Marks: 06 (R-2, U-2, A-2)					
	Hydro Power Plants					
	3.1 Energy conversion process of hydro power plant					
	3.2 Layout and working of a typical hydro power plant					
	3.3 Equipment used in hydro power plants and their function only					
	3.4 Classification of hydro power plant and type of water turbine: High, medium and low head					
	3.5 Safe Practices observed in hydro power plants					
3	3.6 Pumped Storage Hydro Power Plants					
	3.7 Hydro power plants with capacity in Maharashtra					
	Assignment: Demonstration of video of working of hydro power plant and answer questions					
	3 ESTD. 1960 S					
	Course Outcome: EE19207.1, EE19207.2, EE19207.3, EE19207.4					
	Teaching Hours :12 Marks:12 (R-4, U-4, A-4)					
	Solar Power Plants					
	4.1 Solar Map of India: Global solar power radiation.					
	4.2 Energy conversion process of solar power plant					
	4.3 Solar Power Technology:					
	4.3.1 Concentrated Solar Power (CSP) plants, construction and working of: Power					
	Tower, Parabolic Trough, Parabolic Dish, Fresnel Reflectors					
	4.3.2 Solar Photovoltaic (PV) power plant: layout, construction, and working, Grid Connected					
4	and battery storage solar power plants					
	4.3.3 Equipment used in solar power plants and their function only					
	4.5 Safe Practices observed in solar power plants					
	4.6 Major Solar power plants with capacity at national and state level					
	Assignment: Demonstration of video of solar power plants and answer questions					
	Course Outcome: FE19207.1 FE19207.2 FE19207.3 FE19207.4					
	Togehing Hours \cdot 12 Marks \cdot 12 (R ₋ A U ₋ A - A)					
	1 cauling 110018 . 12 Walks.12 (N- 4, U-4, A- 4)					

	Wind Power Plants					
	5.1 Wind Map of India: Wind power density and its unit of measurements, electrical power output					
	5.2 Layout of Horizontal axis large wind power plant : Geared wind and Direct-drive wind plant					
	5.3 Salient Features of electric generators used in large wind power plants:					
	5.4 Constant Speed Electric Generators: Squirrel Cage Induction Generators (SCIG),					
	Wound Rotor Induction Generator (WRIG)					
5	5.5 Variable Speed Electric Generators: Doubly-fed induction generator (DFIG), wound					
0	rotor synchronous generator (WRSG), permanent magnet synchronous generator (PMSG)					
	5.6 Safe Practices observed in wind power plants					
	5.7 Wind power plants with capacity in Maharashtra					
	Assignment: Demonstration video of wind power plant and answer questions					
	Course Outcome: EE19207.1, EE19207.2, EE19207.3, EE19207.4					
	Teaching Hours : 10 Marks:10 (R-2, U-4, A-4)					
	Biomass-Power Plants					
	6.1 Energy conversion process of biomass based power plant					
	6.2 Layout of a Bio-chemical based (e.g. biogas) power plant					
	6.3 Layout of a Thermo-chemical based (e.g. Municipal waste) power plant					
	6.4 Layout of an Agro-chemical based (e.g. bio-diesel) power plant					
6	6.5 Features of the solid, liquid and gas biomasses as fuel for biomass power plant.					
U	6.6 Safe Practices observed in bio-mass based power plants					
	6.7 Biomass Power plant with capacity in Maharashtra					
	Assignment: Demonstration of video biomass power plant and answer questions					
	Course Outcome: EE10207.1 EE10207.2 EE10207.3 EE10207.4					
	To a bing Hours : S Marker S (D 2 II 4 A 2)					
	1 caching 110015 . 6 Walks. 6 (K-2, U-4, A-2)					

Suggested Specifications Table (Theory):

Unit	G KNOW SEE TO	Distribution of Theory Marks					
No	Topic Title VOWLEDG	R Level	U Level	A Level	Total Marks		
1	Thermal Power Plants: Coal, Gas/ Diesel	4	4	4	12		
2	Nuclear Power Plant	2	2	2	06		
3	Hydro Power Plants	4	4	4	12		
4	Solar Power Plants	4	4	4	12		
5	Wind Power Plants	2	4	4	10		
6	Biomass Power plants	2	4	2	08

Abbreviations: L- Theory Lecture, P-Practical, TU-Tutorial, TH- Theory Paper TS1 & TS2- Term Tests, PR-Practical, OR-Oral, TW: Term Work (progressive assessment), * Indicates assessment by External Examiner else internal practical skill test, # indicates Self, on- line learning Mode, @ indicates on line examination Note: For Minimum passing marks under various heads, refer, examination rule AR 26. Two practical skill tests are to be conducted. First skill test at mid term and second skill test at the end of the term

Rationale: Knowledge of Electrical Circuits is essential in maintaining the electrical equipment. Understanding the layout of electrical circuits, their functioning and behaviour lays a foundation stone for an electrical engineer. This course will help the students to use the principles of circuit analysis in designing, maintaining the electrical circuits of equipment & wiring installations and discharge their duties as a supervisor where ever needed

Course Outcomes: Student should be able to

EE19 208.1	Describe the different parameters of single-phase series AC circuits, their inter
	relationships and behaviour.
EE19 208.2	Describe the different parameters of single-phase parallel AC circuits, their inter
	relationships and behaviour.
EE19 208.3	Describe the different parameters of polyphase AC circuits, their inter
	relationships and behaviour.
EE19 208.4	Apply different circuit analysis techniques and theorems to solve basic circuit
	problems.

Course Content Details:

Unit No	Topics / Sub-topics
	Single Phase AC Series Circuits
	1.1 Instantaneous equations for voltage and current of ac quantity
	1.2 Vector representation of alternating quantity:
	Rectangular form
	Polar form
1	(Numerical on form conversion)
	1.3 A.C through pure resistance alone:- Expression of voltage, current and power,
	waveforms of v, i & p, phasor diagram.
	1.4 A.C through pure inductance alone:- Expression of voltage, current and power,
	waveforms of v, i & p, phasor diagram.
	1.5 A.C through pure capacitance alone:- Expression of voltage, current and power,
	waveforms of, v, i & p, phasor diagram.

Electrical Circuit & Network (EE 19 208)

	1.6 Waveforms phasor diagram and expression of voltage current and power										
	impedance triangle nature of power factor in R-L R-C R-L-C series circuits										
	(Numerical)										
	(Numerical)										
	1./ Power triangle:-active power, reactive power and apparent power.										
	1.8 Resonance in R-L-C series circuit (Numerical)										
	1.9 Graphical Representation of Resonance, resonance curve, Quality (Q) Factor of										
	series resonant circuit										
	somes resonant en eur.										
	Course Outcome: EE19 208 1 Teaching Hours :16 Marks: 18 (R-04, U-04, A-10)										
	Single phage Devellel singuite										
	Single phase raranel circuits										
	2.1 Concept of susceptance, admittance and conductance										
	2.2 Solving AC parallel circuit by vector or phasor method, Admittance method and vector										
	algebra. (Numerical on above)										
2	2.3 Series equivalent of parallel circuit.										
4	2.4 Parallel equivalent of series circuit										
	2.5 Parallel Resonance, Q-factor (Numerical).										
	2.6 Graphical representation of parallel resonance.										
	2.7 Comparison of series and parallel resonance										
	Course Outcome: EE19 208.2 Teaching Hours :12 Marks: 12 (R-04, U-04, A-04)										
	Polyphase circuits										
	3.1 Principle of generation of $3 - \phi$ alternating emf										
	3.2 Advantages of Polyphase circuit over single phase circuit										
	2.2 Dhose Seguence										
	3.3 Phase Sequence.										
3	3.4 Types of three phase connections-Star connection and delta connection.										
	3.5 Concept of balanced and unbalanced load										
	3.6 Relation between phase and line quantities of star connection.										
	3.7 Relation between phase and line quantities of delta connection.										
	(Numerical on balanced load only)										
	(I CAMPIED CONVEDCE										
	Course Outcome: FE19 208 3 Teaching Hours ·10 Marks: 10 (R. 04 U- 02 A-04)										
	Network Analysis-Techniques (DC Circuits) and Theorems										
	iter of a mary sis reening as (50 of cars) and moorenis										
	4.1 Mesh analysis										
	4.2 Nodal analysis using voltage and current sources										
	4.3 Superposition Theorem										
	4.4 Thevenin's Theorem										
4	4 5 Norton's Theorem										
	4.6 Maximum power transfer Theorem										
	4.7 Reciprocity theorem										
	4.8 Introduction to AC Network (How to solve only)										
	(4.1 to 4.7 numerical on DC Circuits only)										
	Course Outcome: EE19 208.4 Teaching Hours :22 Marks: 20 (R- 02, U-04, A- 014)										

Suggested Specifications Table (Theory):

Unit No		Distribution of Theory Marks					
	Topic Title	R Level	U Level	A Level	Total Marks		
1	Single Phase AC Series Circuit	04	04	10	18		
2	Single phase Parallel circuit	04	04	04	12		
3	Polyphase circuit	04	02	04	10		
4	Network Theorems	02	04	14	20		
	Total	14	14	32	60		

List of experiments: Total 10 experiments (or turns) out of 15-16 experiments (or turns)

Sr.	Unit	COs	Title of the Experiments	Hours
No.	No		CALMERT	
1	1	EE19 208.1	To carry out analysis of given RLC series circuit	02
2	2	EE19 208.2	To find out the current flowing through each component in RC parallel circuit	02
3	3	EE19 208.3	To carry out Three Phase Power Measurement	02
4	4	EE19 208.4	Verification of Reciprocity Theorem	04
5	4	EE19 208.4	Verification of Superposition Theorem	04
6	4	EE19 208.4	Verification of Thevenin's Theorem	02
7	4	EE19 208.4	Verification of Maximum Power Transfer Theorem	04
8	4	EE19 208.4	Verification of Norton's Theorem	04
9	2	EE19 208.2	To find out the current flowing through each component in LC parallel circuit	02
10	2	EE19 208.2	To find out the current flowing through each component in parallel RLC circuit	02
		Total		30

Note: Experiments No. 1 to 4 are compulsory and should map all units and Cos. Remaining experiments are to be performed as per importance of the topic.

Tutorial/Assignment:

Sr. No.	Unit No	COs	Title of tutorial/assignment	
1	1	EE19 208.1	Numerical on form conversion	02

Electrical Circuit & Network (EE 19 208)

Programme: Diploma in Electrical Engineering.										
Course Code: EE 19 209				Course Title:	Course Title: DC Machines & Transformer					
Comp	Compulsory / Optional: C									
Teaching Scheme and Credits				Examination Scheme						
L	Р	TU	Total	TH (2 Hr 30 Min)	TS1 (1Hr)	TS2 (1Hr)	PR	OR	TW	Total
04	02		06	60	20	20	50*		25	175

Abbreviations: L- Theory Lecture, P-Practical, TU-Tutorial, TH- Theory Paper TS1 & TS2- Term Tests, PR-Practical, OR-Oral, TW: Term Work (progressive assessment), * Indicates assessment by External Examiner else internal assessment, # indicates Self, on- line learning Mode, @ indicates on line examination

Note: For Minimum passing marks under various heads, refer, examination rule AR 26. Two practical skill tests are to be conducted. First skill test at mid-term and second skill test at the end of the term

Rationale:

This is the subject intends to teach facts, concepts, principle and procedure for operation and testing of electrical machine, such as d. c. generators, d. c. motors and single & three phase transformers. Students will be able to analyze the characteristics of d.c. Machines, transformer and qualitative parameters of these machines.

These machines are used in transmission, distribution & utilization systems. Knowledge gained by the students will be helpful in the study of technological subjects such as utilization of electrical energy, switchgear & protection, testing, maintenance of electrical machines.

The knowledge & the skills obtained will be helpful in discharging duties such as supervisor, controller & R & D technician.

Course Outcomes: Student should be able to

EE19 209.1	Explain different types of DC generators.
EE19 209.2	Maintain different types of DC motors.
EE19 209.3	Interprets single phase transformer.
EE19 209.4	Comprehend three phase transformers.
EE19 209.5	Demonstrate different types of special purpose transformers.

Topics / Sub-topics

	Topic Title: Introduction to D.C. Machines.						
	1.1 Principles of Electromechanical Energy Conversion.						
1	1.2 Necessity of DC Machines.						
	1.3 Constructional parts of D.C. machines- Material used and their functions						
	1.4 Armature windings: Types and comparison (No numerical)						
	Course Outcome: EE19 209.1, EE19 209.2 Teaching Hours : 04 hrs						
	Marks: 04 (R-02, U-02, A-)						
	Topic Title: D.C. Generators						
	2.1 Working principle of D,C. Generator, Fleming's right hand rule.						
	2.2 Types of D.C. Generators.						
	2.3 E.M.F equation & voltage equation of all types of D.C. Generators.						
	2.4 Losses in D.C. Generator.						
	2.5 Power stages of D.C. Generator.						
2	2.6 Characteristics of D.C. Generators.						
	2.7 Armature reaction.						
	2.8 Commutation, methods to improve commutation.						
	2.9 Applications of all generators. (simple numerical on above)						
	States Store						
	Course Outcome: EE19 209.1 Teaching Hours : 10 hrs Marks:10(R- 02, U-04, A-04)						
	Topic Title: D.C. Motors						
	3.1 DC motor: Working principle, Fleming's left hand rule, Types of DC motors.						
	3.2 Back e.m.f. and its significance, Voltage equation of DC motor.						
	3.3 Torque and Speed; Armature torque, Shaft torque,						
	3.4 DC motor starters: Necessity and working of three point starters.						
3	3.5 Speed control of DC shunt and series motor: Flux and Armature control.						
	3.6 losses, efficiency and applications.(simple numerical on above)						
	3.7 Brushless DC Motor: Construction, working advantages and disadvantages and						
	applications.						
	IOWLEDG-						
	Course Outcome: EE19 209.2 Teaching Hours :10 Marks: 10 (R-02, U-04, A-04)						
	Topic Title: Single Phase Transformers						
	4.1 Transformer: Principle of operation						
	4.2 Types of transformers: Shell type and core type.						
	4.3 Construction: Parts and functions, materials used for different parts: CRGO, CRNGO,						
	HRGO, amorphous cores,						
	4.4 EMF equation of transformer: Derivation, Voltage transformation ratio.						
4	4.5 Concept of ideal transformer.						
	4.6 Transformer on No-load and on-load phasor diagram.						
	4.7 Magnetic leakage.						
	4.8 Equivalent circuit of transformer: Equivalent resistance and reactance.						
	4.9 Voltage regulation and Efficiency: Direct loading, OC/SC method.						
	4.10 kVA rating of transformer.						
	4.11 All day efficiency.						

 ${}^{\rm Page} 2$

	4.12 Polarity of transformer					
	(Simple numerical on above)					
	Course Outcome: EE19 209.3 Teaching Hours : 16 Marks: 18 (R-06, U-06, A-06)					
	Topic Title: Three Phase Transformers					
	5.1 Bank of three single phase transformers, Single unit of three phase transformer.					
	5.2 Three phase transformers connections as per IS:2026 (part IV)-1977.					
	5.3 Vector groups					
	5.4 Three phase to two phase conversion (Scott Connection),					
5	5.5 Selection of transformer as per IS: 10028 (Part I)-1985.					
	5.6 Criteria for selection of distribution transformer, and power transformer.					
	5.7 Amorphous Core type Distribution Transformer.					
	5.8 Need of parallel operation of three phase transformer.					
	5.9 Conditions for parallel operation.					
	Course Outcome: EE19 209.4 Teaching Hours : 12 Marks: 10 (R-04, U-06, A-)					
	Topic Title: Special Purpose Transformers					
	6.1 Single phase and three phase auto transformers: Construction working and					
	applications.					
6	6.2 Isolation transformer: Constructional Features and applications					
	6.3 Single phase welding transformer: constructional features and applications					
	0.5 Single phase weighing transformer: constructional realures and applications.					
	Course Outcome: EE19 209.5 Teaching Hours : 08 Marks: 08 (R-, U- 04, A-04)

Two practical skill test are to be conducted. First skill test at mid-term and second skill test at the end of the term.

Rationale:

This is the subject where the principles of electrical transmission and distribution systems are studied. The electricity is generated in bulk at remote places and transmitted to long distances and then distributed in cities, villages and to industry. Knowledge of components of electrical transmission and distribution system and their functions is necessary for understanding power system performance. Study of load dispatch and HVDC transmission is also important for working in power sector.

Course Outcomes: Student should be able to

EE 19 302.1	Explain various transmission and distribution systems.
EE 19 302,2	Calculate the performance of transmission & distribution systems.
EE 19 302.3	Compare between HVDC and HVAC systems.
EE 19 302.4	Describe the Substation and the Power factor improvement.

WOWLEDG

Course Content Details:

Unit No	Topics / Sub-topics						
	Transmission line components and parameters:						
	1.1 Introduction to line component.						
	1.2 Types of conductor- Al, Cu, ACSR, AAC, AAAC, ACSR, HTLS conductor and solid						
	stranded bundle conductors.						
	1.3 Line supports – requirement, type. Construction of supporting structures, Towers,						
1	monopoles						
1	1.4 Spacing between conductors.						
	1.5 Concept of length of span.						
	1.6 Sag in overhead line.						
	1.7 Calculations of sag: effect of wind and ice loading (Simple Numerical)						
	1.8 Types of insulator – Pin, Suspension, Strain, Stay, Shackle.						
	1.9 Safety factor, puncture and ultimate strength.						

	1.10 Potential distribution over a string of suspension insulator.
	1 11 Simple numerical on string efficiency
	1 12 Constants of transmission lines
	1.12 Constants of transmission mes
	1.15 SKIII effect
	1.14 Transposition of conductor and necessity.
	1.15 Proximity effect
	Course Outcome: EE 19 302.1 Teaching Hours : 14 Marks: 12 (R- 4, U- 4, A-4)
	Performance of transmission line:
	 2.1 Classification of transmission line, Important terms, regulation & efficiency of T/L 2.2 Short transmission line, eq. circuit representation & phasor diagram & analysis. (Simple Numerical)
	2.3 Medium transmission line, End condenser method, Nominal T and π circuit
	representation &
	analysis, phasor diagram.
2	2.4 Ferranti effect.
-	2.5 Introduction of Long transmission line.
	• Factors affecting corona.
	• Important terms
	Advantages and disadvantages of corona.
	Methods of reducing corona effect
	Course Outcome: EE 19 302.1, EE 19 302.2
	Teaching Hours : 10 Marks: 12 (R-4, U-4, A-4)
	EHVAC, HVDC and Load Dispatch Center:
	3.1 EHVAC transmission system, advantages, disadvantages.
	3.2 HVDC transmission system, applications, configuration & parts of HVDC system,
	HVDC transmission system
3	3 3 Compare between FHVAC & HVDC
5	3.4 National Regional and State Load Dispatch Centers
	3.5 Introduction to grid and different voltage levels for HVAC and HVDC.
	3.6 Introduction to Line In Line Out system (LILO).
	Course Outcome: EE 19 302.1, EE 19 302.3
	Teaching Hours: 10 Marks: 10 (R-4, U-4, A-2)
	DISIFIDUION SYSTEM: 4.1 Components of Distribution system - distributor, feeder and service mains
	4.1 Components of Distribution system - distributor, feeder and service mains.
	4.2 Classification of distribution system.
4	4.4 Connection scheme of distribution system -radial and ring mains system
	4.5 Factors to be considered for design considerations.
	4.6 Voltage drop calculation for feeder fed at one end for single phase and three phase four
	4.6 Voltage drop calculation for feeder fed at one end for single phase and three phase four wire A.C. balanced system.

	Course Outcome: EE 19 302.1, EE 19 302.2
	Teaching Hours : 12 Marks:12 (R- 4, U- 4, A- 4)
5	Underground Cables: 5.1 Introduction and requirement. 5.2 Classification of Cable. 5.3 Cable conductor. 5.4 Cable construction. 5.5 Cable insulation, metallic sheathing and mechanical protection. 5.6 Comparison with overhead lines. 5.7 Methods of cable laying. Course Outcome: EE 19 302.1 Teaching Hours : 06 Marks: 06 (B-4 U-2 A-0)
6	 Substation & Power factor improvement: 6.1 Introduction, classification of substations according to service & location. 6.2 Typical single line connection diagrams of substation layouts, 11 KV/0.415KV pole mounted distribution substation, 33KV/11KV substation, 132 KV or 220 KV substations. 6.3 Substation equipments and auxiliary systems, their functions, types (AIS, GIS, Hybrid) and substation earthing. 6.5 Causes and disadvantages of low power factor 6.6 P.F. improvement using static capacitor. 6.7 Advantage of P.F. improvement.

Suggested Specifications Table (Theory):

Unit	APIN SO	Distribution of Theory Marks				
No	Topic Title VOWLEDGE	R Level	U Level	A Level	Total Marks	
1	Transmission line components and parameters	4	4	4	12	
2	Performance of transmission line	4	4	4	12	
3	EHVAC, HVDC and Load Dispatch Center	4	4	2	10	
4	Distribution system	4	4	4	12	
5	Underground Cables	4	2	0	06	
6	Substation & Power factor improvement	4	4	0	08	
	Total	24	22	14	60	

1960

List of experiments: Total 10-12 experiments (or turns) out of 15-16 experiments (or turns)

Sr.	Unit	COs	Title of the Experiments	Hour
No.	No			S

1	1	EE19 302.1	Identify different types of transmission and distribution line	2
2	2	EE19 302 2	Assignment on string efficiency and sag	2
2	1	EE17 502.2	Tissignment on sumg ernereney und sug.	-
3	3	EE19 302.3	Compare between HVDC and HVAC systems.	2
4	4	EE19 302.4	Identify different components of 11KV/0.415KV pole	
			mounted distribution substation. Prepare report and draw	
			sheet.	
5	1	EE19 302.1	Identify different types of transmission line conductors.	2
			Prepare report.	
6	1	EE19 302.1	Identify different types of overhead line insulators. Prepare	2
			report.	
7	2	EE19 302.2	Assignment on transmission efficiency.	2
8	3	EE19 302.1	Identify different components of HVDC terminal substation.	2
			Prepare report.	
9	3	EE19 302.1	Visit to Load Dispatch Centre and Prepare report.	4
10	4	EE19 302.1	Prepare report on various method of 3- Ph, 3- wire AC and 3-	2
			Ph, 4- wire AC Distribution system.	
11	4	EE19 302.2	Assignment on voltage drops in the distributor.	2
12	4	EE19 302.1	Prepare report on various voltage control methods used in the	2
			power system.	
13	5	EE19 302.1	Identify different types of underground cables. Prepare report.	2
14	6	EE19 302.4	Prepare report on various methods of improvement of power	2
			factor in A.C. System.	
15	6	EE19 302.4	Identify different components of 132 or 220 or 400 KV	4
			outdoor substation. Prepare report and draw sheet.	
		Total	14 ST 10	36

Note: Experiments No. 1 to 5 (or 6) are compulsory and should map all units and Cos. Remaining experiments are to be performed as per importance of the topic.

Electrical Transmission & Distribution (EE 19 302)

Programme: Diploma in Electrical Engineering (Sandwich Pattern)

Semester-III

EE 19 303 Linux (17)

1. Ubuntu Desktop 16.04

Outline: Ubuntu Linux Desktop 16.04 Ubuntu Linux Desktop on gnome environment The launcher Some of the icons visible on Launcher Calculator, gedit Text Editor, Terminal, Firefox .

2. Desktop Customization 16.04

Outline: Desktop Customization 16.04 The Launcher Remove applications from the Launcher Add applications to the Launcher System Settings Appearance settings Workspace switcher Use.

3. Installing Software 16.04

Outline: Installing software in Ubuntu Linux 16.04 OS Install software via Terminal Installing Synaptic Package Manager Install software via Synaptic Package Manager Configure proxy.

4. Basic Commands

Outline: Basic Commands Commands with example Command interpreter Shell Using man Apropos What is Using --help option.

5. General Purpose Utilities in Linux

Outline: General Purpose Utilities in Linux echo uname who passwd date cal Brief overview on Files and directories pwd ls cat.

6. File System

Outline: File System File Directory File Inode Types of Files Home directory and Current directory Change Directory(cd) mkdir,rmdir

7. Working with regular Files

Outline: Working with Regular Files cat rm cp mv cmp wc.

8. File Attributes

Outline: File Attributes chown, chmod, chmod -R, displaying files with ls -l chmod u+, chmod a-w, chmod g+w, chmod -r, chgrp inode, hard link, symbolic link.

9. Redirection Pipes

Outline: Redirection Pipes Input,output and error stream Redirection : > and >> Pipes : |.

10. Working with Linux Process

Outline: Working with Linux Process Process Shell process Process spawning - parent and child process Process attributes - pid, ppid Init Process User proces.

11. The Linux Environment

Outline: The Linux Environment Environment variable vs Local variables set command env command SHELL, HOME, PATH, LOGNAME, PS1, PS2 history ! and ~ ali.

12. Basics of System Administration

Outline: Basics of System Administration Root login-su User management - UID, GID, useradd, usermod, userdel Discs – Du, df.

13. Simple Filters

Outline: Simple filters Head tail sort cut paste.

14. The grep command

Outline: The grep command To see the content of a file To list the entries of a particular stream To ignore cases Lines that do not match the pattern To list .

15. More on grep command

Outline: More on grep command Search using grep To match more than one pattern To check a word that has different spelling Character class The use of * T.

16. The sed command

Outline: The sed command sed To print using sed Line Addressing Context Addressing.

17. More on sed command

Outline: Some more on sed command substitute insert delete
